**When Salt Was Scarce**  
At the beginning of the Civil war salt was imported from England almost entirely, and when transportation became difficult salt became scarce. And so it was at the beginning of the World War—an old lady ordered at once 100 pounds of salt. Asked why, she said she wasn't going to get caught the way her mother was caught in 1861. She needn't have worried.

**Indian Observatories**

**Binocular's Advantage**  
The binocular glass has an advantage over ordinary spyglasses or single lens telescopes, because it enables both eyes to focus on the same object and gives a much stronger vision than can be obtained by the use of one eye alone. The first binocular telescope, which was invented in 1608, consisted of two telescopes placed side by side.
