**Oregon Brings In 100 Families During August**  
With 100 families reported as having arrived and located in all parts of Oregon during the month of August, all records of the state chamber of commerce were broken, according to W. G. Ide, manager, who has just issued his regular monthly report of land settlement activities. Another record was also broken in August when the new arrivals made investments in land, buildings, equipment and other property amounting to \$406,851.25. The new residents also purchased 6,901 acres of land, most of which was not formerly in cultivation.

An interesting sidelight on attracting new settlers to Oregon is revealed by Manager Ide who stated that California has been sending the larger proportion of the new people, many of whom were drawn to that state by news of the Boulder dam development. Since it will be several years before water will be available for the Boulder dam, many of these prospective settlers have been directed to Oregon, largely through the efforts of the Los Angeles office of the state chamber. An intensive campaign for new families, investors and parties seeking business and industrial opportunities will be carried on this fall and winter through the Los Angeles headquarters.

## Nervousness

Nervousness is a condition which is seldom due to a single cause and one for which there is no single specific. Less work or play and more rest is usually beneficial. However, there is often a direct spinal irritation of one or more nerves.

As this is a condition for which medication offers no relief, it is always advisable that there be a comprehensive examination of the spine. Often, though not always, spinal adjustments reach directly to the seat of the trouble. See your chiropractor; perhaps your nervousness is of that sort.

By my chiropractic health method and electrical treatments I correct diseases of the eyes, ears, nose, throat, lungs, heart, stomach, liver, kidneys, bowels and lower organs.
