HAY YIELDS  
OVER COUNTY  
PROVE HEAVY  
(Continued from Page 1)

The large acreage of spring  
wheat which was seeded on dry  
lands this spring has made an ex-  
cellent growth and many farmers  
say they have wheat which they  
are confident will produce around  
40 bushels per acre. If weather  
conditions are favorable for fill-  
ing, Neal Baker and son Gilbert  
who have leased the H. M. Pfeif-  
er farm on the hill north of town,  
say they have 175 acres of Federa-  
tion wheat which was seeded this  
spring early on land which was  
plowed last fall and put on spring  
plowing, which is looking excep-  
tionally good.

Delivering Lambs  
Despite the fact that the past  
winter and late spring were a  
severe one on stockmen of this  
section, the ideal summer range  
condition which have been had this  
season gives promise of proving a  
fairly good year for the livestock  
industry anyway. Some of the small  
sheep owners in the Leap and Par-  
son creek sections who lambed  
their flocks in February and March  
were busy last week delivering  
their lambs to shipping points. The  
lambs are reported to have

# "Dog-gone!"

Do you suppose the poor animal has run away from home just when there's a new collar and chain to put on? Like locking the barn after the horse has been stolen—or buying insurance after you've had a fire!

We just can't get this subject of insurance off our mind. It is so "dog-gone" important—and the right kind of protection cost so "dog-gone" little to buy. And you can be sure that Jack Ferris is "dog-gone" anxious to give you all the dope on the policy you need.

## GALLSTONES CAUSE TROUBLE

Don't use home treatments  
For pains in your back or side, or if you think you have stomach or liver trouble, try FRUITOLA. One dose shows results. For over twenty years FRUITOLA has been used by many sufferers who have thereby been saved from the pain and risk of an operation. The FRUITOLA formula is the same today as always and often brings relief after the first dose. Many people state they gave up hope of ever being relieved, but one dose of FRUITOLA convinced them that they need no longer suffer pain from gallstones. Give FRUITOLA a chance. You can have the same experience. For sale, recommended and guaranteed by Moon Drug Co., and other leading druggists.—Adv.

When all is said and done, Wallowa Wonderland offers as pleasant and as comfortable a variety of accommodations for those taking a summer vacation as any spot in the Northwest. Union and Wallowa county people are probably too close to it to appreciate its unusual qualities. It takes visitors to discover how green our home pastures really are.

Frank Miller, of Albany and former active member of the board of normal school regents for many years, has been mentioned as member of the public service commission to succeed late Commissioner Bean. Mr. Miller served in that capacity at one time, we understand, and we are of the opinion that he would do so with credit again. He has impressed the people of Eastern Oregon with his sincerity, his fairness, his sound judgement, his pleasant personality. Oregon would do well to continue his fine service to the state.

### CORRECTING THE INITIATIVE

The ease with which anyone properly equipped with finances can initiate a freak measure in Oregon has received the attention of the state Grange. Paid petition circulators are now allowed and have been regarded as a serious evil for some time. In his address to the state Grange State Master Pulminter had this to say of the practice:

"Our law covering the initiative and referendum should be changed so as to stop the circulation of petitions by paid circulators. I do not believe it was the intent of the law that one person with sufficient funds could initiate a law and put it before the people for their approval. Nor do I think one person should be allowed to stop any law passed by the Legislature from going into effect by securing signatures for the referendum by means of paid circulators.  
"The initiative and referendum are necessary so that the people can enact direct legislation, or refer the acts of the Legislature to the people for their approval or rejection. But this is too much power to place in the hands of any individual with money to employ circulators."

He is right. The present law defeats its true purpose by playing into the hands of those who have an abundance of money with which to promote pet or special schemes. Half of the initiated measures that appear on the Oregon ballot have no business there—are not the serious demand of a fair portion of the people of the state. But as long as paid circulators are allowed there will be plenty of citizens willing to sign any kind of petition regardless of its purpose or nature.

Washington, so the Oregon Voter points out, abolished paid circulators six years ago and has seldom had more than one or two initiated measures on the ballot at any election; one or two elections have been held without any. Not so in Oregon under our law.

With paid circulators abolished, petitions for an initiative would be circulated only by volunteer workers, members of various organizations interested in a specific measure, individuals interested in the proposed legislation on its merit and seeking signatures without compensation. Such a provision would eliminate much of our present trouble. The initiative would have a definite purpose and reason—and its use would not depend on the financial resources of those backing a new law.

## KIDDIES OF JINGLELAND CONTEST

### READ THIS

Many completed jingles submitted last week were eliminated from the judging because contestants did not follow the jingle contest rules. The rules are simple. Please follow them carefully.

- 1—The answers in this contest will not be considered if written on any other sheets of paper than in the ads from the newspaper, which should be cut out of the page and clipped together.
- 2—Write your name and address plainly on each jingle submitted.
- 3—Cut each separate ad along the black dividing lines, clip together and enclose in one envelope and send to the contest editor the earliest possible date.
- 4—Don't send the whole page ad in as it appears in the paper, as it is important that each individual ad be fastened together—then mail or bring them in.
- 5—Jingles not submitted in conformity to the rules will not be considered.
- 6—Get your answers in by Monday a. m. at 8 o'clock. All late jingles cannot be sent to the advertiser and are consequently not seen to be judged.

## AMAZING RESULTS ARE PRODUCED BY SARGON

Thousands of Sufferers Say Results Are Almost Unbelievable—Sense of Physical Well-Being and Mental Alertness Replaces a Dragging Body and Depressed Mind in Most All Cases of General Debility Due to Improper Assimilation, Impaired Digestion and Poor Elimination, As Well As Blood, Liver and Nerve Disorders.

When Sargon, the celebrated new medicine recently introduced in this, is given to people who are suffering from what is commonly known as a rundown condition, due to poor assimilation, impaired digestion or improper elimination, as well as the blood and glandular disturbances, the following improvement is noted in the majority of cases:

The appetite increases, the complexion clears; gas, bloating and hyperacidity are overcome; constipation disappears and a sense of physical well-being and mental alertness replaces a dragging body and depressed mind.

All this is accomplished by stimulating and invigorating to more normal action three vital organs and fluids of the human body upon which good health so largely depends. These are the liver, blood and endocrine glands.

Sargon also contains other ingredients of recognized therapeutic value which impart tone and strength to the entire system and which have a tremendous influence upon the appetite and digestion.

Right here in La Grande there are probably over 2000 men and women who are victims of these common, ever-day ailments. The great majority of them are not sick enough to be in bed or even to call a doctor. They are simply rundown and are below par both physically and mentally. Many of them struggle up in the morning and go half-heartedly at their work. They lack energy. They are sluggish and languid. They are not keen and alert.

There are still countless others who are nervous and do not sleep well. Others suffer from periodic headaches from which they get no permanent relief. Their appetites are not keen and they do not relish their food. Some are troubled with indigestion distress after eating, flatulency, gas and bloating.

The great majority of them are troubled with constipation—the greatest curse of the human race—which poisons them and slows them up.

Vast numbers of them are virtually slaves to the habit of dosing themselves almost daily with laxatives and cathartics that weaken the stomach and bowels, often doing more harm than good, and bringing no real or permanent relief. Those with indigestion take so-called "digestive tablets" or other pleasant-tasting concoctions which afford only temporary relief, if any at all.

As a result of improper assimilation and elimination there are still other thousands who are in a toxic condition and who suffer from auto-intoxication or self-poisoning. Thousands of them can't think clearly or concentrate on what they are doing. Many of them are melancholy and depressed. Their eyes are dull. They are listless in both mind and body.

Most of these people do not know what is really wrong with themselves. How to relieve these common, every-day ailments is a problem that has perplexed Medical Science for many years. They attacked this problem as only Science can, in some of the greatest medical centers throughout the world. Many astounding discoveries were the result and have forced into the discard many beliefs, practices and theories we have known for a lifetime.

Here are a few of the startling facts made known by this intensive world-wide investigation: First Science found that the cause of

most indigestion, constipation and other gastro-intestinal disturbances is an insufficient flow of bile caused by a sluggish liver; second, it found the true oxygen-carrying agent of the blood and that a lack of this agent caused simple anaemia and many blood disorders; Third, it discovered the importance of glandular secretions and that a lack of these reduced both mental and physical alertness.

When these important facts were brought to light, Science went even further. Having proved that calomel had absolutely no effect on the liver, but was merely a dangerous, violent purgative. Science discovered that a certain substance increased bile flow and overcame indigestion and constipation in the way that Nature intended. It discovered another substance which increased hemoglobin, the oxygen-carrying agent in the blood, thereby enabling the blood to enrich and purify itself. It also discovered that the glandular secretions were largely composed of a certain basic element and that this element would increase these necessary secretions when they were deficient.

Sargon is based on these discoveries. The formula was perfected after two and one-half years of laboratory research by one of America's leading bio-chemists. It is like no other medicinal product ever before made available to the general public. It is the answer of modern science to the demand of millions of rundown people for something that would build up their lowered vitality and restore them to normal vigor and a zest for living.

In all cases where constipation is present, Sargon Soft Mass Pills are a necessary part of the Sargon treatment. They should be taken daily in connection with Sargon until regularity of bowel movement is established. Then and then only should their use be discontinued.

Weak, thin, debilitated, nervous men and women by thousands the country over are reporting that these remarkable new preparations have brought them new health and strength after all other medicines and treatments had failed to correct their troubles, some of many years standing. In all leading cities where it has been introduced, dealers are buying it in carload lots to supply the phenomenal and overwhelming demand which has made Sargon truly the sensation of the drug trade.

Never before has any medicine aroused such universal interest. Sargon, which may be obtained in La Grande from the Red Cross Science found that the cause of
