OVER 15,000 DAILY DEMAND SARGON Vast Growing Army of Sargon Users, Marching Single File, Would Encircle Globe in Only Few Years Time. (By Richard L. Simms)

ATLANTA, Ga.—More like a tale from the Arabian Nights of old than a record of modern business achievement reads the story of the marvelous growth and development of Sargon, the New Scientific Compound which has become the sensation of the drug trade throughout the United States, Canada and other countries.

The old illustration of the pebble dropped into the pool best describes the phenomenal and unprecedented demand and its fame is rapidly spreading over the entire American continent like a great tidal wave.

Recently compiled figures reveal that approximately 15,000 men and women are marching into the drug stores daily for Sargon and Sargon Soft Mass Pills, the marvelous new treatment that is restoring health to countless thousands by new and remarkable methods undreamed of only a few years ago.

Already more than 5,000,000 suffering men and women have put it to the test and have told other millions what it has done for them.

Marching in regulation U. S. army fashion—single file—this vast army of Sargon users would reach New York from San Francisco and at the present rate of sale—would, in a few years time, encircle the entire globe.

The only explanation of Sargon's triumph in the Medical World is Sargon's true worth. Back of its triumph in the drug stores is its triumph in the homes and it is the grateful endorsements of its millions of users that has made it the most widely talked of medicine in the world today.

Sargon is extensively advertised, it is true, but no preparation, no matter how extensively advertised, could possibly meet with such phenomenal success unless it possessed absolute merit and extraordinary powers as a medicine.

There can be but one possible explanation for Sargon's amazing success and it can be told in one word—MÉRIT! Red Cross Drug store, agents—Adv.

WALLA WALLA PEOPLE MOVE TO MT. GLEN

By Mrs. E. D. Whiting (Observer Correspondent) MT. GLEN, Ore. (Special)— Mr. and Mrs. Albert Calkins and family, of Walla Walla, Wash., have located in this community.

Mr. and Mrs. C. C. Culbertson and daughters, Edna and Evelyn May, of Yakima, Wash., accompanied by E. D. Howard and J. E. McDough, of Salinas, Cal., were guests at the J. A. Leak home over the weekend. Miss Ruby Felks made the return trip with them to Yakima Monday morning. She will be the bridesmaid to attend Miss Edna Culbertson, whose marriage to Mr. Howard will be an event of Aug. 17.

The condition of Mrs. Clara Richards, who is at the Grande Ronde hospital suffering from diabetes, is much improved. She will undergo a minor operation Wednesday morning.

Clifford Lyons, of Glenns Ferry, Idaho, is spending his vacation with his aunt, Mrs. J. A. Leak.

Mrs. Virgil Betts and daughter, accompanied by Mrs. Davis and Mrs. Newman, all of La Grande, visited with friends here Tuesday.

Frank James, of Salt Lake City, who has recently returned from a mission for the L. D. S. church to Colorado and various points in North Dakota is visiting with his sister, Mrs. F. P. Felk.

J. A. Leak and Luther Felk spent Sunday fishing on the Minam.

Harvesting of grain has been going on here for about two weeks. It is reported that the fall grain is good. One field owned by A. J. Felk went between 45 and 50 bushels to the acre. The spring wheat and vegetables are suffering for lack of water and a high yield is expected.

Mr. and Mrs. Walter Lindsey and daughters, Evelyn and Catherine of Toledo, Ore., visited at the home of Mr. Lindsey's sister, Mrs. Annie Nebeker.

Health Talks

A certain number of cancer cases—the percentage is larger than the average person appreciates—are curable, but there are no cancer cures in the full meaning of the word "cure."

A "cure" to merit that designation, must be a uniformly effective remedy for a disease condition.

Diphtheria and tetanus justly may be said to be a cure for diphtheria. There also is an effective cure for malaria.

As to this last a number of other anti-toxins, and two or three more drugs, and you will have exhausted the list of true "cures."

It is in this sense that we say there are no cancer cures. The cause, or causes of cancer are still unknown.

Chronic irritation is the only agent which has been definitely established as sometimes leading to cancer. This knowledge has made it possible, in a measure, to "prevent cancer" by removing the source of the irritation and at times by removing the area of irritated tissue.

Cancer is a wild or uncontrollable new growth of tissue cells which always starts at a single location. The present day remedy for this condition lies in the removal, destruction, or arrest of the wild-growing cells.

In addition to an intensive search for the cause of cancer, science also is seeking its cure. The true cure would be some agent capable of destroying the growth of the wild cells without injury to the cells of the normal tissue.

Surgery, radium and the x-ray at the present time are the three means for the treatment of cancer, but a true cure still remains to be found.

Ministers of Council Bluffs, Iowa, taking religion to the people, go into city parks Sunday evenings and preached 40-minute sermons.

Nearly 4500 men are to be employed in building an 85 story building in New York.

One trip of a tri-motored mail-passenger transport over the Chicago-San Francisco route, the nation's longest airway, requires 1400 gallons of gasoline.

Greater New York averages 23,361 persons to the square mile, London 11,250 and Chicago 16,219.

AIR TRAVEL WILL UNITE ALL NATIONS (Continued from Page One)

present air-craft we cannot compete with ships and railroads in the movement of most articles of commerce.

The airplane augments rather than replaces ground transport. Its mission is to simplify intercourse between countries by rapid transportation of passengers and documents; to bring us in closer contact with other people and to facilitate the negotiations necessary for mutual understanding and trade.

"Throughout history," Colonel Lindbergh said, "the progress of civilization has been dependent upon the development of transportation. Every great advance in transportation has forecast a greater unity in world government."

A Third Dimension "The twentieth century," he continued after some amplification of this statement, "brings a third dimension in transportation to a world which had not yet time to become accustomed to the more recent developments of the railroad and the steamship. The airplane and the airship are placing time and distance on a new scale of relativity. Aviation as it is today is having a worldwide effect on communication. If we attempt to envision what it will be after a century of modern scientific development it is difficult to find precedent for the advances it may bring to civilization."

"Aviation has not gripped the imagination of the world solely because at last man found a way of flying. Its fascination lies far more in the changes it is bringing about in existing methods and policies. Possibly the most important effect will be on international relations. When measured in hours of flying time the great distances of the old world no longer exist. Nations and races are not separated by the traditional obstacles of earthbound travel. There are no inland cities of the air and no natural obstructions to its commerce."

Col. Lindbergh told his listeners all over the world if the principle be accepted that life today is preferable to that of ancient times then it is logical to assume that any future improvement in transportation will result in a corresponding advance in methods of living.

Replaces False Impressions "Saying the distances of places has been judged by their accessibility, Col. Lindbergh expressed the belief aviation would replace former false impressions of geography with a true order of location."

"The ease of travel between Canada, Mexico and the United States, for instance," he said, "will undoubtedly bring about still closer cooperation between them."

He closed his address with a plea for uniform air regulations among nations, saying that one of the most important factors contributing to the rapid expansion of airlines in the United States had been our federal supervision and consequent freedom from local restriction.
