Health Talks

A HISTORY OF GERMS. Germs have probably been with us since the beginning of life on earth. Their known history begins, however, with the year 1590. Then a Dutchman, Zacharias Jansen, combined two lenses to form the first compound microscope, an instrument which made plain to the eye very small and otherwise unseen objects.

A few years later Galileo, who taught us that the earth turns about the sun, and not the sun about the earth, rediscovered the compound microscope.

Some fifty years later, another Dutch scientist, Leeuwenhoek, applied this scientific toy, the compound microscope, to the study of the structure of birds and insects and to the examination of various fluids.

In vinegar, sour milk and in cheese, in sea water, well water and in decaying materials he found numerous living objects too small to be seen with the naked eye.

Menus

By Sister Mary Too often we confine our serving of fruit to the breakfast menu during the winter months. A few experiments will show the housewife that fresh fruit will be as welcome for luncheon or dinner as for breakfast, and she will save herself much time and work when she serves it.

At first thought the varieties of fresh fruits may appear limited. But with apples, bananas, cranberries, grapes and several varieties of citrus fruits on the market, the housekeeper has a satisfactory choice.

California grapes, well washed and chilled, make a delightful dessert. The large bunches are divided into single portions for serving.

A Grapefruit Treat Halves of grape fruit thoroughly chilled and served with a marsh-malino cherry and some of the syrup in each half are an excellent dessert to finish a heavy winter dinner.

Sliced bananas are good served with a slight sprinkling of sugar and cream. Either ginger cookies or ginger bread with bananas are an unusually good combination. If the fruit must stand a few minutes before serving, a few drops of lemon juice on each slice will prevent discoloration.

Apple and onion salad may sound incongruous, but is surprisingly pleasant. Tart, crisp apples cut in dice without peeling, finely shredded onion and minced green pepper are served on a bed of lettuce with French dressing. Allow one small onion and one tablespoon pepper to three apples. Red-skinned apples, of course, make the most attractive salad.

Combinations Are Many The combinations of grape fruit in salads is almost legion. A plain grape fruit and lettuce salad is always suitable for a dinner salad and will be particularly welcome to those who are dieting in winter.

There is an orange and cranberry dessert that is very pretty and simple for an informal luncheon. The ways of baking apples and serving them with plain or whipped cream are innumerable and all are delicious. Slow baking and frequent basting with a heavy syrup prevent the fruit from losing its shape during the baking and makes for most attractive serving.

Orange Ruby Two large navel oranges, 1 cup cranberries, 1 cup sugar, 1 1/2 cup boiling water, 1/2 cup whipping cream, 2 tablespoons powdered sugar, 2 drops vanilla. Wash berries and cook until tender in boiling water. Mash and add sugar. Cook five minutes longer and press through a fine sieve. Chill thoroughly. Peel oranges, removing all the white skin, and divide into sections. Free from all connecting tissue and cut into small pieces. Arrange in sherbet glasses and pour the chilled cranberry syrup over them. Garnish with cream whipped and sweetened and flavored lightly with vanilla.

Color In "Rio Rita" Charms Crowds

Which Bebe Daniels dons her brilliant Spanish wedding dress in "Rio Rita" at the State Theater, the "something old, something new, something borrowed, and something blue" is seen in color.

For a large portion of Radio Pictures' all-talking, all-musical version of the Ziegfeld hit is in technicolor.

The brilliant colors of the tropical Mexican costumes, palm trees, the color of a sunset on the Rio Grande, and the wealth of shades and tones in the costumes of the large cast—all are seen in their natural colors.

Miss Daniels was especially enthusiastic over the opportunity to make color sequences in her first all-talking picture. Not only will the fans have a chance to hear her voice, but for the first time the beautiful coloring of the exotic Bebe will be seen.

La Grande's Exclusive Ready-to-Wear and Millinery

The invisible world of life was discovered by him, and his discovery he reported to the Royal Society of London.

But it was not until more than 100 years later that the full significance of the invisible world of life was made clear to mankind.

This greatest achievement stands to the eternal credit of the Frenchman, Louis Pasteur. It was Pasteur who demonstrated, beyond shadow of a doubt, the relation of germs to disease. It was he, too, who showed us the good and the bad in germs.

One by one the mystifying diseases were made clear as to cause. And with discovery of germs came, for certain diseases, knowledge of how to prevent them, and the cure.
