Separated from his mother since he was a baby, 16-year-old John Erickson was reunited with her through this picture of him which appeared in the Albany, N. Y., Knickerbocker press. Widowed and penniless fifteen years ago, Mrs. Erickson had left her child in an institution. Later, more well-to-do, she had returned to get him, but was told falsely that he was dead. FORMER COVE WOMAN DIES IN COAST TOWN

By Mrs. A. G. Gunkla (Observer Correspondent)

COVE, Ore. (Special)—Mrs. Eldridge Moore, better known here as Mrs. Stella Dean, died at her home in Rockaway Beach. Only meager details of her death have reached her friends here but it is thought that death came suddenly from heart trouble as she had suffered from this disease for many years. Mrs. Moore was formerly Mrs. Stella Severs and lived here for some years, teaching in the public school before her marriage to J. E. Dean. She made Cove her home until a few years ago. Her brother, R. W. Severs, left early Tuesday morning for Rockaway Beach. She also has three sisters, Miss Florence Severs, of Seattle, Mrs. Bonnie Roberts, of Tacoma, and another sister in Portland.

James Pulp, who died at a Medford hospital Sunday, was well known in Cove and vicinity. He had an attack of the two years ago from which he never fully recovered. He has made his home in Halfway where he had a large stock ranch for the last 50 years. He left his home before Christmas to visit a son, Desmond at Waldport, staying there about two weeks and from there went to Medford to visit Mrs. Mary Wagner. He was taken ill and his friends took him to the hospital Thursday and death came Sunday from heart failure. He was 59 years old at the time of his death. He was born in Wisconsin and later lived in Texas. Mr. Pulp came west when a young man and was in the employ of one of the early pioneers of Cove, James Payne. He then spent some time, freighting in Idaho. He married Miss Ellen Wagner, a daughter of Mrs. Ellen Wagner in the early 30's. His wife died shortly after the birth of a son, Elmer, who survives his father. Another son, Desmond, or Waldport, is the child of a later marriage. He leaves three granddaughters, Mrs. Ruth Brautle, Mrs. Ray Paekler, of Cove and Mrs. Ruby Clark, of Denver, Colo. The funeral will take place here Friday at 1:30 with burial in the Cove cemetery.

These creatures became extinct at a period which scientists estimate as 100,000 years ago.

The footprints were excavated by J. P. Hester, who reported to the Arizona museum that the tracks appeared to have been made by labyrinthodonts, which were huge, armored animals capable of living either on land or in the sea.

He believes that they lived when fresh-water fish were transforming into the first air-breathing vertebrates, and he reconstructs them as "bizarre beasts that bristled with bony armor, inherited from their fish forefathers."

New Beauty for the New Ford

THE NEW FORD TOWN SEDAN

In the Town Sedan you see a distinguished example of the unbroken sweep of line which adds so much charm to all the new, roomy Ford bodies. Radiator, hood, cowl, lower roof line, fenders, wheels—every point of design reflects the new style and beauty that have been placed within the means of every one. All of the new Ford cars are finished in a variety of colors.

ANOTHER STEP FORWARD

THE introduction of the new Ford bodies has set a high standard of motor car value. From the new deep radiator to the tip of the curving rear fender, there is an unbroken sweep of line—a flowing grace of contour gaining added charm from the rich and attractive colors.

You will take a great pride in the smart style and fresh new beauty of the Ford just as you will find an ever-growing satisfaction in its safety, comfort, speed, acceleration, ease of control, reliability and economy. In appearance, as in mechanical construction, craftsmanship has been put into mass production. New beauty has been added to outstanding performance.

A feature of unusual interest is the use of Rustless Steel for the radiator shell, head lamps, cowl finish strip, hub caps, tail lamp and other exposed metal parts. This steel will not rust, corrode or tarnish and will retain its bright brilliance for the life of the car. Here, as in so many other important details, you see evidence of the enduring quality that has been built into the new Ford.
