ABE MARTIN

"In no other country did I meet as many waxes as I did in Switzerland," declared Mrs. Lechman Sharp, in her highly educational talk on "The Byways of Europe" before the Art Enthusiast Club, Wednesday evening. She recalled that when she was in the Alps she was "boiled" over for a cat.

Wheat Unsettled, Three Cents Higher

CHICAGO, June 20 (AP)—Wheat advanced 3 1/2 cents to 117 1/2 cents in the market today. The advance was due to a report that the crop in the Northwest will be increased by 100,000,000 bushels. The market was unsettled by a report that the crop in the Northwest will be increased by 100,000,000 bushels.

ROB TOM MIX OF SECURITIES WORTH \$75,000

PORTSMOUTH, N. H., June 20 (AP)—Rob Tom Mix, actor, was arrested today after he had reported to the police that a bag containing cash and securities valued at \$75,000 had been stolen from a private car in which he is traveling with the Bell Photo studio.

TOP GRADES OF BUTTER ADVANCE

Eggs Remain Unchanged in Oregon Market—Strawberries in Dumps

PORTLAND, Ore., June 20 (AP)—Top grades of butter followed Wednesday's advance in the city price when the Daily Exchange opened today. Extras and standards were each advanced half a cent to 44 and 43 1/2 cents, respectively.

Amateur Robbers Wound Young Man

PORTLAND, Ore., June 20 (AP)—Kenneth Smith, 20, was treated at a hospital here today for a fractured elbow caused by a bullet fired by a nervous robber.

Portland Livestock

Closing Strong In Street With Most Issues Up

NEW YORK, June 20 (AP)—The recovery in stock prices was resumed today after an early period of heaviness as a result of the growing speculative belief that the mid-year credit stringency will be considerably less severe than expected and that a gradual easing of credit conditions is in prospect after the turn of the month.

Portland Wheat

PORTLAND, Ore., June 20 (AP)—Cash bids: Wheat: Red Bend, standard, hard white \$1.25. Soft white \$1.15.

New York Fruit

NEW YORK, June 20 (AP)—Dried fruit and hops steady unchanged.

FOOT PAINS ENDED IN 10 MINUTES

—or costs you nothing

SCIENCE says 94% of all foot pains result from weakened muscles. Now a way is discovered to assist and strengthen these muscles. That burning, aching, tired feeling in the feet and legs—foot calluses, pains in toes, instep, ball or heel—dull ache in the ankle, calf or knee—spraying of the feet, or that lagging, heavy feeling—all can now be quickly ended. Pain stops in 10 minutes when an amazing band is used, called the Jung Arch Brace. It is highly elastic and exceedingly light and thin. Nearly 2,000,000 now in use. Specialists, amazed at results, urge it widely. Come in today. Money back if not delighted.

Add An Extra Room Now!

You'll Have Constant Need of This Dual-Use Davenport During the Summer Months

Guests dropping in unexpectedly—friends driving through and making an over-night visit—relatives coming to spend a part of the summer—a chance to rent a bedroom to normal school students now and next fall.

There are dozens of times when an attractive, comfortable practical bed-davenport is necessary in any home. And here you have one that is a beautiful, expertly build piece of furniture—an ornament to the living room by day, a restful bed by night.

It is converted into a bed with remarkable ease—one simple motion—and doesn't look like a bed. Finished in Jacquard velour with fancy reverse cushions, serpentine front. Complete with cotton mattress and coil springs.

One of our feature numbers, unusually low in price at **\$107.50**

Bohnenkamp's

Lindy and Anne have appeared in public. And as had been anticipated it was an event in aviation that brought them out—the contest for \$150,000 offered by Daniel Guggenheim for safety developments in planes. Lindy, who did about the most dangerous thing in aviation and lived to tell about it, ought to be a good judge of progress in safety. He will lend his services, as Guggenheim lends his money, to provide the thing that all air-minded people want most, which is greater flying safety. And the results will come. Ten years from now flying will be considered as safe as motoring—possibly safer, if traffic congestion continues. By the time the babes-in-arms of today are grown, piloting a plane will probably be no more difficult than driving a car in now.

A BEAN CROP IN UMATILLA
In Umatilla county the navy bean is rising to prominence as a crop. An eastern company has leased summerfallow land and will grow beans, then ship them east for canning. Something like \$350,000 is being expended by the company in the bean development around Pendleton and there is an anticipation of 50,000 acres of summerfallow devoted to this crop in the future. In commenting on the crop the East Oregonian says:
"This region is classed as particularly adapted to growing navy beans because of our spring rainfall, favorable growing season and the fact that the beans can be harvested during dry weather. In some regions where this bean is grown the harvest weather conditions are unfavorable. While the beans are to be shipped east for canning the freight element is not as vital as in the wheat business because the product is more valuable in proportion to weight.
"Should bean growing prove profitable there will be interesting possibilities in connection with the use of the straw. It is classed as good feed and the suggestion is made that it be used or else sold to sheepmen for feeding purposes. If used in feeding dairy cattle the advice is to mix wheat straw with the feed because the bean straw is too rich in protein."

The prospect is interesting for all territory where wheat is grown successfully and where sufficient spring moisture is available for the bean crop. Some such crop rotation is inevitable if production costs are to be lowered on grain lands. The present necessity for only one crop in two years has put a big burden on wheat.
The country doesn't need, it is true, any additional wheat acreage. Present crop totals are high enough—too high if the small return can be credited to the crop surpluses in this country. No one wants to find a way to grow a good wheat crop every year on Umatilla lands, perhaps, but every one would like to find a profitable crop that could be grown on summerfallow during the off years and yet not reduce the land's capacity for wheat.
Beans, we understand, are regarded as the ideal crop for the area in Eastern Oregon and Washington now devoted to wheat one year and summerfallow the next. People in this county are eating more beans every year. The demand for beans is greater than the domestic supply. A good many million dollars worth of beans are imported each year, which indicates the possible expansion of this domestic crop.
That is the real secret of agricultural relief. Finding crops of which this country has no surplus. The prosperity of dairy districts is due to that condition. The per capita consumption of dairy products in America is steadily increasing. We consume practically all the milk and butter and cheese and buttermilk produced here. And we consume it at a fairly profitable price. It's the same with beans. And that makes the growing of beans and the growing of dairy herds a more profitable farm occupation than wheat or corn or cotton.
The farmer's salvation in the future may come from finding crops that can be grown profitably to replace those that are on the ragged edge, rather than in legislation. In any event, the experiment with beans in Umatilla county will be interesting to watch.
