A NEEDED EXHORTATION — I beseech you therefore, brethren, by the mercies of God, that ye present your bodies a living sacrifice, holy, acceptable unto God, which is your reasonable service.—Romans 12:1.

The man who doesn't mind his own business often finds that somebody else will.

Some folks are so smart they keep out of trouble, and their smartness gets others into it.

What is the value in votes in 1932 of a Hoover attendance at the country church in Fishing Valley?

As if to answer the dismal forecast of Prof. Irving Fisher that the gold standard will collapse due to a falling off in the gold production, Prof. Yokohori, of the Japanese Imperial University, reports discovery of incalculable gold deposits in Formosa. Scientists have a habit of doing that. After one proves the exhaustion or end of something or other another discovers a new supply or a substitute, packing the world's worries away again. There have been the same sort of "exhaustion" scares about coal, oil, iron, food and land. But always new deposits or substitutes or some other way out are found. There is no cause to worry about tomorrow's supply of food, metals and fuel. There is still plenty of the earth's surface, and still more of its sub-surface, untapped and about the bottom of the seas we know little. And the ability of science to produce substitutes when nature fails is not to be discounted.

THE 74-CENT DOLLAR

Since the war the familiar phrase was the "60-cent dollar." The implication was that due to rising commodity prices the post-war dollar would buy only 60 cents worth at the pre-war price level.

Measuring the 1930 dollar with the same yard stick it is a 74-cent dollar, the recent downward readjustment of prices conferring upon the consumer this boon. On the basis of the 1926 price level it is a 113 1/4-cent dollar.

This rise in the value of the dollar represents more relief for the buyer than the 14-cent difference indicates, for when the phrase "the 60-cent dollar" was invented wages and salaries had not kept pace with the mounting commodity prices nor has income fallen today in proportion to the drop in prices.

The perfect state, from the consumer's viewpoint, would be a condition forcing up wages and forcing down prices, but perfection is unattainable. So the next best thing is income stability accompanied by receding commodity prices, which is the situation today.

Lower commodity prices are encouraging increased consumption of all goods, which will mean increased production and less unemployment. But once all the wheels are turning again and the days of forced idleness are ended that post-war phrase, "the 60-cent dollar" may become familiar again.

TOLL OF TWISTERS

Tornadoes, the earth's most sudden, brief and destructive storms, kill in the United States every year an average of 310 people by about 130 swift strokes from the heavens.

The twisters occur almost exclusively in the United States and Australia, and are confined here almost entirely to the Mid-West and to the months of March, April, May and June. But they have a way of striking in unexpected places and at unexpected times with alarming frequency.

A tornado is a whirling vortex or funnel of winds reaching high up into the sky. It travels from 25 to 40 miles an hour, and the velocity of its whirling winds is estimated at from 400 to 500 miles an hour.

Those sections of the country and those countries spared this natural menace owe their freedom from its terror and destructiveness to the absence of peculiar atmospheric and topographical condition. Eastern Oregon is especially fortunate in this.

No weapon of nature is more feared than the tornado, yet even in the most threatened tornado areas houses stand much less danger of being damaged by twisters than of being struck by lightning. The reason the storms are becoming more destructive each year is because of the development and growing population of the tornado country.

Wallowa Man To Exhibit Jerseys At Stock Show

By Edna Renfrow Hunter
WALLOWA, Ore. (Special)—E. K. Hunter is busy this week getting his show herd of Jerseys ready to ship to Union, Wednesday, for the Eastern Oregon Livestock show.

Mr. and Mrs. Bruce Cox motored to La Grande Saturday evening to meet their son, Reid, who returned on the night train from Corvallis where he is a student at Oregon State college.

Mr. and Mrs. Earl Rogers, of La Grande, came to Wallowa Saturday for a visit of a few days and to look after property interests here. They are at the home of Mrs. Ed. Fields, mother of Mrs. Rogers. The Rogers family formerly lived here.

Dr. and Mrs. P. E. Fisher and small son, Gordon are here from their home in Pomona, Cal., for a visit with Mrs. Fisher's parents, Mr. and Mrs. Herschel McKinzie. Mrs. Fisher, who was for McKinzie, was a former teacher in the Wallowa school.

Mr. and Mrs. A. B. Antonio, of Enterprise, were dinner guests of Mr. and Mrs. Edwin Marvin Thursday evening.

H. L. Browning, salesman of La Grande, was the victim of rather an expensive joke recently in Wallowa. His gasoline and radiator caps were exchanged while his car was parked on Main street. When he left town late in the evening, expecting to reach La Grande in time to send off his day's order on the night train, he reached Wallowa canyon and his car came to a halt. Not being able to start it, he went back to town for a mechanic and was so delayed that he missed the train. Mr. Browning took the joke good naturedly but says he expects to get even when an opportunity presents itself and he is watching for that opportunity.

Mr. and Mrs. Jesse Kimm and small son arrived in Wallowa Saturday from their home in Vancouver, Wash. for a week's visit with Mrs. Kimm's parents, Mr. and Mrs. Hal Yaught.

Lewis Carpenter has moved his family to Enterprise. Mr. Knight has the contract for hauling the mail between Enterprise and Florn.

A basket supper and social evening was given by the Knights of Pythias Saturday night in their

KING CAROL MAY RETURN TO HIS WIFE

(Continued from Page One)
resuming his consultations with political leaders.

On his return today the king was given an enthusiastic reception by the populace.

EX-COMPANION HEART BROKEN
LONDON, June 9 (AP)—Mme. Margie Lapensee, former companion of Carol during his exile in France, is reported by the Inter-lake correspondent of the Sunday Chronicle as taking her parting from Carol very much to heart.

"Ours is a union of love," the correspondent quoted her as saying. "There is deep pain in every thought of final separation. I am an exile, an outcast, expropriated from the land of my birth, the land I love. Carol is my only happiness. And now I shall see him no more. My grief is almost too much for me to bear."

REAL ESTATE HEADS VISIT LOCAL BOARD
(Continued from Page One)

Curry, president of the chamber of commerce, and J. A. Benham, realty board president, all extended a welcome to the visiting officials. Mr. Benham presided and called upon Mr. Fay to introduce President Irwin.

"AREN'T WE ALL" STAGING TONIGHT
(Continued from Page One)

Miss Ruth Hayes left for Portland Saturday, where she will attend grand chapter, Order of Eastern Star, as a delegate from Jes-

P. Nurmi Smashes Six-Mile Record
LONDON, June 9 (AP)—Paavo Nurmi, the famous flying Finn who holds more track records than any other man, smashed the world's mark for the six-mile run in a race at Stamford Bridge today. He covered the distance in 29 minutes, 36 3/5 seconds compared to the record of 29:26 2/5, set by Alfred Schrubbs of England, which has stood since 1904.

Running in a handicap event, Nurmi finished third behind opponents to whom he had conceded more than three minute start.

Mrs. Morrow Will Go To Visit Anne

NEWARK, N. J., June 9 (AP)—Because a birth is expected in the family of Col. and Mrs. Charles A. Lindbergh, Mrs. Dwight W. Morrow, mother of Mrs. Lindbergh, will conclude tomorrow night her activities in her husband's campaign for republican nomination as United States senator.

Her concluding address will be by radio from station WOR. Instead of going to the New York station of that station, Mrs. Morrow will face the microphone at Newark.

BUFFALO PERIL WOMAN IN FORCED LANDING
NAPLES (AP)—Sofia de Mikulski, Polish aviatrix, was never swayed by her flying instructor what to do when menaced by wild buffalo after making a forced landing.

Even the boy who brings in the jug and glass of water, salutes the speaker before he deposits his burden on the rostrum.

When Homes Are Prettiest and Most Envied

When you see an attractive house and pretty yard, do you see the years of careful planning, the months of systematic savings behind it?

La Grande is becoming known for its charming homes, its beautiful yards. Yet they haven't just "happened." They have been worked for, and planned for—with sympathetic and friendly counsel of a banker probably playing a prominent part in the success of the original idea.

You can start now with your plans for just such a home. The financial requirements, probable costs, suggestions for budgeting savings, experienced help in securing first mortgage loans—these are services your banker will gladly render.
