Stuffed Sticks—Relatives in the valley have received word that M. M. McKennon of Chickeville, Arkansas had recently suffered a stroke and his condition is not what his friends wish. Mr. and Mrs. Robert French of Cave are at Chickeville at present and the time of their return to their home in the valley has been retarded by Mr. McKennon's illness. Mr. McKennon is a brother of I. L. McKennon of La Grande.

Attends Commission Meeting—L. A. Wright of Union attended a meeting of the State Game Commission in Portland early this week and Gene Simpson, superintendent of the state game farm returned to Union with him on Wednesday. They made a trip to the fish hatchery to look over the grounds with a view to enlarging the game quarters. Quite a number of Chinese pheasants are reared and liberated from the premises each year. Plans were discussed to increase the number of wire pens and to keep all the birds enclosed until time to liberate them. In this way, they would have a check on the number of birds raised. No definite arrangements have been announced as yet.

B. McAnish of the Valoria district is reported as being rather indisposed at his home. Mr. McAnish is quite advanced in years and does not throw off physical illness easily.

New Variety Of Wheat Is Tested In This Locality

At the economic conference, during one of the sessions when the experiments being made with a number of new varieties of wheat were being reviewed, the question of the new cross between 46-Pold and 128 Hybrid in variety produced at the Moro station came up. It is now found that Kelson McKenna of near North Powder obtained 2000 bushels from the station two years ago and the new variety did very well in that locality in fall sown grain.

W. A. Hudson also of North Powder at the same time obtained five sacks of Improved Hard Federation, as is known as the station, as Section No. 31, which is a hybrid wheat and yields one-fourth more than the regular Hard Federation on dry ground, and about the same as Soft Federation on irrigated soil.

It matures in about one hundred days, says Mr. Hudson, which is about three weeks ahead of other varieties which is an object desired as it is generally matured before the hot weather. Mr. Hudson has over 5000 bushels this year to dispose of as seed wheat. The wheat has been certified by the U. S. A. station.

MORE WEATHER FORECASTS MAY BE GIVEN AVIATION—WASHINGTON (AP)—The schedule of broadcasts by the airway radio stations of the department of commerce may soon be rearranged to send weather information every 15 minutes instead of hourly, says P. C. Hingsburg, chief engineer of the airways division. The change is recommended by C. G. Andrews, meteorologist, who accompanied the national air tour in a radio equipped airplane. He reported to the chief of the weather bureau that "for 55 minutes not a sound could be heard over the radio; then, on the hour, five stations came in, all with reasonable clarity, discussing on the weather at the sending station and at other points."

NATURAL GAS IN TRUCKS—MOORPARK, CAL (AP)—Natural gas is hauled here by truck and then distributed in the main lines. It is compressed in the trucks. Zero stands for nothing in mathematics, but on a thermometer it means a lot.
