state tax commission has a forward looking problem, which includes five major items. These are the excise, the intangibles, the income tax, a full time tax commission and centralized control of assessments. Some of these items are not new but have been in operation in other states for years, and operate successfully, Mr. Carlin stated. All the items on the program are not universally pleasing. There are elements of dissatisfaction, he stated, but according to his thinking, Oregon now stands at a crisis and the times need cooperation. There are immense resources that have not been developed, resources equal to Washington or California. The program in the future should consider these.

In the absence of E. W. Porter, commissioner of finance of the state of Idaho, the manuscripts of his address on "The Banker's Relation to Savings and Loan Associations," was read by Secretary Orenner. Mr. Porter dealt with the history of the two fields of finance, discussing the points of difference, the field of each, etc.

Reports tendered at the morning session included the auditing committee, the resolutions committee, report of activities and of the executive committee of the American Bankers association, together with that of the nominating committee, the adoption of whose report, included the changing and installing of officers immediately preceding the adjournment of the 1929 convention.
