

# OVER THE VALLEY

Mabel E. Morton, Valley News Editor  
Phone: Residence, Main 966; Office, Main 27

**Be in Charge of the Spraying for the Cherry Fruit Fly** were announced yesterday by the state officials. These men have full authority to enforce the law in regard to this work and it is hoped that they may have 100 per cent cooperation in this concerted effort to have the quarantine lifted. The officials are Guy Barker of Coos, W. E. Blacett, La Grande, and Arthur Furman of Imbler.

## County 4-H Club Members Take the Money & Ribbons

*(Continued from Page Nine)*

**Go on Trip**—Mrs. Maude Johnson and her children, Sylvia and Frank, formerly of Pleasant Grove, have started in their car on an auto trip which will cover the next few weeks. They will visit with relatives and friends and take in the sights in Southern Idaho and down into Nevada.

**Have New Car**—Mr. and Mrs. Barr Stark and family of north of Summerville, are the owners of another new Dodge sedan the fourth Dodge which they have owned. Since they have no immediate need for it, they traded in their farm truck on the new car.

**Holstein Meets**—A. J. Mathiesen, field representative for the Holstein-Presidian association spent yesterday in this valley and had a busy day looking after the interests of this breed of dairy cattle which is so prominent in this valley. A meeting of the Holstein Club and the Jersey and Holstein Club was held yesterday at the home of Ralph Comstock up Mill Creek canyon. Mr. Mathiesen gave a

**539 Lambs Are Shipped East Thru Co. Pool**

The first shipment of lambs through the recently formed county lamb pool was made Tuesday of this week and consisted of two car loads of 539 head. The lambs were sent to Omaha and were accompanied by Hans Seifors, former county ewe tester. Omaha offers the best market for fat lambs, according to officials. Only the best lambs are shipped, the sorting being done very carefully at this end of the line before the stock is loaded.

Another shipment is being arranged for next Monday which will probably consist of three car loads from this county and also some from the Wallawa county association. This is the beginning of what will, doubtless, be a very large shipment of the fat lambs from this county through this association, as the majority of sheep raisers in this valley joined the pool at the time of its organization.

Mississippi is expected to purchase 352,950 motor vehicle license tags for the year 1931. Twenty-five sub-motor vehicle tags will be included.

## CINEMA ACTRESS WEDS BEN LYON

Debe Daniels, dark-eyed heroine of the films, and Ben Lyon, screen player, after their marriage ceremony, just before they left Los Angeles on their honeymoon.

## Sport Slants

by ALAN J. GOULD

rooms and had booze at that. writes Charley Padlock in California. has been the prime factor in what he describes as the decadence of American post-war athletics, citing the dwindling first place scores by Americans in the last three Olympics and expressing the conviction that present-day performances (in track and field especially) do not compare with those of two or three decades ago.

Good-time Charley is as far from the actual facts. It seems from his corner, as he was from finishing anywhere in the last Olympic 200 meters event at Amsterdam.

A variety of causes contributed to Yankee reverses in the Olympic games, ranging all the way from bad management and over-confidence, plus the fact that world competition has become keener.

If American boys have failed to compare athletes like Douglas Lowe, Paavo Nurmi and Willis Hoge on the Olympic tracks, they hardly can be blamed, since the foot-racers have yet to appear with the ability to beat these runners at their best.

Moreover, if there is any decadence in the Yankee ability to run faster, jump higher or throw the various athletic implements farther, it has not been manifest this spring in the greatest college track and field season of all time.

With the exception of the middle distance running, in which there has unquestionably been a decline, world's records have been broken and re-broken by American athletes in almost every other event within the past few years.

The athlete who gets anywhere near the top in this age of keen competition, no matter what the sport, has no chance to keep up with the pack if he over-indulges—whether it is in food, liquor or late hours. Now and then a Jim Thorpe on the warpath or a Maxey Rosenbloom, training on night-club life, somehow manages to possess the super-endurance to burn both ends of the candle but they are rarities.

The height of indulgence for Southern California's champion track and field team was reached at Cambridge, where in celebration of their triumph in the I. C. A. A. A. games they sat down to a big supper, topped off by a double helping of strawberry and vanilla ice cream.

And when the Trojans got to New York the following day, en route to another victory at Chicago, they went for a wild spree at Coney Island.

I happened to ask one of the star college sprinters about the attitude toward drinking.

"I guess some of the fellows will take a drink now and then," he responded, "but a guy who isn't smart enough to know how to take care of himself isn't going to get anywhere. As for me, I think one cocktail would knock me out."

## Conditions in Umatilla Farm Area Promising

PENDLETON, Ore. (AP)—Agricultural conditions along with sheep and livestock in Umatilla county look good this year and some good crops are in prospect, although wool men have not been receiving the best prices possible.

When in general over the county has been benefited heavily by general rains during the spring period and some sectors of the wheat belt will cut a larger crop than last year. In the Pilot Rock district and reservation regions the stand is excellent. Other districts report good stands.

In all about a quarter million acres have been planted and a near normal crop is expected. In the west end of the county the asparagus crop was good this year and fairly good returns were realized by growers.

The alfalfa cutting has not been so heavy for the first year that the moisture of the past several weeks may be a boon to second and third cuttings. The fruit districts of the east end of Umatilla county look for a near normal crop although the rains might have affected the crop some.

Several thousand acres of summer-fallow wheat land have again been planted to beans by a produce company which started the experiment in the county last year and a good return is expected as the beans seem to thrive on wheat land.

An average crop of Weston potatoes is now estimated.

Livestock and sheep conditions were reported good a week ago

## Famous Halfback Of 1909-10-11 Dead

SEATTLE, June 20 (AP)—There was another vacant space in the ranks of the University of Washington's football heroes today.

Walter Wand, left halfback on Gil "Dobie's" machines of 1909, '10 and '11, is dead. A few close friends attended his private funeral yesterday.

To those who glory in Dobbie's triumphs at Washington, Wand's name means as much as that of Chuck Carroll or George Wilson, the university's modern heroes.

He played alongside of such mighties as "Doc" Coyle, Warren and Polly Grimm, Max Bakina, Mel Michelstone, Pete Teatimer and others. He was a graduate in law.

"Watered Stock"

When the face value of the stock issued is greater than the property value represented by it at the time of its issue, it is called watered stock. It will not increase the property value of a corporation to increase its stock unless the same is exchanged for real value.

## Associations May Merge, is Report

ABERDEEN, Wash. (AP)—Eventual consolidation of the Redwood Empire association of California with the newly formed Pacific Coast Empire association of Washington and Oregon is the aim of the latter organization, Carl E. Morok, Aberdeen, president, said.

Morok believes that a united organization will be able within a few years, to offer the tourists the greatest scenic highway in the nation.

The new association would present the Red, Roosevelt and Olympic highways in California, Oregon and Washington. The Roosevelt and Olympic highways, which are both expected to be open for travel in the autumn of 1931, are coastal routes.

Robert Robinson, Astoria, Ore., has been named executive secretary of the Pacific Empire association to succeed Lew Merrick, who died recently. Activity of the organization this year will center around a campaign for early completion of the coastal highways. A Pacific Northwest and nationwide advertising campaign for 1931 is planned.

## Bootlegging Green Prunes Combated

WALLA WALLA (AP)—Walla Walla valley prune growers, whose products, next to wheat, return the largest income in this district, are hoping efforts to prevent "bootlegging" of green prunes will succeed through recently announced federal grading regulations.

Oregon has adopted grades that, it is believed, will prevent shipments of green prunes, Washington has yet to adopt the grades.

Peddlers are using means of adopting the grades here. A meeting of prune growers is sought to discuss the possibility of adopting the grades.

## NO 'HOPPERS WILL TROUBLE TULE FARMERS

KLAMATH FALLS, Ore. (AP)—For the first time in many years the farmers of the "bread basket of the Klamath empire," the famous Tule Lake reclamation area in southern Klamath and northern Siskiyou and Modoc counties of California, will not be troubled by grasshoppers.

Eradiation of the blight after three years of intensive poisoning will save between \$50,000 and \$100,000 a year to the farmers in that area.

For three years habits of the grasshoppers were watched and in 1928 more than a million pounds of poisoning was spread over the ground at hatching time. A check of the field covering a five mile front in 1928, which was the worst year, showed a strip of grasshoppers five miles long and 500 feet deep with 800 dead hoppers to the square foot. More than 1,000 acres of crops were ruined that year. Loss in 1929 was less than 100 acres and this year it will be nothing. C. A. Henderson, county agent, said.

In 1928 more than \$17,000 was spent to kill grass hoppers and at one time there were 50 men employed by the county, the reclamation bureau and the land owner. In 1929 about \$4,000 was spent in that area and this year less than \$100 will have been spent.

## GLORIA IN THE SWIM

**Solar Surgery**

From the earliest time sunlight has been considered an important aid in the preservation of health. The ancient Greeks and Romans exposed their naked bodies to the sun in the open air to recruit mental and physical energy. Exposure to the sun's rays was also adopted by the physicians of those times as a remedy for many ailments, especially dropsy, inflammation of the kidneys and paralysis.

**Denmark Lures Tourist**

Denmark, "The Land of the Sea," is one of the sunniest of the northern kingdoms of Europe, but its geographical position, its extensive coast line—it is almost surrounded by water—its invigorating climate, and its ancient historical traditions coupled with a progressive modernity, make it one of the most attractive of all destinations of the tourist in Europe.

**Almost Dead Language**

The language of the pharaohs ceased to be officially used after the conquest of Egypt by Alexander the Great, 331 B. C. Being supplanted by Greek, which was in turn superseded by Arabic, 1,000 years later, after the Moslem invasion. The Egyptian language lingered on among the people until the Fourteenth century, and is now only in the liturgy of the Christian Coptic church.

**"Specie" and "Species"**

Specie refers to gold, silver or other metal money bearing the official stamp of the country issuing it. Species is a classificatory term subordinate to a genus distinguishing a particular group of animals or plants.
