WHEAT CLOSES IRREGULAR IN CHICAGO MART

CHICAGO, Mar. 13 (AP)—Wheat averaged lower in price during the late dealings today after having averaged higher earlier.

Permanent selling out of May delivery holdings had a general bearish effect on wheat values, notwithstanding that government-sponsored agencies were credited with giving the market support when set-backs became material.

Considerable stop loss selling which developed in the corn market late carried May and July corn down to below any price level touched this season.

Wheat closed irregular, ranging from 1 1/2c lower to 3/4c higher, compared with yesterday's finish. Corn closed 5/8-1 1/4c lower, unchanged to 1/4c higher, and provisions unchanged to 1/2c off.

CHICAGO, Mar. 13 (AP)—Charles A. Comiskey, owner of the Chicago White Sox, apparently is willing to come more than half way in his dealings with Charles Arthur Shires.

The Old Roman has offered the shy one \$7500 a season to play first base for the Sox, and is ready to add a bonus at the end of the campaign if Arthur will conduct himself becomingly, both on and off the field.

However, in a letter written to Shires yesterday, Comiskey insisted the player promise to make no displays of temperment.

Fido Steps Out In Vivid Colors

LONDON (AP)—Bright color forms the keynote of spring fashions for Fido in London.

The new canine jackets seen at London's latest dog show were of decidedly brilliant hue, complete with pockets wherein reposed tiny handkerchiefs bearing the pups' initials.

Bows will not be worn this season, except by the very youngest flapper puppies.

The military note was particularly dominant for the terriers, most of them sporting scarlet and blue jackets with gold braid.

Prices of Eggs And Butter Are Barely Steady

Following the fruit and vegetable situation, the Portland bureau of the United States department of agriculture says:

"Apple and potato markets continue slow and rather lifeless, notwithstanding the rather light supplies of best storage stocks. Although dealers believe the end of home-grown supplies—especially of apples—is now in sight, the liberal offerings of this class of stock from the myriad of minor home-storages has had a depressing effect on market values of these commodities.

"Orange prices have shown slight advances daily, during the last five days.

"Lettuce continues its slight upward trend in shipping-point prices. This raise has been reflected in sales to jobbers, but retailers' purchases were mostly at no higher levels.

"Celery arrivals show an extremely wide variation in quality, and prices for stock from the same central California district range from \$2.50 to \$5.75 per crate."
