

OVER THE VALLEY

Mabel E. Morton, Valley News Editor
Phones: Residence, Main 966; Office, Main 600

(Continued From Page Seven)

Nevada where Mr. Hayes is district insurance manager of the Pacific Woodmen of the World. Those of the immediate family attending, as well as Mr. and Mrs. Oliver of La Grande, were Mr. and Mrs. L. Larson, and family, Mr. and Mrs. L. Hayes, Mr. and Mrs. C. L. Hayes and family, Mr. and Mrs. T. Corum, all of La Grande, and Mrs. B. D. Hayes and family, of Kameia, and Mr. and Mrs. J. Hayes and family of Meacham. Other relatives present were Mr. and Mrs. E. C. Faye and family, Hoy and Gerald Corum and Charles Hayes of La Grande. Swimming in the river and games with the children were enjoyed and then a wonderful picnic dinner with lots of ice cream and soda pop and watermelons. Everyone returned home, tired but happy, in the late evening.

On Vacation—
Miss Doris Busick, the office secretary at the Union experiment station, is spending a few days vacation in Seattle this week.

That First Wheat—
Many who saw the new star in the heavens Tuesday evening, must know that it was the property of the Alcedo Elevator company and not a star at all, but a light which is displayed by Mr. Buchanan once each year when the first load of wheat arrives at the elevator. This event has grown to be a real ceremony, telling the folk of the valley that harvest has arrived and the farmer folk seeing it realize that their food is being produced, are about over for another year and that soon all the crop will be safely in the bins. The first loads this year were from the Harry Fischer place at Alport, by Ed Taylor, Herbert Speckhart is also an early bird, getting in a day later.

Entertaining Club—
Mrs. L. E. Evers is entertaining the Countrywomen's club this afternoon at her home near the Cove.

Home From Portland—
Mr. and Mrs. E. Beckley of Fruitdale have returned from Portland where they visited over the weekend and attended the Union county picnic held there last Sunday. They report a splendid time.

Returns Home—
Mr. and Mrs. J. F. Berry and children left last week for their home at Longview following a visit with relatives in La Grande and the valley. They were accompanied by Mrs. Mary Worth who had been here for a longer time and who was returning to her home in Rydewood, Washington. The party went by the

of Okanagan where they visited with other relatives.

Have Nice Trip—
Mr. and Mrs. Ed Finkle and Mr. and Mrs. E. O. Zeek of Union accompanied by Mr. and Mrs. Julius Fisher and Mrs. W. W. Williams and the Harry Fisher family and Harold Carper of Lower Cove went to Medical Springs Sunday. They enjoyed a picnic dinner in the grove, later a swim in the wonderful pool. The roads are very dusty at this time of year. On the way back the party stopped at Ice Cave on Catherine creek.

Stops for Visit—
J. D. House and son, Howard from Newport, Washington, were called Sunday at the home of his sister, Mrs. I. M. Shafer. Mr. House was on his way to Ontario, Oregon on business.

For Huckleberries—
The Ray Fuller and Harry Wells families of the Valeria district and the Will Adler family of near La Grande formed another party which drove to the hills north of Summerville Sunday for huckleberries. In every one in the party had picked as many as Mrs. Ray Fuller did which would have had a good many gallon.

Seven Years Old—
Keith Simmons, who lives with his grand-parents, Mr. and Mrs. S. T. Simmons of Island City was seven years old Monday and his grandmother gave him the finest kind of a birthday party. There were fourteen youngsters invited in and they spent the afternoon with games of different kinds. Very nearly supper time Mrs. Simmons served ice cream, wafers and punch. Keith Simmons received many lovely gifts as remembrances of the day.

Returns Home—
Mrs. Ivan Arnold who has been spending the last two weeks with her sister, Mrs. I. M. Shafer in Moss Chapel district, left Sunday evening for her home in Oceanside, California.

Get New Furniture—
Mr. and Mrs. Robinson who lived in one of the houses destroyed by fire when the Maccabee hall at Cove burned last week were in La Grande Monday to about some new household effects.

Take Sunday Trip—
The Frank Conley family of Lower Cove spent Sunday up Catherine creek.

Make Splendid Catch—
W. W. Wright and Clyde Howiter of the Lower Cove district drove to Wallowa lake Sunday on a fishing

expedition and brought back a dandy catch.

Have Guest—
Mr. and Mrs. Eugene Sixbey of Round Bay have as their guest this week, their niece, Mrs. Beryl Taylor of the Moss Chapel district.

Breaks Arm—
Mrs. J. A. Holman of the Island City neighborhood had the misfortune to break her right arm last week, and while the member seems to be doing very well, still it is quite painful and it is quite a handicap at this busy season of the year. The accident occurred when Mrs. Holman was getting from the car.

Inspecting Grain—
D. E. Stephens, of the Moro experiment station came to the valley yesterday and is making a tour of inspection, looking over plots of grain in the valley which are up for certification.

Bad Fire—
The fire which visited Cove the latter part of last week, destroying two residences and the Maccabee hall might have been much more serious than it was—though it was plenty serious. There was absolutely no wind, according to reports and this helped matters greatly. If any kind of a wind had prevailed, the extent of the damage would tax a good imagination. Sidewalks across the street are charred from the intense heat, telephone poles are similarly damaged. Onlookers who could not assist in the bucket brigade, were kept busy looking after falling embers and sparks. If we were writing an editorial, we would say that the loss of the hall should not be mourned. It was old and dilapidated. However it filled a want for community projects, high school athletics, and dances were held there. The new community building would in all probability have put the hall out of use completely.

Have Guest—
Mr. and Mrs. Garrett Blokland had as their guests, last week at their cabin at Wallowa lake, Mrs. Ivan Arnold, of Oceanside, California, Mr. and Mrs. Tom Ruckman of La Grande, Mrs. John Bowers, Mrs. I. M. Shafer and daughter, Pluma of Island City.

Grangers at Meet—
A goodly number of Blue Mt. grangers were at Medical Springs Sunday a dinner and meeting. Among them were Mr. and Mrs. John Hain, Myrtle Wilcock and Dean Wright of La Grande, Mr. and Mrs. Albert Hamann, Mr. and Mrs. Bill Taylor and children of the Island City-Cove highway, Mr. and Mrs. J. B. Lindsey of Grange Hall, Mr. and Mrs. Ralph

Museum Restores Body Of Sloth That Lived In Arizona Ages Ago

By Howard W. Blakeslee
(Associated Press Science Editor)

NEW HAVEN, Conn. (AP)—A pale yellow beast that roamed in Arizona 500,000 years ago has been restored to its original form at Peabody museum.

Even quiet-spoken scientific men call the feat "remarkable."

This animal is one of the world's rare remnants of the varied animal color schemes familiar to antiquity. Unlike other prehistoric fossils, this one still retains some of its hide and hair, in five different patches.

The bones still were held together by ligaments, giving an unusual opportunity to restore the creature, and while the member seems to be doing very well, still it is quite painful and it is quite a handicap at this busy season of the year. The accident occurred when Mrs. Holman was getting from the car.

Piecing together the telltale marks at the bottom of the trap, Prof. Richard Swann Lull of Yale plans further search for bones of animals the marks of whose teeth still were visible on the sloth.

There is hope of finding a megatherium or a mylodon.

The sloth's hair is pale yellow, smooth, fairly coarse, and evidently made an effective protective coating, although it lacked trace of the woolly undercoat known on some aloths. It is now very brittle.

To laymen one of the beast's most remarkable characteristics is the way he walked, with the paws of his long forelegs bent much as a gorilla walks on its knuckles.

"The effect," says Prof. Lull, describing the animal, "is somewhat weird, with the extremely broad and powerful rear portion and the curious set."

"One is impressed with the general utility of the fore limbs, not only in pulling down branches of low trees and shrubbery, but for digging and, since the claws, both front and rear, would be cruel weapons."

Remnants of the body of a prehistoric yellow sloth enabled scientists to reconstruct the animal as it looked 500,000 years ago (above). Professor R. S. Lull (below) plans search for other animals that lived at same time.

A hardened food ball was found, digested. It indicated that this sloth probably lived upon roots and sugarcane, twigs, branches and brush, which he dug or pulled up and ate entire.

Chenault and Mr. and Mrs. Frank Wright of Valeria.

Have Outing—
Mr. and Mrs. Cap Tuttle and son John, of La Grande, Mrs. Jeanette Tuttle and Miss Jean Kelton, have gone to Smith mountain for a few days outing.

Picnic at Riverside—
The American Legion and Auxiliary of Imbler will give a picnic at Riverside park in La Grande next Sunday, July 27. Friends are invited. Every one is asked to bring his own lunch and dishes.

On Weekend Trip—
Mrs. B. C. Dahlstrom, Mr. and Mrs. John Dahlstrom and daughter, Della Jean, Mr. and Mrs. Wilbur Zurbrick and children, Margaret and Harold, spent last weekend at Anthony lake. Sunday morning they were joined by Mr. and Mrs. John Shaw and daughter, Ruth, Mrs. Axel Dahlstrom and Ruby Dahlstrom and Mr. and Mrs. J. Hadden. Among the diversions enjoyed while there was a visit to the lookout station. They report a most enjoyable trip and that the surroundings were beautiful with all kinds of wild flowers to be seen there.

TWO GIRL SWIMMERS SEEN AS FRENCH OLYMPIC HOPES

PARIS (AP)—France's 1932 Olympic games future apparently is on the water.

Miles, Irene Godard and Solita Salgado, two trim feminine crabs, carry a large share of the hopes here that the tricolor will rest at the top of the Los Angeles Olympic mast.

Both girls are showing vast improvement over their 1929 form. Mademoiselle Godard has been clocked regularly around 1:12 for the 100 meter swim, and recently Mile, Salgado, not yet 16, negotiated 500 metres in 7:25.

ENTERS FOR EXPERIENCE, WINS STATE GOLF TITLE

RICHMOND, Va. (AP)—Chandler Harper, 16, of Portsmouth boy, entered the Virginia amateur golf tournament at Hot Springs to get some tournament experience and came home with the title, defeating Billy Howell, Richmond's 18-year-old Middle Atlantic champ, in the final match.

Harper, who has been playing golf since he built a nine-hole course on the grounds of his home four years ago, also was medalist at Hot Springs.

OKLAHOMA AGGIES TO CUT GAUBY STREAK THIS FALL

STILLWATER, Okla. (AP)—Oklahoma A and M grid players are going in for color this fall.

Jerseys of four hues—scarlet, royal blue, gray and purple—will decorate the lustrous backs of the freshmen players, while the varsity will sport jerseys of solid orange, solid black and combinations of the two colors.

New equipment costing \$2500 has been ordered for the football squads.

To Get Athletic Field

NANKING (AP)—China's capital city is to have an athletic field of its own. The location is the large memorial park surrounding Dr. Sun Yet Sen's tomb and the field will be the scene of China's second national track and field meet, next spring.

Eddie Mack, Denver lightweight, carried a recommendation from the governor of Colorado to New York in an attempt to crack the big time.

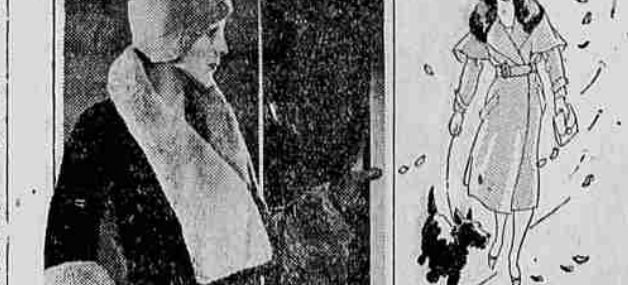

Remnants of the body of a prehistoric yellow sloth enabled scientists to reconstruct the animal as it looked 500,000 years ago (above). Professor R. S. Lull (below) plans search for other animals that lived at same time.

A hardened food ball was found, digested. It indicated that this sloth probably lived upon roots and sugarcane, twigs, branches and brush, which he dug or pulled up and ate entire.

Chenault and Mr. and Mrs. Frank Wright of Valeria.

Only Waiting for Autumn Breezes

Only waiting for autumn's sharp breezes are these early fall models. The novelty brown worsted coat with the fitted, flare skirt has a beige lapin collar and novel cuffs. The black felt chaupau (below), with bandeau and crown top of beige lapin indicates a fall tendency.

Union Methodist Church Meeting Held Wednesday

By W. V. Connor
(Observer Correspondent)

UNION, Ore. (Special)—The fourth quarterly conference of the Methodist church was held at the church Wednesday evening with District Supt. H. S. Hamilton in charge. Officers and committees were elected for the ensuing year and the members expressed a sincere desire to have the annual conference which meets just one month from this date.

E. P. Reuter, for many years an employe of the local hardware store is just now enjoying his annual vacation. He in company with Max Watts is on a camping and fishing trip in the vicinity of Tombstone lake.

Wednesday morning an autoist driving a touring car attempted to park at the curb on Main street but the car refused to stop and proceeded

ed onto the sidewalk. The driver just kept right on and after going about a half block he found a place to return to the street without any damage being done.

Captain E. W. Ely, of La Grande, formerly in charge of the national guard company, but now transferred to other military duties, paid a farewell visit to Union headquarters company at their regular drill Tuesday evening.

After their next regular meeting Wednesday evening, July 30 the Union band discontinued rehearsals until September. So many of the members are busy on vacation that it was not thought advisable to meet during August.

Tuesday afternoon the delegation which had been at Wallowa lake for the Epworth League institute arrived home reporting a very pleasant and profitable week spent at the camp grounds. The Union leaguers who attended the meetings were: Ruth Connor, David Tripp, Marvin Tibus, Wylie Ackley, Earl Cook, Leonard Clark, Alice Gambill, Josephine Bliss, and Dorothy and Verna Posey. Mademoiselle Lousa Burwell, Viola Parker and Sadie Connor were with the young folk as chaperones. Union leaguers made an excellent record during the institute. They have purchased and practically paid for a lot on the grounds and have selected another lot which they will soon begin payment for. As soon as possible the league plans to build a cabin on one of the lots.

THIN CONCRETE DAM TESTED FOR SAFETY

PRINCETON, N. J. (AP)—Can a concrete dam 100 feet high, and mostly only two feet thick, stand when full of water?

Some experiments by Prof. George E. Boga at Princeton indicate that this ribbon dam probably would hold. The experiments seek to establish safety rules in dam building.

His models are copies of experimental concrete dams at Stevenson creek, California.

STEEL MILL X-RAYS SAME AS USED FOR DISEASE

NEW YORK (AP)—Exactly the same X-rays are used in the laboratories of the mills and the factories to analyze steel and alloys as physicians use in treating diseases.

The Radiological Society of North America has opened its official publication, Radiology, to the radiium and X-ray work of all scientists and to the industrial X-ray men. The object is to enable them to compare notes, for what one discovers may be useful to any or all the others.

News of the Churches

The Baptist and Presbyterian congregations will again meet for morning worship this Sunday morning at 11:00 o'clock, both in the Baptist church the Rev. J. George Wilk, of the Presbyterian church, preaching the sermon. Miss Gladys Miller will play the piano prelude "Song Without Words" by Mendelssohn. The Ladies' trio, Mrs. S. B. Morgan, Corrine Baker and Doris Cade, of the Presbyterian church will sing the anthem "Just for To-day" by Paul Ambrose. E. E. Hurley and C. E. Anderson, of the Presbyterian quartet, will sing the offertory duet "Thou Art Our Father" by Briggs. The Rev. Mr. Godwin, pastor of the Baptist church, and Mrs. Godwin are spending this part of their vacation in Boise, Idaho. Beginning August 10, and the following two Sundays, Mr. Godwin with his congregation will worship with the Presbyterian congregation in the Presbyterian church, and their choir furnishing the special music.

Sunday school meets at 9:45 Sunday morning, and the Christian Endeavorers meet at 6:30 p. m.

English Lutheran Church
The morning worship at the Lutheran church will begin at 10:30 o'clock. Miss Eunice Anderson will play "Hallelujah" by Theodore Lask. The junior choir will sing the special number, "The Call of Christ." The pastor, The Rev. Leif H. Aves will bring the message on the subject,

"Not so Good," with reference to the mingling of disappointment with hope in the experience of the Master.

Episcopal Church
Holy communion at 6 and 8 a. m. Sunday opens the day's services in the Episcopal church. Following these meetings church school convenes at 9:45 o'clock with Mrs. Tarkington as superintendent. Morning prayer is at 11 with Mrs. H. N. Ashby at the organ. The pastor's sermon topic will be "A Hidden World."

Island City Community Church
"Echoes from the Epworth League Institute" will be the subject for the morning worship hour at the Island City Community church, opening at 11 o'clock Sunday.

Sunday school is at 10 a. m. and Epworth League at 7 p. m. The public is invited.

Church of God
Sunday school will begin at 10 o'clock Sunday morning at the Church of God. The morning service will open at 11 o'clock and the subject of the pastor's sermon will be "Piercing Ahead."

The Sunday evening service will convene at 8 o'clock and the subject will be "Pure Religion—What it is and What it is Not."

First M. E. Church
The church school at 9:45 under the leadership of E. S. Burnett, superintendent, opens Sunday's services at the First Methodist Episcopal church.

A part of the morning worship hour at 11 o'clock will be given over to a recognition service for the young people who will receive certificates for their week's work at Wallowa lake institute. A brief sermon will be preached by the pastor on the subject "Forward."

The Epworth League service and the evening worship will be combined and in charge of the young people. Institute echoes and reports will engage the hour and many may avail themselves of this opportunity to get a first hand report of the institute.

CENTRAL CAN LOOK-IN ON TELEVISION TALKER

NEW YORK (AP)—Much as "listening in" was coined for the experience of listening to something by radio, so "looking in" has come into television vernacular.

The "looking in" is done by central on the two-way television circuit of the A. T. & T. here. This central not only has to complete the talking connection, but also must complete the "picture" connection—that is, make sure that the two persons two miles apart see each other distinctly.

Central does this with an apparatus that shows in miniature perfect copies of the television faces as they appear to the phone users. This apparatus has two eye pieces, one showing the face of the person at the calling end, and the other the face at the receiving end. It is an odd sensation, like looking at the empty space separating two persons, and seeing materialize there clear images of eyes, hair and facial contours and colors.

Use the safe yearned Milk

What is Carnation Milk? Simply pure, wholesome, whole milk, evaporated to double creaminess, sterilized for safekeeping and conveniently packaged. You'll find it absolutely dependable and wonderfully economical.

Carnation Milk is safeguarded at the source by strictest cleanliness in the care and milking of the cows. And this protection continues until it reaches you in hermetically sealed containers.

It is the only oil that is so pure and so clean that it can be used for all purposes.

SINGLE-TUBE TUNER FITS NEW AMPLIFIER

NEW YORK (AP)—A tuning system, containing a single screen grid tube, has been devised for use with the two-tube Loftin-White direct coupled amplifier. A three-tube receiver requires...

It consists of two tuned circuits, one for the antenna and the other ahead of the amplifier, the first tube of which is used not only as the detector but as an audio amplifier, feeding its output directly into the 245 output tube. Good amplification is obtained, with sufficient selectivity to keep stations from overlapping.

The tuner, the work of the Electrical Laboratories, is designed so that it fits in with the amplifier, the power pack of which supplies both filament and plate current. The only change in the amplifier unit is the insertion of a choke coil and a small bypass condenser across its output to keep radio frequency current out of the speaker coil.

Volume is controlled through a potentiometer which regulates the voltage on the screen of the first tube. This control also operates the power line switch for turning on and off the set. Coils are shielded, with the RF tube mounted between them.

The French government, by decree, has eliminated foreign development of its civil airways.

Banks in Peru now are not allowed to charge more than 10 per cent interest.

PURITAN MALT

—IT'S DIFFERENT

Puritan quality simply cannot vary.

While it is in the making, mechanical eyes known as "Controlled Temperature Process" constantly watch the heat—assure exact uniformity in every single can. No variation or unevenness can exist.

Made of the finest select barley and hops—and offering you 10% greater quantity than most other brands. Every good dealer sells Puritan.
