Good Cooks Find Good Cooking Easier With Electric Ranges

Over eight hundred women of the La Grande territory saw the conveniency, the dependability of this beautiful Hot Point Electric Range used by Mrs. McLean during The Observer Cooking School the last four days.

Each day they have seen tempting menus prepared and served—delicious foods—cakes and rolls—meats and vegetables. All with minimum effort on the part of Mrs. McLean. How pleasant it is for a good cook to use such ideal cooking equipment as a Hot Point!

The impressive thing about a Hot Point range is that anyone can get the same results demonstrated by Mrs. McLean this week. You do not have to be an expert cook or even a good cook. The Hot Point is standardized, perfectly tested. Follow the recipe—set the oven at the desired temperature—let the automatic clock watch while you do other things, if you like—and your success is certain.

You can have just such an ideal electric range as Mrs. McLean used—and let the savings in fuel and food help accumulate the easy payments each month.

Take Advantage of These Special Terms — Order Your New Hot Point Range Before September 1st.
