Capital Zoo Will Have Snake Palace

WASHINGTON (AP)—A reptile palace, where the world's finest collection of aquatic creatures will reside in most modern captive surroundings, is planned for the National Zoological park.

Architectural features of reptile houses in European zoos, recently surveyed in detail by Dr. William M. Mann, director, will be incorporated in the structure, which is scheduled for completion next spring.

A two-fold objective is sought in the design, natural surroundings at the reptiles and exhibition to the greatest public advantage.

Dr. Mann emphasized that the houses in European zoos, recently and the reptiles, but a public place in which the visitor will see everything at his greatest comfort and convenience.

Each cage, from that of a tiny snake to the quarters of aged turtles, is planned to be a little world in itself, as complete and natural as conditions will permit.

THIRTEEN YOUTHS ARRESTED—PORTLAND, Ore., Oct. 4 (AP)—A Grants Pass, Ore., housewife, unidentified, whose suspicions were aroused by the actions of three youths, was responsible today for the arrest of Eric White, 19; John Johnson, 20; and Charles Campbell, 19.

The youths were returned to Portland today from Grants Pass to face a charge of stealing an automobile belonging to S. M. Carroll, Portland. They were en route to California, police said, and ran out of gasoline and funds at Grants Pass.

They deserted the machine and the housewife notified Sheriff Tom Marshall there.

AT THE THEATERS

"Stolen Kisses" Coming To Arcade Tuesday

"Stolen Kisses" Warner Bros. latest Vitaphone picture, is an up-to-the-minute jazz jamboree, in which a newly-married couple, and the peppy father of the bride, go to Paris—with results that are guaranteed to make any audience sit up and take notice. Funny, fantastic, but intensely human, this gay bit from the pen of Frank Suppe was adapted by E. T. Lowe Jr., and directed by Ray Enright. May McAvoy is starred by Warner Bros. with Claude Gillmanwater, Hailam Conley, Edna Murphy, Reed Hawes, Arthur Hoyt and others in support. Vitaphone is magical in reproduction of all lights, sound and atmospheric accompaniment.

Mirth And Melodrama In Colonial Film

Mirth, mystery and melodrama are a hilarious trio in providing entertainment in "Noisy Neighbors," a Pathé picture which will be on view at the Colonial theater on Tuesday.

This Pathé farce comedy features Eddie Quillan, who established himself in "The Godless Girl" and "Show Folks" as one of the most convincing young comedians on the screen. Alberta Vaughn and Theodore Roberts, occupying places next in prominence are Eddie's father, "Dad" Quillan, a veteran of vaudeville, three other Quillan sons, John, Buster and Joe, and two daughters, Marie and Isabelle. Quite fittingly the clever performers play the "Marceline Montrose" stars of the split-week time, into whose

Forecast "Diamond" Metal For Future

CLEVELAND (AP)—Metals, diamond-hard, and 10 to 15 times as strong as those now used, are envisioned by Dr. Zay Jeffries, of Cleveland, noted metallurgist and president of the American Society for Steel Treating.

Strength of metals is being gradually increased by the new insight into metallic structure given by the X-ray's picture of "atomic society" and other modern analytical methods, Dr. Jeffries says.

Tungsten, for example, assumes a strength of 650,000 pounds to the square inch when drawn out into a wire one-thousandth of an inch in diameter. Glass, drawn to the same small diameter, increases in

metal strength from 15,000 pounds to 402,000.
Research has revealed that tensile strength and hardness of metals can be increased if the crystal particles of which they are constructed are made as small as possible, with faces of the crystals arranged as nearly parallel as possible, making them less likely to slip apart.
This is accomplished by the drawing of wire; by dissolving one metal in another, and letting one of the metals separate out from solution in a fine precipitate; by heat treating; by forming chemical bonds; and by mixing fine particles of a hard compound or metal with another metal as a binder.
Some of the newly formed theories are being applied with success in production of aluminum alloys for airplane and motor parts, new hard surfaces for steel and super-hard cutting metals for hard steels and stone.
