Unexplored Africa
One section of Africa that has re-
cently been discovered, but still re-
quires more exploration, is the
mountain region lying between the
Lakes Albert Edward and Albert
Nyanza. This is said to be the
least known mountain region in
Africa. It was popularly called
"Mountains of the Moon" and is
now known by the name "Ruwen-
zori."

Wild Bison Increases
Sweden's stock of wild bison is
now the largest in Europe. It is in
the world, according to Alarik
Reim, director of the open-air mu-
seum of Skansen, in Stockholm. By
means of protective legislation
these animals are thriving in the
vast bison park at Aergholmen, in
the province of Vastmanland, and
are rapidly multiplying.

Clocks in Odd Shapes
Clocks in the forms of heads have
appeared in Europe. One is a hu-
man skull. Another a monkey's head
and another a grotesque duck's crani-
um. One eye of each head rep-
resents the hours and the other the
minutes. The numerals are painted
around the eyes like large eye-
lashes, while the hands revolve and
serve as eyelids.

Women's Organization
The Women's bureau was organ-
ized in July, 1918, as a war service
unit and made a permanent bureau in
June, 1920. Its staff is composed
entirely of women. Its task is to
formulate standards and policies
for wage-earning women. Its aim
is to safeguard the interests of
working women who are house-
wives and mothers as well as wage
earners, and to make their service
effective for the national good.

Economic Law
The law of diminishing returns
is an economic law, which states
that in any given stage an increase
of labor or capital applied beyond
a certain point in the cultivation
of land causes a less than propor-
tionate increase in the produce
raised from a given area. This
law is generally attributed to Ri-
cardo, but it was discovered consid-
erably earlier.

Qualities That Win
The qualities that recommend
young men are a willingness to
work, courage in the face of dis-
appointment, the habit of thrift and
a sense of fairness.—William
Feather.

First Settlement Abandoned
The first English settlement in
New England was made at the
mouth of the Kennebec river by the
Pilgrim colony in 1607. A store-
house and fortification called Fort
St. George were built. Epidemic
was elected head of the colony,
but died the following year and
the colonists, becoming disheart-
ened by the severity of the winters,
abandoned the settlement.

Falling Counterfeits
The medallion, rattling and clank-
ing movements of counterfeit
money are mathematically correct,
and are made from a machine upon
which \$120,000 was spent in the pro-
duction, and is therefore beyond
the reach of counterfeiters. Engraving
by hand can never equal this work.

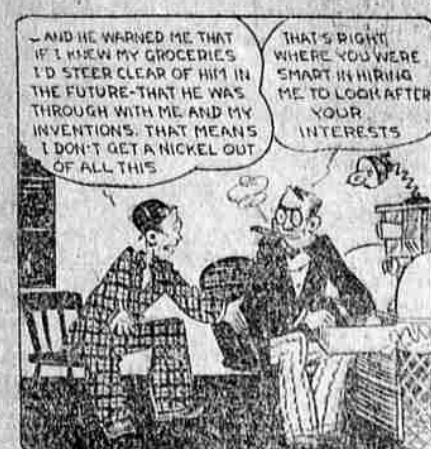

Expensive Tuition
An engineering school is the most
expensive type of school in the
world to operate, according to Ar-
thur C. Rhoad, assistant director at
Massachusetts Institute of Technol-
ogy. The annual operating ex-
penses, he says, is about \$875,000 a
year, compared with tuition of only
\$300.

Nonconformity
Who so would be a man must be
a nonconformist. He who would
gather immortal palms must not be
hindered by the name of goodness,
but must explore if it be goodness.
Nothing is at last sacred but the
integrity of your own mind. Absolve
you to yourself, and you shall have
the suffrage of the world.—Emerson.

First Chilean Newspaper
In 1811 a printing press was sent
from New York to Valparaiso. It
was set up and managed by three
Americans who went with it and
published Chile with its first news-
paper.

When in Doubt
If you are in doubt as to whether
you paid a bill or not, you
didn't.—Athens Globe.
