You don't have to cream Snowdrift

It's a lot easier to make a cake on the spur of the moment than it used to be before you had Snowdrift.

For Snowdrift is all creamed ready to blend, and it stays that way. You don't have to set it out of the ice box to soften—it takes up the sugar just the way it is. Just put Snowdrift and sugar in the bowl together—twirl your spoon around a few times, and you're ready to stir in the other ingredients.

Creamy Snowdrift is unusually easy to measure too. And it's now packed in an attractive new

Snowdrift

blue and white can that is as easy to spoon out of as your own mixing bowl.

Cake—and indeed whatever you bake is more delicious with Snowdrift.

It's nice for frying too, because it's so slow to smoke or scorch, and because food fried in Snowdrift is always wholesome.

Your grocer has Snowdrift now in two new large sizes, three pound and six pound.
