#### Fifteen Men and One Woman Take Part in Record-Breaking Flight

By Raymond J. Crowley  
Associated Press Staff Writer  
NAVAL AIR STATION, Lakehurst, N. J., Aug. 29, (AP)—Looking and setting for all the world as though they had taken a short motor tour rather than a record-making dash around the world, fifteen men and one woman, passengers on the Graf Zeppelin, alighted yesterday as their craft was secured in its hangar and were whisked away almost before they could be asked how they enjoyed themselves.

Clearing the way with difficulty through an airplane-crowded, busy airfield, escorted the adventurers of the air to private motor cars of its buses that carried them to a special train. Some posed for the legions of photographers or paused to say a few words to reporters or to address a vast radio audience, but there was no time for leisurely recital of the perils and the glory of their great adventure.

**"Marvelous" Trip**  
Lieut. Commander Charles E. Rosendahl, U. S. N., survivor of the Sheridan disaster, was the first to step on solid land. The "old" he said, was "not without its ups" but added that it "exceeded all expectations."

Lady Grace Drummond Hay alighted, "put in leather traveling coat and simple felt hat. Waving a doll that held a tiny zepelin in its hand, she laughingly told reporters she would wear these request to pose but added a hope that "it won't have to talk."

A few minutes later, however, she found herself face to face with a million eyes, and she said she had a "most wonderful trip, thank you, all for your wonderful welcome. I am very nervous and can't say more."

Laughing on an ancient-looking pipe, his first smoke since the Graf left Los Angeles, William H. Leeds, said that it would be "him a month" to realize that his voyage really happened.

The whole trip was so wonderful, he said, that he was unable to "locate any part of it that I could call my blarney thrill." Only on the long journey across the Pacific did flying grow a little dull. During that period he kept himself busy by sending radiograms to friends in the Hawaiian Islands.

**FIRE DESTROYS SAWMILL**  
GRANTS PASS, Ore., Aug. 29, (AP)—Fire of undetermined origin has destroyed the saw mill and a large quantity of stacked lumber of the Sunnyside Lumber Company, near Wolf Creek, Ore.

Two owners, Courtney Williams and the Whitaker Brothers and Edward Gordon, said the property was not insured. Loss was estimated at \$2,000.

**MORE TOURISTS VISIT ITALY**  
ROME, (AP)—An increase of about two per cent in the number of foreign visitors landing at Italian ports in May of this year was reported by the national tourist agency, run under government supervision. The first five months of the year saw 41,877 foreigners land, compared with 40,000 for the corresponding period of 1928. Arrivals were up 25 per cent of this total.

**Which Grade of Shingles Do You Prefer?**

Cedar Shingles have never been surpassed in the wood shingle line. But they come in such a variety of grades that unless you see them you cannot always appreciate the difference. To many folks a shingle is a shingle and ought to last a lifetime whether it is put on with a nail that rusts out in five years or with a nail that will last sixty years.

There are what we call 6 to 2, meaning six shingles make a thickness of two inches and the 5 to 2 measure two inches to five shingles. There are common, extra clear and perfects.

Let us show you the shingles themselves and then you will be a better judge of which shingle will suit your purpose best.

## New and Improved..

**THIS** is an announcement to all users of Agmel. It is also addressed to all prospective users who are interested in this great health food—this valuable tonic in high blood pressure, kidney deficiencies, indigestion, glycosuria.

You have probably seen Agmel in the new glass bottle which has replaced the familiar tin container. It is the same Agmel—known so long and favorably in this community. However, it has been improved in both taste and appearance and its efficiency has been considerably increased. It is the finest concentrated sap of the maguey plant that has ever been produced.

As before, Agmel is imported from Mexico. But an improved vacuum process is now employed in the concentration of the raw sap. The latest type of vacuum reducing equipment has been installed in the center of the maguey growing region of Mexico and the raw fresh sap is concentrated every day as soon as it is gathered from the plants. This new method makes the relation between fresh aguamiel and Agmel closer than ever before. In fact, Agmel is aguamiel or maguey sap with the surplus water removed.

The new glass bottle holds a sufficient quantity of Agmel for a whole month's use. Get Agmel at your druggist's. Most druggists sell it.
