Killing Flies

Make a game of it with this stainless spray—this new type sprayer

It's fun—catch 'em in mid-air and send 'em into a tallspin, sneak up on 'em and pot-shot a whole colony on the window shade!

Sprays are probably the most effective way of killing flies, but they've not always been safe to use in the house. Some made ugly stains on walls, curtains, clothes.

Now there's a spray you can use anywhere—a stainless spray. Shell laboratories produced it. Used as directed it evaporates completely with no trace of staining.

Old-style spray pumps, you remember, had a clumsy round tank to be filled. The new Shell Fly Spray screws directly onto the Shell Fly Spray can—no filling, spilling, mess or trouble. See the spray and sprayer at your stores or at Shell stations.

...with the guns it's **PRECISION!**

...in a cigarette it's **TASTE!**

GOOD MARKSMANSHIP, you might say, explains Chesterfield's success. We aim at taste—and hit it squarely!

No smoker can taste Chesterfield without realizing that here is a cigarette made to precise formula—exactly balanced, accurately blended and cross-blended, the standard Chesterfield method.

Rich, spicy aroma, and the satisfying "character" of good tobaccos perfectly blended—a direct hit on the target of good taste—

"TASTE above everything"
