Active People want and need sugar

The "Fuel of Preference" in the body

AN EMINENT food authority recently stated that any person who has a very active body is likely to be always on the edge of the sugar reserve in his body (glycogen). "That is why," he said, "the soldier and athlete wants and needs sugar. That is why the active child that sugar is the fuel of preference in the body, that sugar can be more easily and quickly converted into energy than any other food. He emphasized the fact that sugar should form a part of the regular diet of every family and that any reducing diet, as well as any other diet, should contain sugar.

The best way for sugar to be eaten is as a flavorer of other foods. In that way, it serves the double purpose of furnishing energy to the body and also of adding appetizing delight to other healthful foods. Sugar added to healthful grain cereals makes them welcome and enjoyable to growing children. Think of how many health-giving fruits are objectionable to the taste without sugar. Scientists tell us that we need the daily rougauge of salads as well as cooked fruits and vegetables. Any good cook knows that adding sugar makes all of these welcome and pleasant to the palate. In addition to being the best and cheapest fuel for the body, sugar is nature's perfect flavor. It makes nearly all other foods more enjoyable. For health and enjoyment, there is no substitute for sugar. The Sugar Institute.
