

SOCIETY NEWS

SOCIETY "DEADLINE"
Social news. In order to appear in the society columns, must be in the hands of the society editor each morning by 9 o'clock, in order to allow for preparation so that it may reach the composing room by 10 o'clock. It is requested that people call as soon after 8 o'clock as possible. The society page is "made up" in the morning, and in order to go to press in time to catch the papers to nearby towns, it is necessary to avoid any delays.

"Do Not Go, My Love" by Richard Harding.
During the business meeting of the Christmas seal committee reported \$1194 as the present total for seal sales, with a few small and remote districts yet to turn in reports.
The legislative committee, chaired by Mrs. Norman Pross, submitted proposed amendments to the by-laws. Others on this committee are: Mrs. Fred Smith, Mrs. O. E. Wagner, Mrs. H. Warmholtz.
The next meeting of the Neighborhood club will be February 4, during art week. The program will be on "Southwestern Art," with Mrs. R. E. Westenhaver as chairman.

Past Presidents Give Program At Neighborhood Club

The La Grande Neighborhood club met yesterday afternoon in the gold room of the La Grande hotel, with Dr. Margaret Ingle, president, presiding.
The meeting was opened with a surprise treat. Alfred Meyers sang "Oh Days" by Augusta Holmès—the song of a French soldier returning from the war. The encore

announcement was made of the seventh annual horticultural economic conference to be held in La Grande hotel, January 25 and 26.
The program for the day was planned by the past presidents of the club, and Mrs. L. B. Moo acted as program chairman introducing each president. Each appeared in clothes worn during her administration, and gave a three minute talk bringing out the highlights in the list of club accomplishments for her year. The evolution of dress as presented by these past presidents was the more astounding because the dresses worn were authentic. Year books of the club were also on display. The Neighborhood club was organized in 1894, became a part of the general federation in 1896 and of the state federation in 1899.

Past presidents of La Grande Neighborhood club are:
Mrs. Jessie L. Cavana, Mrs. J. Norman Morrison, Mrs. Mary Cox, Mrs. Clara T. Lyle, Mrs. Laura D. Nash, Mrs. Jessie L. Cavana, Mrs. Turner Oliver, Mrs. Emma S. Gilpin, Mrs. E. C. Moore, Miss Margaret Anson, Mrs. W. A. Worstell, Mrs. J. D. Slater, Mrs. George Carpy, Mrs. Walter Bronholts, Mrs. A. T. Hill, Mrs. A. E. Ivanhoe, Mrs. E. Polack, Mrs. J. K. Wright, Mrs. J. D. Stout, Mrs. J. T. Richardson, Mrs. Vincent Palmer, Mrs. George T. Cochran, Mrs. George W. Gilbert, Mrs. Fay W. Logan, Mrs. O. E. Silverthorn, Mrs. A. K. Hunter, Mrs. T. J. Sorogin, Mrs. John Thelsen, Mrs. Lee Warnick, Mrs. A. L. Richardson, Mrs. J. D. Lynch, Mrs. H. A. Zuebrick, Mrs. C. H. Seranton, Mrs. Robert S. Eakin, Mrs. Sherwood Williams, Mrs. F. L. Meyers.

Nelson giving away the bride, who was dressed in a pretty old-fashioned organza gown, with a net and lace veil caught with orange blossoms. Mrs. Jerry Kimmell was the matron of honor, with Jacob White attending the bridegroom. The service was held under a large white bell, with Samuel Smith acting as minister. "We'll Always Be the Same Old Sweethearts" was sung following the ceremony.
Two beautiful pieces of goldware were presented to the honor guest, by Mrs. Francis Plank representing the W. R. C., and Mrs. Jessie Nelson on behalf of the Daughters of Union Veterans.
An attractive golden cake was presented to them from Mr. and Mrs. A. P. Nelson. A bride and bridegroom under a golden arch topped the pastry creation, and tiny golden birch with outspread wings and orange blossoms were added decorations.
Mrs. Francis Plank and Mrs. Rose Wright entertained with an Irish jig; Loren Gates and Mrs. Laura Rhodes presented the cake walk.
Games were enjoyed, and a quadrille in which Mrs. Braden was the lady of the first couple was danced. Dainty refreshments were served during the close of the evening.

Nab Aerial Rum Runner on Border

Here are first pictures from the "war zone" as Mexican and United States officials combined to halt airplane rum running across the border. Abel J. Boudreau, El Paso, Tex., aviator, shown at the right, was captured when his plane, shown above, was forced down with a cargo of liquor 18 miles south of the Rio Grande. He was fined 50 pesos by Mexican customs officials at Juarez on charges of attempting to smuggle 25 cases of liquor into the United States. The United States customs collector at El Paso is asking the government for planes with which to battle aerial rum runners.

THEATERS

"Mister Antonio" At State Features Carillo

The only way to play dialect roles is to study foreign languages. That is the contention of Leo Carillo, who is one of the stage's most successful dialect actors.

"How can you know what a Frenchman will do with English?" Carillo asks. "If you don't know what the vowel and consonant sounds are in his native tongue, or what peculiar twists there are, compared with your own language, in his grammar? You can't understand the Frenchman's difficulties with the English letter 'r' until you know that he doesn't pronounce an 'r' but breathes it through the sound of the vowel that follows it."

Carillo, consequently, has made a study of five languages—Italian, French, Spanish, Russian and German.

Leo Carillo brings his famous Italian dialect to the title role of "Mister Antonio," the Booth Theatre play showing at the State Theatre today and tomorrow with Virginia Valli costarred. It is a Tiffany-Stahl all-dialogue production, synchronized by RCA photographs.

PLANS SECOND TOKYO ATTEMPT

TACOMA, Wash., Jan. 21 (AP)—Harold Bromley, Tacoma aviator, will make a second trans-Pacific flight attempt from here to Tokyo some time in May. It was announced here by officials of the citizens committee which backed his first effort last July. The initial attempt met with disaster when the plane crashed while taking off.

"THE PROMISE OF SPRING"
The January issue of the Historical Review is a picture entitled "The Promise of Spring." It is the most attractive one that has appeared in the past two years, and is well worth framing. Two new patterns of moulding have just been received which were ordered especially to match this picture and a special price in framing this for you is featured now at Richardson's Art and Gift Shop. 1-22-30.

BRIDGE TAUGHT
Contract auction, Whitehead method, 750 E. H. Irving, La Grande hotel. 1-22-30.

PIANOS WANTED
We will take your piano in trade on a radio. Eastern Oregon Music Co. 1-22-30.

NOTICE OF ROAD SALE

NOTICE IS HEREBY GIVEN that sealed bids will be received at the hour of 7:30 o'clock p. m. on the 29th day of January, 1930, and immediately thereafter publicly opened by the Commissioner of the City of La Grande, Oregon, at the Commission Room in the City Building in said City for City of La Grande Improvement Bonds, Series 1929, in the sum of eight thousand, two hundred eighty-six and 15/100 dollars (\$8,286.15), said bonds bearing the date of December 29, 1929; to mature ten (10) years from date of bonds, with payment, however, optional with the City of La Grande at any semi-annual coupon date on or after one (1) year from date of said bonds, bearing interest at the rate of five and one-half per cent (5 1/2%) per annum, payable semi-annually; both principal and interest payable at the office of the Treasurer of the City of La Grande, Oregon.
All bids must be unconditional and be accompanied by a certified check for five hundred dollars (\$500).
The approving legal opinion of Messrs. Teal, Winfree, McCulloch & Shuler, Portland, Oregon, will be furnished the successful bidder.
The Commission reserves the right to reject any and all bids.
J. E. STEARNS, Recorder, Jan. 19-1930.

FOR YOUR LAMP

New shades for all types of lamps have just been received by Richardson's Art and Gift Shop. They are the latest creations and color schemes. You will enjoy seeing these new numbers. Visit the lamp department at Richardson's Art and Gift Shop. 1-22-30.

HEALTH TALKS

"COOLING THE ENGINE"
All engines produce heat, and for efficient working must be cooled.
Some motors have air-cooling systems; others use water.
But the human engine uses both air and water. The human motor (and it is correct to consider the body a motor) like all other motors, liberates heat; a little when it's resting, more when it's working and a great deal when it's racing.
But the human motor, even more than any man-made machine, must keep an even temperature. The rise of one point on the thermometer usually means there is trouble ahead. As you've no doubt experienced by 1929, when the doctor studies in your temperature.

E. O. N. LIBRARY POPULAR PLACE

Department is One of Centers of Institution—Classroom Laboratory.

One of the most important departments of the Eastern Oregon Normal school is the library, which occupies the section of the building at the west end of the first floor corridor. It is a large well-lighted room, with four windows on the south facing the mountains, and a similar group on the north overlooking the town of La Grande. Twelve study tables are placed about the room and during many hours of the day over 75 students are at work at them.
The initial supply of books was a gift from the State Library. It was through the efforts of Mrs. Walter Pierce, while she was state librarian, that this donation was made. She also gave many back numbers of magazines from her personal library. Among other gifts received was one from the Library association of Portland consisting of about 200 volumes.
The work of checking in, opening, classifying and cataloging the books was started Sept. 1 and since that time about 2500 volumes have been put in circulation. The selection of books in the original purchase was made by the instructors on a basis of the "graded research" which would be necessary in each department. This makes the collection an effective one.
There is an excellent magazine collection of over 100 titles which include all the leading educational periodicals. Already a good collection of children's books is on the shelves and in active use in the education classes and in the classes of the training school.
The library is open from 8:00 a. m. until 5:30 p. m. The records show an average daily circulation of over 200 volumes, which are used by the students in preparation of daily assignments, special reports, term reports, and book reviews.
During the last decade there have been many changes in the methods of teaching. Educators now realize that the library of any progressive school is the center of the classroom. The library of the Eastern Oregon Normal school will continue to be one of the most important departments of the school and as rapidly as possible a strong professional collection of books will be built up.

Weather Below Zero All Day In Imbler Area

By Mrs. C. M. Hale (Observer Correspondent)

IMBLER (Special)—Imbler is still in the grip of the cold wave, Monday night being the coldest of the year. Thermometers varied to the number of degrees but E. Haxen, the depot agent, reports that the thermometer at the depot registered 26 degrees below zero Tuesday morning. The mercury did not climb above the zero mark during the day Tuesday.
Several pupils are absent from school on account of illness. Most of those who have been driving to school from the outlying districts are now staying in town. Roberta Brock is staying at the Watson home and Howard Potratz is staying at the Cowan boarding house.
During the basketball game with Cove Friday night Charlie Lewis had the misfortune of having his nose broken. He is now confined to his home with a cast of the face.
Bob Koenehan going out early one morning with his gun was successful in shooting a large cock.
Mrs. James Woodell is now staying in La Grande where she is receiving medical attention. She seems to be improving.
Miss Anson's pupils, learning she was very fond of peanuts, gave her a shower Monday afternoon. After eating the nuts the pupils were allowed to play games for awhile.

Pilot Rock Man Injured By Fall

BENDLETON, Ore., Jan. 22 (AP)—Walter Smith of Pilot Rock was recovering in a hospital here today from injuries received when he fell 25 feet through a skylight of a warehouse there while clearing snow from the roof. Five ribs, his left arm, pelvis bones and his left ankle were fractured.

Federal Highway Aid Bill Passed

WASHINGTON, Jan. 22 (AP)—The Dowell bill to increase federal highway aid from \$75,000,000 to \$125,000,000 annually for the fiscal years 1931, 1932 and 1933, was passed Tuesday by the house without a record vote and now goes to the senate.

Royalty of Democracy

Our country is a democracy. We are proud of it. Yet we have shoddy lines, soft drink lines, clothing can lines, etc. not to mention flower queens, movie queens, campus queens, beauty queens and what have you? Gosh, how we hate the thought of royalty and titles!—Toledo Blade.

Health Hint

The best light is sunlight. It nets as a disinfectant. It kills disease germs. It stimulates the entire body. It helps to keep people happy. It is best for the eyes when not reading directly in it. We all need the sun.

Derived From the Greek

Most of the characters of the Russian alphabet are derived from the Byzantine Greek of the Ninth century. Some others were added by Cyril to cover Slavonic sounds, increasing the number to 33 letters.

Unnecessary Ruling

A boss has decided that the wife is home inside the house and can have the lights on or off and the blinds open or closed, as suits her fancy and convenience. A court decision was not necessary, but it is nice to know that question was settled legally.—Allan Herald.

Time Locks

The first time lock was sold in 1874 to the First National bank of Morrison, Ill. In a short time there was a demand for similar locks for safes and vaults all over the United States.

Night Schools in America

Free public evening schools were first established in Louisville, Ky., in 1834, and in 1839 they were authorized by law in the state of Ohio. The first evening high school was established in Cincinnati in 1856.

Lucky Dozen Club Is Entertained

Mrs. Francis Plank was recently hostess to the Lucky Dozen club at her home on Adams avenue. The afternoon was spent in pleasant hours of sewing and conversation. Three members of the club were absent due to illness. The home was attractively arranged with potted plants.
The hostess served a dainty two-course luncheon. The next meeting will be at the home of Mrs. B. G. Fritts, Jan. 31.

Glenns Entertain La Petite Club

Members of the La Petite Bridge club spent an enjoyable evening at the home of Mr. and Mrs. Howard Glenn, on Cedar street, last night, with cards the chief diversion of the session. Following this a delicious two-course luncheon was served by the hostess.
High score was made by Mr. and Mrs. Nolan Skiff with consolation honors going to Mrs. T. C. McDonald and George Buga.
The next meeting of the club will be held at the Skiff home.

Hoyts Entertain Island City Club

The Island City Pinochle club spent a pleasant evening Monday at the home of Mr. and Mrs. L. M. Hoyt when three tables of pinochle were enjoyed. Honors were won by Mr. and Mrs. Albert Wardell. Dainty refreshments were served following cards.

Surprise Party Honors Dr. Tribe

A delightful surprise party took place recently at the home of Dr. and Mrs. F. L. Tribe honoring Dr. Tribe on his birthday, with about 20 guests present. Games were enjoyed during the evening, nearing the close of which a dainty two-course luncheon was served.

New Officers of Lodge Hostesses

A large attendance was present last evening when the L. A. of B. of R. T. met in the Eagles hall for regular session. The new officers were hostesses to the members with a delicious luncheon at the Chili Parlors.
The next meeting of the group will be February 4.

Announcements

Announcements must be in the hands of the society editor not later than 10 a. m. in order to appear on the society page.
The Riveria Parent-Teacher association will meet Friday afternoon at 2:30 o'clock in the Riveria school.
The meeting of the Lutheran Ladies Aid has been postponed until Jan. 29 due to sickness and bad weather.
The Westway club of the W. B. A. which had scheduled its next meeting for Friday, Jan. 24 has indefinitely postponed its next session.

Tip to Public Officials

I have found, in my progress through life, that acting for the public if we always do what is right, the approbation denied in the beginning will surely follow us in the end.—Thomas Jefferson.

First Natural Laws

The first and fundamental law of nature which is "to seek peace and follow it." The second, the sum of the right of nature, which is, "by all means we can to defend ourselves."—Hobbes.

Wasp's Usefulness

Wasps play an important part in balancing insect population by killing off large numbers of injurious insects.

Source of Happiness

Happiness is in taste and not in things; and it is by having what we lose that we are happy, not by having what others find acceptable.—Rochefortcauld.

Happiness in Work

Who really knows what is work and what is not? Is it work if it is disagreeable, a burden, a hampering restriction, a necessity, a thing unliked, dreaded? Is it play if it with it goes joy and happiness? Dr. William Elliot once concluded that we should love our work. Easy counsel to give. Sometimes how hard to take!—Boston Herald.

Contour of Lune

A lune is a crescent-shaped figure, bounded by two intersecting arcs of circles, on a plane or in a sphere, formed as the first curvilinear figure, whose area was accurately determined by Hippocrates about 430 B. C., when the central angles of the arcs are as 1:2, or 1:3, or 2:3. A section of orange is an example of a lune.

Halloween

In an Indiana rural school a teacher asked her pupils what discovery occurred in the month of October, 1492. A small lad who was quite eager to give the information was called on and said: "Halloween was discovered by a man with a false face like an Indian."

Too Busy Individuals

A nature note says the bee has to gather nectar from 2000 clover blossoms to make a pound of honey. Just offhand, we'd say the only one busier than the bee was the person who followed it around to check up on it that the world might have that all-important information.—Cincinnati Enquirer.

Truth and Chaff

We must never throw away a bushel of truth because it happens to contain a few grains of chaff.—Dean Stanley.

PUTMAN'S La Grande's Exclusive Ready-to-Wear and Millinery

The normal body in health varies little in its temperature. A man may be resting, then rise and walk, then run after a car and, catching it, sit down and rest again. And though he has shifted from one speed to another, has gone, so to say, from first to third, and back again to neutral, his body temperature probably has changed less than half a degree. It may rise, however, three or four degrees in prolonged and strenuous athletic contests, such as, for example, a four mile heat race or a mile run.

How is this marvel of an even temperature accomplished?
We must look to the body's cooling systems for an answer. The body radiates its heat into the atmosphere that surrounds it. It is also cooled by perspiration.

Take us that comes in contact with our bodies, even though the clothes we wear, takes up heat. The body is then air-cooled. But normal body temperature is only 98.6-10 degrees Fahrenheit.

What happens when the air is warmer than the body, say, when the thermometer registers 85 degrees or 100 degrees—as is common in summertime? Then, the water-cooling system comes to the fore and we perspire. Not that we do not perspire at other times, even in winter. Perspiration is more

marked when the air is hot. Moisture also comes off in the air we breathe.

What happens when the air is warmer than the body, say, when the thermometer registers 85 degrees or 100 degrees—as is common in summertime? Then, the water-cooling system comes to the fore and we perspire. Not that we do not perspire at other times, even in winter. Perspiration is more
