English Industrial Centers
England has 39 cities with a population of more than 100,000.

China and Porcelain
Not much china was imported into England until about 1650, when it began to be brought in by the East Indian Trading company. Porcelain was not made in England until almost the middle of the Eighteenth century. Earthenware was manufactured earlier than the Eighteenth century. Potters were at work at Staffordshire in the Seventeenth century.

Almost Dead Language
The language of the pharaohs ceased to be officially used after the conquest of Egypt by Alexander the Great, 331 B. C. being supplanted by Greek, which was in turn superseded by Arabic, 1,000 years later, after the Moslem invasion. The Egyptian language lingered on among the people until the Fourteenth century, and is now only in the liturgy of the Christian Coptic church.
