MORE CHARGES FACE PANTAGES

Other Girls tell of Attacks — Theater Owner is Arraigned Today.

LOS ANGELES, Aug. 19 (AP)—Alexander Pantages, 54-year-old theatrical magnate, was arraigned in superior court today and was granted a delay in his plea to charges of criminally attacking 17-year-old Eunice Pringle, a dancer, until August 22. The motion, made by Pantages' attorney, Baron Pitts, stated, by girls who formerly were usherettes in Pantages' theater.

The principal deposition, which Pitts said named other girls as having received attentions similar to those ascribed to Eunice Pringle by Pantages, was made by an usherette who stated the attempted attack upon her occurred about a year ago. The deposition was dictated by the girl, whose name Pitts declined to disclose, in the presence of himself and two of his deputies, Harold Jones and Blaney Matthews.

The usherette was quoted as relating that, while employed by Pantages, she was summoned to his "private office" for questioning. After asking her about her work, the girl, quoted, the theater magnate made a point blank proposal which "set her rage aflame." The deposition continued that Pantages used insulting language to her and then attempted to employ force. The usherette related that she escaped, fleeing from the office and the building. "I never went back there," she was quoted as saying, "I knew I wouldn't have a job."

FINE FLAVORS BRING JOY TO EATING

Sugar is the Greatest Condimental Food in the World

Flavor! How much that means to all growing children and to all adults who enjoy their meals. What delight flavor brings to the palate. What satisfaction to a faded appetite. And what flavor surpasses the unique sweetness of sugar?

The sentences above were not spoken, as might be supposed, by a great chef or even by a successful woman cook. They are the words of an eminent scientist, spoken while he was discussing the subject of sugar and diet. Dieticians, medical specialists and scientific authorities all emphasize the importance of a varied, balanced diet. And how many of the useful foods are practically tasteless. How many worth-while foods, if taken "straight," would be so monotonous that we would soon tire of them. This is where sugar enters the domain of the healthful diet. A pinch of sugar used in the cooking of vegetables (preferably cooked with little water) makes these important foods fresher, more colorful and more delightful to the taste. A dash of sugar makes the eating of fruits and cereals a positive pleasure.
