

OVER THE VALLEY

MABEL E. MOHTON, Valley News Editor
Phonos: Residence, 826-J; Office, Main 37.

Meet Sunday—The "Whar Whar I Head Circle" will meet Sunday afternoon at the home of Mr. and Mrs. Walter M. Pierce at 2 o'clock. During the study of the afternoon, Mrs. Pierce will give two fifteen minute talks, one on "Joy of Poetry" and the other on "The Study of History."

Mumps—Among the new victims of mumps the latest epidemic which is prevalent over the valley is Lyle Leffler of Alsea.

From Hospital—Mrs. Clarence Richards of the Cove who has been a patient in a La Grande hospital where she underwent a mastoid operation has been taken to the home of her relatives, Mr. and Mrs. Walter Richards on the Cove highway. She will remain there as long as frequent trips to La Grande for medical care are necessary.

Return From Valley—Mr. and Mrs. Gilbert Courtwright of the Uverson district who have been on a ten days trip to Western Oregon were expected home today. The major part of the time has been spent in Corvallis where they were called by the illness of Mrs. Courtwright's father.

Dinner Guest—A lovely dinner and an evening of music was enjoyed Wednesday evening at the home of Mr. and Mrs. Paul Knapp and daughter, Lillian, in the Iowa district. At 6:30, Mrs. Knapp served a four course chicken dinner, with the decorations suggestive of the valentine season, and with places arranged for seven. Several hours were spent at music, in which all the company participated. The guests were Mr. and Mrs. Howard Williams and daughter, Miss Helen and Miss Mabel Morton.

Announce Betrothal—The friends in the valley have recently received word of the engagement of Dale Hoskins of Waukegan, Washington and Miss Margaret Holt, a student at Willamette university. The announcement having been made at the Delta Phi banquet last Sunday, Miss Holt is a senior at Willamette and Mr. Hoskins, who was graduated from that institution a few years ago, is taking his medical course at the University of Oregon medical school.

Bad Complication—How would you like to have a back of the flu just when you were trying to get well from having your tonsils out? Neither would we! But that was what Miss Helen Jean Speckhart, daughter of Mr. and Mrs. Herbert Speckhart had to experience the first of this

A SEASONABLE RECIPE

Cocoanut Puffs
One-cupful teaspoon salt.
Three egg-whites.
One cup sugar.
One and one-half cups cocoanut.
One and one-half tablespoons cream-tar.
One-half teaspoon vanilla.
Beat egg whites very stiff. Continue beating while adding sugar and cocoanut gradually. Put in a double boiler and cook twenty minutes. Remove from fire and mix in cream-tar and vanilla gradually. Drop on buttered tins from the tip of a teaspoon. Bake in a slow oven (225 degrees F.) until a light brown in color.

week. She has been with her grandparents, Mr. and Mrs. John Speckhart in La Grande since the operation. Last week and Monday was just not well at all. The coughing, necessitated by the flu, not being very pleasant with the sore throat. She is much better now, and we are glad to report, and was able to go to her home yesterday afternoon.

Home From Hospital—Frank Green who operates Mrs. E. D. Quakill's farm near Alsea has home again following a recent experience in the Grange hospital where he was a patient for the last few months.

Valentine Party—The pupils of the Valeria school gave an interesting valentine program last Friday at the school where Mrs. Merle Howell is the teacher, and several mothers and other visitors were present for it. Miss Ellen Heilts was the chairman of the program which she very cleverly conducted as a radio broadcasting program. A lunch concluded the program of the afternoon.

Have Conference—Dr. Harry S. Hamilton of Boise was in Island City yesterday and held the second quarterly conference at the Island City church.

Quilting—Fifteen members of the Alsea aid had another quilting party at the hall Wednesday and had a very happy time together as they worked. They have been quilting a rather elaborate quilt of the King Tut or double wedding ring pattern.

Organize Agr. Advisory Board For Co. Grange

Representatives from all the subordinate grange organizations in Union county met yesterday at the Federal building with county agricultural agent, Harry G. Avery and state agent leader, F. L. Ballard of Corvallis. During the meeting the county agricultural advisory committee was selected, the organization perfected and officers elected as follows: chairman, Walter M. Pierce; vice chairman, J. A. Nee; secretary, Harry G. Avery.

Forming the membership of this board, which now constitutes the agricultural committee of the Pomona grange of Union county, is a list of patrons, each of whom fills the position of chairman of a different group and the committee of one member from each grange—a member of the executive committee of that organization. These different heads and their particular line are as follows: Lyeestek, Walter M. Pierce, Horticulture, H. H. Weather-spoon.

Marketing, Frank McKennon. Home Economics, Mrs. Ralph Comstock. Agriculture, Eldon Rusch. Wood control, J. A. Gaskill. Poultry, Mrs. Irwin Moss. Dairy, S. T. Baillie. Club work, J. A. Nee. Small fruits, truck crops, Mrs. Homer Wilson. Pigm crops, Hugh Huron.

Mr. Ballard spoke during the afternoon of the possible work of this committee of eleven, outlining the purpose, the scope of the work, etc. Mr. Avery also presented a definite list of projects, which it is hoped, these working groups may very successfully handle.

It is hoped that this board will already be functioning and have something to present at the next meeting of the Pomona grange which will be March 22, with Rock Wall and Cricket Flat granges as hosts.

Prepare For Lambing In Wallowa Co.

According to our correspondent from Wallowa county, spring seems to be in the air and the outlook is good for spring crops, as the frost leaves the ground. Preparations for lambing are being extensively made, that season coming later in Wallowa county than in this valley.

WALLOWA, Ore. (Special)—Preparations for the spring lambing season on the farms of this county are occupying the attention of many of the farmers and larger flock owners at this time. Several of the bands of from 100 to 200 head will start lambing during the latter part of this month. While some of the owners will start during the early part of March, scattering bands have arrived at some of the farms during the past two or three weeks and in most instances are reported to be doing well. Sheep flocks in general are said to be doing well and with plenty of hay for all needs it is highly probable that the greater part of the ewes will be in very good condition for lambing.

Spring-like conditions still describe the weather in this community. During the past week rain has fallen at intervals and together with the mild weather and warm sunshine during the day the remaining snow has vanished rapidly. The ground was frozen to a great depth during the extremely cold weather as is evidenced by the fact that where some farmers who were digging some post holes after the cold weather found the ground to be frozen to a depth of 10 and 11 inches.

The grass which was started some during the late fall has been growing some during the mild weather and should mild conditions continue for the next couple of weeks very good feed will be available for much of the early range in the foothills. Practically the same amount of feeding of livestock is being done on the farms of this community and some are finding it extremely difficult to prevent a considerable waste of feed, especially where feeding is being done on the ground.

The greater portion of the winter-practically bare at this time and except from various farmers say that in all fields the wheat is green and apparently growing. Some state that places in their fields where the stand was not very good last fall, appears to be covered with a good stand of grain at this time. Indications seem to point to a good stand of grain for the start of the coming year's crop barring any unusual which might occur before the winter set-in has closed. Due to the fact that not all of the frost has been drawn from the soil the greater part of the melting snow which has been going during the warm spell has run off.

HIGH COW MAKES OVER 84 POUNDS OF BUTTERFAT

A six year old cow, past Jersey and part Holstein, from the herd of Ernest Kohler, was the high cow during the month of January in the Union county Dairy Herd Improvement association according to the report recently filed by Hans Sellers, the official tester. The cow "Star" produced 1652 pounds of milk and 84.1 pounds of butterfat.

The high herds for the month (dry cows excluded) were as follows: Herds of over 20 cows, C. P. Edvalson, 25 grade Holsteins, which averaged 594.1 pounds of milk and 37.32 pounds of butterfat. In herds of between 12 and 20 cows, John Rogers' 15 head of mixed breeds averaged 791.1 pounds of milk and 34.1 pounds of fat. In the smaller herds, those of under 12 cows, Ernest Bell's section registered and grade Jerseys had an average production of 724.9 pounds of milk and 43.1 pounds of butterfat.

The number of herds on test during the month was 43, with 792 cows enrolled of which 139 were dry. The total production of milk was 299,623 pounds of milk and 16,821 pounds of fat. There were 97 40-pound cows. The average production was 36.17 pounds milk and 21.64 pounds fat.

Roll of Honor Cows Producing More Than 70 Lbs. Fat

- Ernest Kohler's Jersey and Holstein, Star, 1652 milk, 84.1 butterfat.
- Ernest Bell's, Jersey, Pat, 1271 milk, 71.2 butterfat.
- Archie Conley's Jersey, Peggie, 1172 milk, 70.3 butterfat.
- Class A:**
- John Rogers, Blossom, grade Holstein, 1717 milk, 68.7 butterfat.
- C. P. Edvalson, Fern, Holstein, 1441 milk, 67.7 butterfat.
- Charles Doffias, Pet, grade Jersey, 1271 milk, 66.3 butterfat.
- Henry Price, Charm, grade Jersey, 1954 milk, 61.1 butterfat.
- John Rogers, Tamrock, grade Holstein, 1491 milk, 57.4 butterfat.
- Class B:**
- Walter Vogel, Roseland, grade Jersey, 1429 milk, 62.9 butterfat.
- C. Y. Beale, No. 2, grade Jersey, 1148 milk, 61.6 butterfat.
- Ray German, Cherry, grade Jersey, 1226 milk, 55.4 butterfat.
- S. K. West, Carrie, grade Jersey, 1131 milk, 62 butterfat.
- Walter Vogel, Fern, grade Jersey, 1625 milk, 48.1 butterfat.
- Class C:**
- Charles DeHans, Gypsy, grade Jersey, 1262 milk, 65.6 butterfat.
- Ray Baum, Bonnie, grade Jersey, 992 milk, 62.3 butterfat.
- Frank McKinnis, Alta, grade Jersey, 1007 milk, 48.3 butterfat.
- A. L. Becker, Dina, grade Jersey, 921 milk, 45 butterfat.
- C. P. Edvalson, Snowball, grade Holstein, 1231 milk, 43.1 butterfat.

GOLDEN SAND USED TO PAVE COUNTY ROADS

ANDERSON, Ind., Feb. 20 (AP)—Residents of Madison county today considered claiming one of the qualities frequently attributed to paradise—roadways paved with gold.

Reports emanated from Chesterfield, a village five miles east of Anderson, that sand from the farm of Cecil Bronnberg, which has been used in construction of several county highways, has assayed more than 450 to the ton. The test was made after William Cunningham thought he detected a golden sparkle in sand he was using in cement blocks.

Village residents pressed into service baskets, bags and wash tubs to carry the soil to their homes. The "rush" was interrupted, however, when Bronnberg placed guards about his property.

EARLY MATURING CORN NOW READY FOR FARMERS

NEW HAVEN, Conn. (AP)—Canada-Leaming, a new crossed corn that will elude frost and costly early frosts, will be on the market this spring for the first time.

Developing the cross was a process of years. It was accomplished by Dr. Donald P. Jones of the Connecticut agricultural experiment station by inbreeding and crossing early maturing Canada yellow flint with the heavy producing Leaming dent.

The new variety has hard, bright, amber kernels and matures in 100 to 110 days. Often it may be cut and shocked before that. It produces a tall, straight, broad stalk, eight to nine feet high. In a 1927 test it produced 66.5 bushels to the acre, five more than its nearest competitor.

BOVINE TUBERCULOSIS CONQUERED IN MICHIGAN

LANSING, Mich. (AP)—After nine years of fighting, Michigan claims to be the first major dairy state to conquer bovine tuberculosis.

Only 6660 cattle out of 1,500,000 remain on Michigan's testing schedule. Five federal veterinarians who conducted the work, have been transferred to other states where the tide of battle has been less favorable.

The total cost of the nine-year campaign, including indemnities paid to farmers whose cattle have been condemned, has been \$4,626,028. The value of dairy herds is estimated to have increased by \$15,000,000.

Golf Balls From Britain

WASHINGTON (AP)—Department of commerce (three show that all except 156 of 2,550,327 golf balls imported in 1929 came from the United Kingdom.
