Return Today—Dr. A. M. Moore and not Dr. C. R. Moore, who has not been out of the city this week, will return today from Portland where he was called by the death of his grandfather. The error was due to a confusion of the initials of the two doctors.

Several Days Trip—Mr. and Mrs. H. E. Dixon returned yesterday afternoon from Portland, Redmond and points en route where Mr. Dixon went on an official trip as grand chancellor of Oregon Knights of Pythias. On the return trip they encountered a severe hailstorm at the top of the hill. He attended meetings in Redmond, Portland and Hood River.

To Walla Walla—Beth Fleener and Wilma Smith visited in Walla Walla last week-end with Irene Campbell, formerly of La Grande who is now an employee of the Skaggs' stores in Walla Walla. While there they saw Mr. and Mrs. Lloyd McLeod, now of Portland, former residents of this city.

Weekend Trip—Misses Arlene Byrd and Helen Knotts, both students at the Normal school, plan to spend this coming weekend at home in Pilot Rock.

Date "Boycott"—North Africa, the home of late culture, raises few of the choicest varieties, the explanation being that Arab rulers used to appropriate the choice fruit for their banquets, so that the growers stopped producing the too desirable dates.

Bertillon Measurements—The Bertillon system consists of simple and exact measurements of certain parts of the body. The measurements are taken with callipers and include the height, standing and sitting; reach of outstretched arms; length and width of right ear; and the length of the left foot, forearm, middle and little fingers.

Nerve Impulses—The speed of nerve impulses is 404 feet per second. If an idea is complicated enough to take 100 nerve messages from one side of the brain to the other, the thought could be completed in less than one-tenth of a second.

Cycle of Thought—Just as we find a mathematical rule at the bottom of many bodily movements, just so thought may be supposed to have its regular cycles. Even such a thought comes around periodically, in its turn.—Gilver Wendell Holmes.

The Pastor Says:—The college is the second generation of the church. If we are so glad to complete each of our years that we celebrate the occasion, why so reluctant to complete the sum of them all?—John Andrew Holmes.

Well Answered—When it was complained of a statesman that he was too young he answered, "That is an objection the force of which will be weakened every day I live."

Those Comedy Horns—Every time the matter is taken up of a nation-wide anti-noise campaign, some one comes out with a louder and funnier automobile horn.—Detroit News.

Will Be Presented at Court—Nancy Hoyt (left), niece of Ambassador Charles G. Dawes, will be presented at the court of St. James. She sailed from New York for England with her mother, Mrs. Harry B. Hoyt, sister of Dawes.

Atmosphere and Air—If all space were full of stationary air the motion of the earth through it at the rate of 19 miles a second would produce the same effect as if the earth were standing still and the air moving at the rate of 19 miles a second. But there is no air in interplanetary space. The atmosphere of the earth is a part of the earth and moves along with the solid part under the action of the same forces that keep the solid part in motion.

Not Legal Punishment—The practice of flogging and feathering as a punishment, is as old as the Crusades. The earliest mention of the punishment occurs in the orders of Richard Coeur de Lion issued to his navy on starting for the Holy Land in 1191. His critics think it probable that this punishment was never regarded as legalized, but was always a type of mob violence.

Eskimo Vocabulary—The Eskimos speak one language from easternmost Greenland to farthest Alaska, as do also a few hundred people in Siberia, on the other side of the Bering straits. In order to get along reasonably well, an Eskimo must have at the tip of his tongue a much larger active vocabulary than that of an average business man who speaks English.

Robin Hood's Forest Gone—Sherwood forest is the name given to a stretch of hilly country in the west of Nottinghamshire, England, between Nottingham and Worksop, about 25 miles from north to south and 6 to 8 miles from east to west. It was formerly a royal hunting forest and the traditional scene of many of the exploits of Robin Hood and his followers. It is now almost wholly denuded and is occupied by parks and farms.

Police Platoons—The platoon system of police forces is a system of distributing the police force of a city and of regulating the hours on duty of each policeman so that the city will be at all times equitably protected. When the men work in shifts of twelve hours, it is called the two-platoon system; when in shifts of eight hours, three-platoon system.

Telephonic Term—Phantom circuit is the name given to the scheme which permits a telephonic talking current to be superimposed on two pairs of wires, each of which simultaneously transmits a telephonic conversation. The third, or phantom circuit, is obtained by connecting the two pairs of wires in a particular way. After it is properly arranged, three separate, noninterfering conversations may be carried at the same time.

Name for Boy or Girl—Evelyn is both a girl's name and a boy's. In America boys are seldom called Evelyn, but in England they often bear this name.
