Women of Walla Walla Golf Club Hostess to Team

The women members of the Walla Walla Golf club were hostesses yesterday noon at a charming luncheon to the golf team of women players from La Grande and Baker, who participated in a tournament there. One round was played in the morning and another in the afternoon. This is just half a tournament and the return matches will be played in La Grande this September.

Luncheon was served at tables with pretty covers in pastel shades colored with daisies and larkspur in colors of wistaria and pink. The tables were set on the sunporch of the clubhouse.

Those driving to Walla Walla were: Mrs. Herman Stegert, Mrs. L. K. Kinzel, Mrs. A. W. Nelson, Mrs. Chase Bohnenkamp, Mrs. Charles Reynolds, Mrs. John Thel-

Delightful Tea Given In Honor Of The Hertzogs

One of the most important events of the month was a delightful tea given in honor of Mrs. W. H. Hertzog, wife of the Rev. Mr. Hertzog who is the new pastor of the First Methodist Episcopal church, at which Miss Blanche Clark was hostess at her home on Oak street from the hours of 2:30 to 5:30 Tuesday afternoon. Mrs. Hertzog and Miss Clark were college friends and classmates of Baker university at Baldwin, Kan., of which Mrs. Hertzog is a graduate.

Eighty-five friends divided into different groups called during the afternoon. The first period members of the Women's Home and Foreign Missionary societies and the Methodist Ladies Aid called; in the second period, wives of the ministers and a few members of other churches of the city; and in the last hour, members of the Young Women's Educational auxiliary.

"Oh, you cruel thing! Hurry and cook it, I'm starved."

Mary-Elizabeth Club In Meeting

All the members of the Mary-Elizabeth club met Thursday for a pleasant afternoon at the home of Mrs. Nellie Robertson on Adams avenue. Games and sewing were diversions, and later a two-course luncheon was served at a table attractively centered with roses.

The birthday of Mrs. S. S. Nye was observed with a birthday cake and the club presented her with a lovely gift. Due to this being the last meeting until September, Mrs. Nye's anniversary which isn't July 14 was observed yesterday. Mrs. Eva Wissler will be the next hostess, September 19.

Mrs. Frank Reavis Hostess at Party

Mrs. Frank Reavis was hostess at her home last night at a delightful dinner and slumber party for her niece, Miss Bernice Smith. Cards were a diversion of the evening. Those present were: Miss Ann Froese, Miss Anna Hayes, Miss Marjorie Walbridge, Miss Margaret Baker, Miss Kathryn Peetz, of Pendleton and Miss Bernice Smith.

Friends Guests At Pinochle Party

Mrs. H. G. Hale entertained a number of her friends Wednesday evening at her home with two tables of pinochle. The evening was pleasantly spent with high score in cards going to Mrs. H. E. Stiller and consolation going to Mrs. Ralph Worley.

Polite blunts were used about the Hale home in decorating and after the cards, a delicious lunch was served.

Club Meeting At Alexander Home

Tree Diseases Take Annual Timber Toll

EUGENE, Ore., June 20 (AP)—Lumbermen and scientists gathered here yesterday for the forest symposium of the annual session of the Pacific division of the American Association for the Advancement of Science were told that tree diseases take an annual toll of six billion feet of timber valued at \$73,000,000 and that forest fires destroy annual from ten to twenty million acres of timber.

E. I. Kotok, director of the California forest experiment station, declared western lumbermen must come to realize that slashing by burning is not only out of date but very injurious to reforestation. Clearing of land should be done scientifically, he said, and protection of forest from fire should be done more intelligently. Forest fires must be followed by careful reforestation and these new forests must be protected, he told the association.

F. P. Keen, of the Pacific northwest forest experiment station, Portland, told the scientists of studies now being carried on to determine the life habits of insects that cause damage to trees estimated at more than \$15,000,000 annually. E. E. Hubert, University of Idaho, predicted trees will be

Diversity Club In Session Yesterday

Twelve members of the Diversity club met yesterday afternoon at the Riverside park with Mrs. John Price, Mrs. Fred Rees, Mrs. Verna Smith and Mrs. Marian Bachynski hostesses. The attendance prize was won by Mrs. Verna Smith. Other prizes were received by Mrs. Philo Lockwood, Mrs. Fred Rees and Mrs. Claude Puckett. Games were a delightful diversion. Later dignity refreshments were served.

The next meeting will be held at P. Points camp, July 3 at 2 o'clock.

Party Compliments Ruth Jean Zurbrick

Miss Ruth Jean Zurbrick, daughter of Mr. and Mrs. H. A. Zurbrick, was the inspiration for a happy birthday party Wednesday afternoon at the Riverside park where games were played. Later supper was served at 6 o'clock at the Zurbrick home.

Two cakes featured the merriment: one a beautiful cake with eight candles and the other a surprise cake with a coin in it, which was found by Miss Marjorie Doherty. The color scheme was in orchid and yellow. Miss Marjette Foley won the prize in a guessing contest.

Those present were: Jean Lary Inlow, Marjette Foley, Mary Gene Bohnenkamp, Mildred Goss, Phyllis Westmeyer, Marjorie Doherty, Dorothy Tucker and Ruth Jean Zurbrick.

Announcements

The Lutheran Choral society has been held this evening at the home of Mr. and Mrs. Walter Pohnman, has been postponed on account of the weather.

Tree Diseases Take Annual Timber Toll

EUGENE, Ore., June 20 (AP)—Lumbermen and scientists gathered here yesterday for the forest symposium of the annual session of the Pacific division of the American Association for the Advancement of Science were told that tree diseases take an annual toll of six billion feet of timber valued at \$73,000,000 and that forest fires destroy annual from ten to twenty million acres of timber.

E. I. Kotok, director of the California forest experiment station, declared western lumbermen must come to realize that slashing by burning is not only out of date but very injurious to reforestation. Clearing of land should be done scientifically, he said, and protection of forest from fire should be done more intelligently. Forest fires must be followed by careful reforestation and these new forests must be protected, he told the association.

F. P. Keen, of the Pacific northwest forest experiment station, Portland, told the scientists of studies now being carried on to determine the life habits of insects that cause damage to trees estimated at more than \$15,000,000 annually. E. E. Hubert, University of Idaho, predicted trees will be

harvested in the future before they are affected by decay and that many wood products will be made from pulp manufactured from small but sound trees.

E. I. Munger, Pacific northwest forest experiment station, Portland, criticized modern logging methods, especially the use of the "high lead" system which breaks down thousands of smaller trees. He said the slashing and burning of debris kills all vegetation and makes it hard to obtain a new growth of Douglas fir.

Dr. William Compton, secretary and manager of the National Lumber Manufacturers' association, declared the perpetuation of the lumber industry is a real challenge to science. He maintained that new and more efficient methods of handling wood and its by-products must be developed if wood is to hold its own in progress. He characterized wood as "capable of being made the most universally useful material in industry."

Forestry men joined Dr. Compton in advocating a system of timber land taxation that will provide an incentive to handle timber so that more of it can be utilized and that will encourage reforestation. The present system, he said, a tax on value, merely encourages the owners to get what they can out of the land and abandon it.

Dr. Compton predicted that eventually methods would be found whereby wood can be made fireproof, rotproof, bugproof, shrinkproof, and waterproof. Scientific research, he said, already is on the borderline of such achievement and when it is accomplished it will open a market estimated at 12 billion feet annually, or nearly 40 per cent of the present consumption.

The scientific meetings continue through today and tomorrow. The closing day will be devoted to trips to various points of scientific interest.
