bill providing for government operation of Muscle Shoals. One of the reasons he gave the former president, Gray said, was if the bill were signed it would "destroy Edward A. O'Neal, head of the Alabama farm bureau federation." The bill received a pocket veto.

Gray asserted he did not know what effect his appeal for O'Neal had with President Coolidge, adding that the former had "never voted the republican ticket in his life."

It also was brought out through a letter from Gray to O'Neal dated June 1, 1929, that Gray intended to provide Senator Walcott, republican, Connecticut, with material for a minority report against the Norris Bill, which had been introduced.

650 Model A Ford cars in this territory. The silent system of selling is incorporated in all of the merchandising departments, where replacement parts and accessories are well displayed with price tickets informing the customer of the exact price of various articles. A window display that faces into the service department is a new feature not often seen in automotive plants. This window is used to display the seasonable articles that a motorist may require, the thought behind this arrangement being that many motorists enter and leave the service department without entering the merchandising departments.

Another noticeable feature, which appears to be a decided advantage is the centralized control of cash, with the cashier located practically in the center of all the various operations necessary for the conducting of business of this kind. Under this plan all money goes through one cash register and is an added convenience to the customer due to its centralized location.

The snow room and merchandising department has been newly decorated and has a very attractive appearance and the entire set-up gives one the appearance of a well ordered and business-like store.

The service department has also been completely remodeled, the customer entering the service door in the middle of the building on Adams ave., and drives through a U-shaped hole to the exit on Adams ave.

PERKINS MOTOR CO. REMODELED
Office is Rearranged—Several Other Improvements Added to Plant
On first entrance into the remodeled plant of the Perkins Motor Company of La Grande the great amount of floor space available for display purposes is noticeable, displaying to a greater advantage the new Ford models. The office has been rearranged into better organized positions with the bookkeeping department, managers office and merchandising department very accessible.

Another outstanding feature of the remodeled store is the attractive new steel display cases and steel bins for the storing of automotive parts. This department is much larger than formerly, Mr. Perkins says, due to the need for space for the large stock of Model A parts necessary for servicing

WOMAN GOES TO GALLOWS TODAY (Continued from Page One)

Tucson where she told authorities that Mathis had given her the automobile just before he left the ranch on a long trip. She emphatically denied knowledge of Mathis' whereabouts, and authorities were unable to connect her with the rancher's disappearance.

With the finding of the body, however, a formal murder charge was placed against the woman.

She testified at her trial that a 19-year-old youth known to her only as "Jack" had committed the actual slaying, and that she ran away with "Jack." During her trial and since, she has received letters purporting to be signed by Jack, asserting that she was not guilty of the crime. Efforts of authorities to locate the mysterious youth, however, were unsuccessful and he did not come forward to help clear Mrs. Dugan of the crime.

Following her conviction and sentencing to death, an appeal, which was denied was made to the state board of pardons and paroles asking that the sentence be commuted to life imprisonment. A subsequent plea to the board, after a superior court jury had found her sane as the result of a sanity hearing, also was denied.

arranged and made accessible for the 20 some mechanics and service men that are kept busy on this floor.

In fact the entire service department has been reorganized and speeded up. The only department remaining in its same place as heretofore being the tire repair and mounting department, which remains between the entrance and exit in the center of the service department.

Directly opposite the rest office on Fourth street is a new room made possible by the new arrangement, which is a used car show room with floor space for 12 cars. This gives sufficient room for the display of a representative stock of the used cars, which this company takes in in trade on the sale of new Ford automobiles.

The basement is the same size as the upper floor and is used for additional used cars as well as storage of new Ford automobiles awaiting delivery.

Contract has been let for the complete redecoration of the exterior of the building. When this has been finished the Perkins Motor company feel that they will have an automobile plant of which they can be justly proud.

"figure-heads," one of the plays, requires for its characters a type of costume favored in the middle ages by ladies and gentlemen of noble blood.

Sets for the plays are of radically different types. A log cabin of the negro quarter of a southern village, is the scene of "The Last of the Lowries," contrasting radically with the type of set required by the other plays.
