Keep Your Nostrils as Clean as Your Teeth

Is "ALMOST CLEAN"

clean enough for the baby's bottles?

WHEN you wash the baby's things, clean the vegetables, scour the bathtub or wash the dishes, you don't give them just a careless surface cleaning. Then why should you with rugs and carpets?

Floor coverings can be clean from top to bottom—will be, if you clean them with a Hoover. It removes more dirt per minute than any other cleaner—gives faster, deeper cleaning with less expenditure of human energy—because it gets out dirt that other cleaning methods never reach!

Deep in your rug is embedded greas-caked grit which suction alone simply cannot remove. It takes the deep-beating action of Positive Agitation to shake loose this packed-in dirt and dance it to the surface to be suctioned away. Only when it is removed, can you call your rugs wholly clean.

Ask us for a free trial or home demonstration of the Hoover and its efficient dusting tools. Two Hoover models, only \$6.25 down, balance monthly, liberal allowance for your old cleaner.
