*An investigation conducted by the Association of Life Insurance Medical Directors and the Actuarial Society of America revealed the fact that the death rate increases practically 1% for every pound of excess weight carried between the ages of 40 and 44 years. In other words, a man 40 pounds overweight at this age has only 60% of the expectancy of life of a man of normal weight. We do not represent that smoking Lucky Strike Cigarettes will bring modern figures or cause the reduction of flesh. We do declare that when tempted to do yourself too well, if you will "Reach for a Lucky instead," you will thus avoid over-indulgence in things that cause excess weight and, by avoiding over-indulgence, maintain a modern, graceful form.
