Costs less to wear OshkoshB'Gosh

Two pair of Oshkosh B'Gosh cost you less than three or four cheap overalls—*and they'll wear just as long.* Figure what overalls cost you *by the year*—not by the pair.

Why buy cheap overalls and lose money when it actually costs you less to wear full cut, roomy, no-fade mill-shrunk Oshkosh B'Gosh overalls.

You can easily prove it: wear the cheap overall and the Oshkosh B'Gosh on alternate days. After the cheap one is in the rag bag keep track of how many more days wear the Oshkosh B'Gosh overall gives you.

Many who thought they were saving money buying cheap overalls tried this experiment and now wear nothing but

Helen Wills And Tilden Play Way To Semi-Finals

WIMBLEDON, England, July 1 (AP)—Helen Wills and Bill Tilden forged into the semi-finals of the British singles tennis championships today, but George Lott, a third American hope, was trimmed in straight sets by Jean Borotra, of France, in a quarter-final match.

The semi-final bracket in men's singles was now completed as H. W. Austin, of England, won from Baron Von Kehrling, of Hungary, 6-2, 8-6, 6-3, and Henri Cochet, one of the great French musketeers, trounced Hans Timmer, of Holland, 6-4, 7-5, 6-2.

Miss Helen Jacobs, second only to Miss Wills in the American women's ranking, overwhelmed Mrs. C. G. McIlquaham 6-1, 6-0, in another quarter-final match.

In the semi-finals, Tilden now is to meet Cochet and Austin must tackle the other French threat, Borotra.

Shortly after her singles victory, Miss Wills scored again in the mixed doubles, Queen Helen and her partner, Frank Hunter, defeating Mrs. John Hill and G. P. Hughes, an English team, 6-3, 6-2.

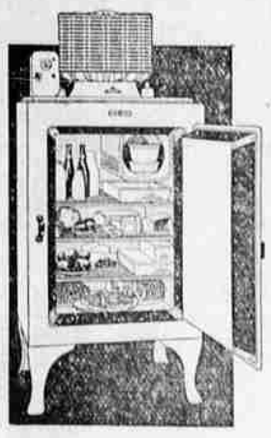
ALL MECHANISM ON TOP ...where it belongs!

THERE are many reasons why all the mechanism of the General Electric Refrigerator is placed *on top* of the cabinet. Here are three vital reasons:

1. Refrigerating-mechanisms develop heat in the process of cooling the interior of the refrigerator. This heat escapes and *rises.* Therefore, General Electric has placed the refrigerating mechanism *on top* so that the escaping heat travels *away from the cabinet.*

2. Placing all the mechanism of the General Electric on top of the cabinet achieves maximum food storage space *within* the cabinet. It also saves floor space and permits the cabinet to be mounted on legs giving ample broom-room underneath for easy cleaning.



3. With refrigerating mechanism on top of the cabinet, the inside of the cabinet is free from obstructions and easier to clean. The constantly rising current of air from the hermetically sealed mechanism prevents dust from settling on the top or coils.

There are more than 300,000 users—and not one has ever spent a dollar for repairs.

Visit our display rooms and see the new *all-steel* General Electric Refrigerators.

Let us explain these 14 superiorities.

1...an hermetically sealed mechanism.
2...an all-steel, warp-proof cabinet.
3...an accessible temperature control.
4...mechanism that requires no oiling.
5...troublesome machinery eliminated.
6...a new standard of quiet operation.
7...upon legs with broom-room underneath.
8...no installation problem whatever.
9...a porcelain chilling chamber.
10...entire mechanism mounted on top.
11...maximum food storage space.
12...absolutely no radio interference.
13...an unqualified two-year guarantee.
14...convenient easy payments.
