Following the report last Tuesday in regard to the production of small seeds, an item in the current number of the Farm Bulletin prepared by county agriculturist, Wray Lawrence, relative to the record of C. W. Bond, who lives near Island City, is of exceptional interest, and importance as well. The item reads—
 C. W. Bond, local seed grower, reports that he has sold over 12,000 lbs. of small seeds in the last two weeks. 19,000 lbs. has been alfalfa seed, 2,000 has been sweet clover seed.

This seed has had a wide distribution. It has gone into the Yakima Valley and Walla Walla Valley in the State of Washington. Other orders have gone to Wallawa county, Wasco County, Umatilla County and Crook County.

Mr. Bond has been in the seed production business for the past twelve years. He has worked up a special trade directly to the farmers. Often times large orders are pooled through the county agents and then ordered direct from Mr. Bond.

He produces annually Grimm, Baltic and Common alfalfa seed, also large quantities of yellow blossom and white blossom sweet clover seed. Average yields of alfalfa run from 100 to 300 lbs. per acre. Sweet clover yields on the average about the same as alfalfa, however, Mr. Bond states that he has produced as high as 15 bushels of good sweet clover seed per acre.

A little foresight will mean a finer garden

THERE is a surprise when you first taste the melting sweetness of Ferry's sweet corn. It is not ordinary sweet corn by any means. Nor is a plump, red, smooth-skinned Ferry tomato like an ordinary tomato. Nor are the Ferry's Seeds that grow these like ordinary seeds.

Remember that when you buy

Ferry's purebred Seeds, you buy inherited quality. Quality is bred into the seeds. A careful up-breeding of vegetables and flowers has been going on in the Ferry trial gardens for 51 years. This means that the Ferry's Seeds you can plant today came from parent plants and grandparent plants that were themselves purebred. Sixty thousand tests are made annually in the Ferry gardens for germination. Thousands of other trials are made for size, form, color, resistance to disease. So far as is humanly possible, we determine that every crop will meet the Ferry standards.

Ferry's Seeds are easy for amateurs to make grow well, and are naturally the choice of professional gardeners. They are fresh for planting now, at the "store around the corner." No packet of Ferry's Seeds is ever carried over by the dealer for sale the second season. Send for the Ferry's Seed Annual. It is more than a catalog. Address D. M. Ferry & Co., Dept. H, 500 Paul Ave., San Francisco, Calif.

Your garden will have its best possible start with Ferry's purebred Seeds.
