Oats—No. 2, 38-lb. white, $38.

Today's car receipts: Wheat, 10; flour, 1; corn, 2; hay, 4.

Wheat Unsettled And Higher Today

CHICAGO, Dec. 10 (AP)—Argentine reports today of storm weather and of resulting crop damage led to early higher prices here for wheat. Bulges in quotations, however, brought about increased selling pressure, and upturns failed to hold well. Opening at ⅛c to ⅜c advance, wheat afterward showed further gains, but also dipped to below yesterday's finish. Corn and oats were firmer, with corn starting ⅛c to ¼c off to ⅜c up, and subsequently rising all around. Provisions inclined downward.

Wheat closed unsettled ⅛c to ⅝c above yesterday's finish.

PORTLAND LIVESTOCK

PORTLAND, Ore., Dec. 10 (AP)—Cattle and calves—Matured stock steady; calves and vealers uneven, steady to 50c and more lower. Receipts 150.

AIRPORT GAS, ONCE A JOKE, PAYS IN CASH

KANSAS CITY, Kas. (AP)—Fairfax field, one of the nation's largest airports, rapidly is becoming rich—but not from aviation.

Natural gas production from 14 wells on the airport is responsible for an increased income that now totals more than $1,000 a week. Geologists claim the field may produce 10,000,000 cubic feet of gas a day without deep test development.

They found about it when gas seepage caused the first well to be drilled early in 1928. Since the first successful test, however, flow has increased continually. Now more than 3,000,000 cubic feet is sold daily to heat factories at the airport and to public utilities.

Open flow from all wells, most of which are located away from the main landing field, has reached 27 million cubic feet a day. Twenty per cent of this will be available for commercial purposes at the present pressure, it is estimated and airport officials believe at least 75 per cent will be sold.

Discovery of so many unexpected wells has caused gas production to assume the proportions of a business rivaling the airport's own activity.

Deeper tests to ascertain possibilities of even greater yield are under consideration. Geologists believe oil or gas would be found in substantial quantity at deeper levels.

AIR SCHOOL FOR WOMEN TO START IN PITTSBURGH

PITTSBURGH, Pa. (AP)—Pittsburgh is to have a flying school for women only.

Mrs. Louise Thaden, winner of the 1929 woman's air derby, is cooperating with operators of the Pittsburgh-Butler airport in establishing the school.

She will have charge of the students, but the actual training will be given by men.

NEW MT. WHITNEY TRAIL TO BE OPEN NEXT SUMMER

WASHINGTON (AP)—Men who constructed the new trail up Mt. Whitney in Sequoia National park, California, worked at a higher altitude than any other known construction crew in North America.

When the summer season opens in 1930 visitors can go by horseback to the summit of the mountain, 14,496 feet in altitude, the highest peak in the United States south of Alaska. Pike's Peak, famed among tourists, is 14,110 feet high.

A month's work next spring will complete the trail. Early storms prevented its completion this year. Its building involved much difficulty and hardship for the construction crew. The National Park service and the National Forest service joined in the work.

FRENCH DEBT BILL REPORTED

WASHINGTON, Dec. 10 (AP)—The Hawley resolution to authorize congressional approval of the settlement negotiated for funding the $4,025,000,000 French war debt was reported to the house today by its ways and means committee after Under-Secretary Mills had testified the treasury approved of the measure.

Takes Many to Handle Liner

The crew of a large Atlantic liner numbers about 800 members. Six hundred of this number are in the steward's department and in the strict sense of the term are not sailors.

Monarch's Vanity

King Henry VIII, who was proud of his own broad shoulders, set the fashion in garments to accentuate this breadth. You will see this indicated in the many portraits of him by Holbein.

Greatest Deficiency

Man seems to be deficient in nothing so much as he is in time.—Zeno.

Caveman's Dark Cave

A well-lighted hotel corridor with the numbers plainly written on the doors is difficult enough, and we sometimes wonder how the convivial caveman got back to the right cave.—Detroit News.

Parliament's "Red Line"

Along the edges of the carpet on each side of the British house of commons runs a red line. By an unwritten law no member may pass these lines when speaking. The custom dates from the days of the Cavaliers and Roundheads.

Odd Cargo for Warship

One of the strangest cargoes ever carried by a navy ship was that of eight jackasses, four jennies and four jackass colts. It so happened that when Commodore Elliott sailed from the Mediterranean in the frigate Constitution (Old Ironsides), in 1835, he placed these animals on board to bring back to the United States for breeding purposes.

It's Christmas Time

at FALK'S

All Mail Orders Promptly Filled
