It is as dry in Wallowa as it is in Portland and when I left home Sunday it was warming up like it is in Portland. As I was coming to the city I was told of several places where water is being carried to the stock; in Umatilla and Morrow counties. That is not being done in Wallowa, however." S. P. ATTACKS CALIFORNIA'S STATEMENTS

(Continued from Page 1)

D. J. McGanney, assistant to the vice president in charge of traffic, introduced some exhibits in opposition to those presented by J. F. Bonn. Through Bonn's exhibits the petitioners said they could develop sufficient traffic in the region to be traversed to pay for the proposed line without the aid of transcontinental traffic.

McGanney said that he disagreed with Bonn's conclusion and gave a long series of statistics based on production possibilities of the region to support his contention. He estimated that not only would the Great Northern and Western Pacific not realize the amount of revenue from the lines they had predicted, but the Southern Pacific would lose on its Westwood branch alone nearly half a million dollars annually.

FOLLERIN' THE BAND

WHO hasn't "follered" the band up Main street, or up Broadway or Michigan boulevard? Heart pumping joyfully, feet beating the ground in time! Grandly interesting moment of childhood!

And—later in life—who hasn't felt a thrill as the conductor lifted his baton for the overture to begin? A moment pregnant with the glamour of the theatre! Music casts its spell throughout all the Ages of Man.

Is it wise then, in this enlightened and prosperous day to countenance substitution of a shadow of music for the real thing in the theatre? Imagine the Irish following a Music Box on St. Patrick's Day! Or life and drum music by a Machine on Memorial Day! Incongruous? Of course, but not more so than a mechanical overture in the theatre.

Talking pictures—a new dramatic form; the radio—which transmits music directly and DOES reflect the artist's mood of the moment; the phonograph in the home—where living music usually is not available—are not at issue here. We are discussing only the SUBSTITUTION OF MECHANICAL MUSIC FOR REAL MUSIC IN THE THEATRE. In consequence of which Real Music is being eliminated in theatres.
