experience of the quakes, fixing them between 1 and 3 a. m. Sleeping residents were awakened by the violent tilting of their beds, but no damage was reported.

Attica Church Damaged—Most serious damage was reported from Attica, where one of the walls of the Methodist Episcopal church cracked and falling chimneys damaged the roof of the building. A huge chimney on an industrial plant at Warsaw, in Wyoming county, collapsed.

The Rev. John P. Delaney, S. J., head of the Seismographic department at Cambius college, fixed the center of the quake at a point at least 200 miles south of Buffalo. The shocks traveled in a north and south direction, but their course apparently was erratic.

The Seismograph failed to record the intensity of the shocks, the amplitude of the tremors being so great that the recording needle ran off the record sheet.

The quake, according to meteorological observers, was the first to be felt in the Lake Erie area since the St. Lawrence valley tremor in 1925.

Making Your Choice Between Spending and Saving

The only difficult thing about accumulating a reasonable amount of wealth by the time old age is reached is making the choice between spending and saving.

Anyone can spend money and there are very few people who wouldn't like to have all the comfortable and enjoyable things money can buy. The difficult thing is in deciding that the temporary pleasure you might get out of spending the money for other things — and carrying out that decision.

No matter how small or how great your income may be, there can and should be a margin between what you receive and what you spend. That margin, if put to work earning more money, will grow and afford you far more satisfaction than the possession of things it might buy.

The four per cent interest earned by your saving account here provides a safe, attractive investment. The friendly, experienced counsel of this bank is always at your service.
