

ORE PRODUCTION IN OREGON DROPS

Value of Gold, Silver, Copper and Lead 25 Per Cent Less Than 1927.

The total value of the gold, silver, copper, and lead production from ore sold or treated in Oregon in 1928 was \$296,446 or 25 per cent less than the value of the same metals in 1927, according to final figures compiled by the United States Bureau of Mines, department of commerce.

The gold yield from placer and lode mines in the state was 19,931.19 fine ounces, valued at \$255,968, or 25 per cent less than in 1927. The yield of Placer gold was 34 per cent less than in 1927. The yield of placer gold was 34 per cent less and that of lode 12 per cent less as compared with the respective class of the preceding year. The greater decline in placer gold was due partially to the temporary cessation of dredge operations in Baker County by the Superior Leasing Co., whereas the lode gold yield was aided by active mining of a gold property in Curry County, Baker, Grant, and Josephine counties each produced less gold than in 1927, but Jackson county increased its yield, due to new dredging operations in the county. Grant county held first place in the gold yield of the state in 1928, as it also did in 1927 and 1926.

The output of silver in Oregon in 1928 was 29,924 fine ounces, valued at \$18,091, a loss of 33 per cent in quantity and 30 per cent in value as compared with 1927. Grant county was the leading silver producer of the state in 1928, though its output was 29 per cent less than in 1927. Gold ore of the county contributed largely to the silver yield, with lead ore next in importance. Copper ore shipped from Douglas county in 1928 was the third largest contributor to the silver yield of the state.

The output of copper in Oregon in 1928 was 358,465 pounds, valued at \$51,619, or 27 per cent less in quantity and 19 per cent less in value as compared with 1927. Twenty per cent of the copper reported for 1928 came from ores treated in 1927. Josephine county was the largest producer of copper, followed by Douglas and Baker counties.

The output of lead in Oregon in 1928 increased 150 per cent in quantity and 130 per cent in value, as compared with 1927, and amounted to 13,246 pounds valued at \$78. Grant was the only lead-producing county in the state.

Radio Station Quotas Filled In Most States

WASHINGTON (AP)—With members of the federal radio commission convinced that reception conditions are generally satisfactory and that the reallocation of last November has proven successful, there will be few chances in the broadcast band this summer. The statement by W. D. L. Starbuck, new commissioner from the North Atlantic, that the commission does not encourage establishment of new stations, indicates that few of the 150 applications for new licenses now on file will be granted. Mr. Starbuck has been selected spokesman of the board. In addition to the applications for new stations there are more than 500 requests pending for changes in power, in frequency, in location of transmitters, in hours of operation and for transfers of licenses. With the exception of South Carolina, Mississippi and Nevada, the station quotas of every state under the equal allocation provision of the law has been filled. The broadcasting allotments of some states have been exceeded. Nevada has only one station, KQH at Reno using 100 watts. South Carolina has two stations, WRBW at Columbia with 15 watts and WBBY at Charleston with 75 watts. Mississippi has five stations, its largest being WYOC at Columbus with 500 watts. It is the only one in the three states that ranks as a regional station, the others being local. Scarcely one out of five persons who request new station permits or changes in their licenses appear at hearings on their applications. A large majority of the applicants, none of them not wishing to incur the expense of a hearing, let their cases go by default.

Women Direct Radio Program

Women are program directors of two Pacific coast stations, Jean Campbell Crowe (left) is in charge at KPO and Helen O'Neil at KFRC.

SAN FRANCISCO (AP)—Long hours are not strangers to Helen O'Neil and Jean Campbell Crowe, program directors of two of the Pacific coast's popular radio stations. Mrs. Crowe arranges and directs the 19-hour daily program of KPO, while Miss O'Neil does the same thing for KFRC for 17 hours a day. They both appeared in concert work, Mrs. Crowe as a pianist and Miss O'Neil as a singer, before entering radio.

Mental Clarity Induced By Gas In Certain Types of Insanity

MADISON, Wis. (AP)—An "approach" that breaks partly through the veil of mental inaccessibility of some kinds of insanity and gives an inkling of what goes on behind has been developed by three University of Wisconsin physicians. Their progress, use of gas to restore near-normality for a few minutes, was announced some time ago, and now some of the things they learned are made public. Amazing to many physicians was the emergence of a seemingly normal brain, hinting that an old idea that disease of the brain itself caused insanity may not be wholly true. The physicians were the late Arthur S. Loevenhart, William F. Lorenz and Ralph M. Waters. The restorations were induced by inhaling a mixture of carbon dioxide and oxygen. Sometimes permanent grimaces relaxed to a natural facial expression, unnaturally tensed muscles eased, intelligence returned to the eye, normal speech to tongue mute for years and power of reasonable conversation. The restorations lasted two to 25 minutes. After that there was rapid, sometimes abrupt, relapse. "In most of the cases," the investigators report, "some extremely interesting thoughts were expressed which offer a field for further investigation. "One instance deserves special mention. This occurred in a patient diagnosed as having dementia praecox, of more than six years' duration, who was extremely inactive and mute and had been transferred to a hospital for the chronic insane. "After carbon dioxide and oxygen he began to talk and for a period of more than 25 minutes maintained a remarkably clear and comprehensive conversation. His chief complaint concerning his present situation was the fact that he always had been a hard-working man, employed as an automobile mechanic, and he regretted more than anything else his lack of occupation. This evidence from a psychotic person bearing on the value of occupational therapy is extremely interesting." A preliminary report of the work has appeared in the Journal of the American Medical Association. The temporary relief is assigned to stimulation of the cortex of the brain. Thus far three types of insanity have responded, dementia praecox, manic depressive insanity and involution melancholia. The physicians concluded that there is possibly indicated "something very material about certain kinds of insanity," and that the method of "approach" is worth further investigation.

BEATING PLOWSHARES INTO CLOCKS

BRONTE, Tex. (AP)—Every evening at 5:45 a Bronte merchant strikes a plowshare with a hammer to notify fellow merchants it is near quitting time. At 6 o'clock he strikes it again, and all business houses thereupon close.

Senator Heflin got no response when he dared any Democrat in the United States senate to declare he would support Al Smith for president in 1928. All those senators are supporting themselves for president right now.

Colonial Open Each Night From Friday, June 28

Following the announcement made in The Observer Monday that the Colonial Theater would be opened daily, beginning tomorrow, additional details were given today by the management of the La Grande Theaters, Inc.

As previously announced, the Colonial will have showings nightly with matinees in addition over the weekends, and will feature second runs of great pictures. The selection of pictures will be governed to a large extent by popular demand.

Among the pictures chosen for showing in the near future is "The Lost World," a thrilling adventure picture of prehistoric monsters and thrilling heart drama. Another picture is "Go and Get It," a newspaper picture. Richard Barthelmess will appear with Dorothy Mackall in "Shore Leave" and Norma Talmadge will be starred in her triumph "Camille."

"In connection with the new policy," the management of the theater says, "every effort will be made to not only bring the best for the price but every effort will be made for the comfort and service of the Colonial patrons."

Let's have a little BREEZE!

Why not be comfortable? Get a General Electric Fan—let it blow away heat, headaches, humidity! Costs little.

Oscillating and non-oscillating types—in the size you need—\$5.00 up.

The 10-inch G-E Oscillating Fan gives a wide sweep of cooling breeze, as it swings back and forth silently and faithfully. And the price is only

\$16.50

The Super Service RIVERSIDE TIRE

World circling mileage World beating quality

The SIMPLE statement that this tire assures every owner of complete immunity from major tire troubles and expense for at least 30,000 miles is ample proof of its superlative quality.

IS IS purposely a tire of supreme quality. The manufacturer uses only the finest materials obtainable in it. By every standard of measurement it is in our opinion the Finest Tire Ever Built!

IN SIZE it is so much larger than ordinary tires we recommend its use only in pairs, never singly. Its tread, extra thick, with extra deep-cut non-skid blocks is a design acknowledged to be one of the most attractive ever produced. It will appeal especially to the man who prides himself on owning equipment "as fine as money can buy."

Table with 2 columns: Tire Size and Price. Includes sizes like 29x4.30-6 ply for \$10.75.

THE GUARANTEE behind Super-Quick by Riverside is absolutely unconditional. It is a lifetime guarantee against defects of material and workmanship. In addition, it covers all kinds of wear and all kinds of damage, including rim cut, blow out, stone bruise, rut wear and curb damage—for 30,000 miles. To our knowledge the longest and strongest definite guarantee ever placed on any tire. Only superlative quality can justify such a guarantee.
