C. E. Festival At Manse Yesterday Afternoon, Night

Japanese lanterns and gay streamers of crepe paper decorated the Presbyterian manse last evening and light music filled the air while the Christian Endeavor festival was planned to be held on the lawn, and was held to raise the organization's pledge made at the Halfway convention this spring. Visitors called from 4 until 10 o'clock, enjoyed the radio program and music and purchased refreshments served at small tables centered with sweet peas and garden flowers.

Miss Ruth Gebel was general chairman with the following assisting: Miss Mildred Stoddard, refreshments; Miss Grace Geibel, decorations; Donnie Childs, Ralph Geibel, James Leslie and Rosemary Huley, program; Margaret McAllister, Grace Geibel, serving; Miss Hulda Anderson, Lucille Gant, Bill Zakin and Mildred Stoddard in charge of the kitchen.

Baptist Ladies Aid In Meeting at Park

Following a delightful luncheon at the Riverside park yesterday, members of the Ladies Aid of the Baptist church enjoyed a short devotional program led by Mrs. L. J. Dykes and a short business session called to order by Mrs. Marcus Godwin. Luncheon was served at 1 o'clock with covers laid for 15. A letter was read from Mrs. W. P. McAdory who is in Seattle.

The next session will be Sept. 5.

Lucky Dozen Club Picnics At Cove

The Lucky Dozen club spent a pleasant afternoon at the cove Friday. All but two members were present and several guests and their families attended.

After a pot-luck luncheon at 1 o'clock part of the group enjoyed a swim in the pool and the others spent the afternoon sewing. The next meeting will be with Mrs. C. E. Stang in two weeks.

Diversity Club In Enjoyable Outing

The 14 members of the Diversity club spent a delightful afternoon at Cove Thursday at their regular meeting. Mrs. Fred Reed, Mrs. Blanche Priddy, Mrs. John Price and Mrs. Claude Puckett were hostesses.

Swimming and games were diversions of the afternoon with Mrs. Phillip Lockwood and Mrs. Jack Johnson winning prizes. The attendance prize was won by Mrs. Leslie Duncan. Late in the afternoon delicious refreshments were served.

The next meeting will be an all-day session at Pine Grove with a pot-luck luncheon at noon, August 23.

Birthday Party At The Wyllie Home

Summer flowers and gay young voices filled the David Wyllie home with fun and joy for little Virginia Wyllie, Wednesday evening, the occasion being her birthday anniversary.

Games were played until 10 o'clock when the guests were seated at a table decorated with lavender and pink sweet peas. Dinner was served at 7 o'clock. The best coffee was the "307" a telegram received by Mrs. bil, white cake with eight pink candles. The record was 424, yards, 2 lbs. Lovely gifts were received from ten and 11 inches.

Physical Culture Club is Discussed

Plans for the organization of a physical culture club were begun at the meeting of the L. T. club last night at the home of Misses Helen and Edna Jensen. Miss Helen Shilling was appointed to secure more information and data. An entertainment to be given early in the fall was also discussed. An over-night hike to Mt. Emily next weekend will probably be their next meeting, they say.

Western States Will Exhibit At The Oregon Fair

SALEM, Ore., Aug. 16 (AP)—The Oregon state fair of 1931 will present an attraction that will give the Oregon exposition next year importance, says E. L. Schultz, Wilson, secretary.

This will be the exhibit of the Western States Exposition association. The organization gets its name from the fact that it was formed to let the world know all about the 11 western states, but the idea has been refused to be provincial and has overhauled the international boundaries. So not only will the Oregon fair next year have exhibits from Washington, Idaho, Montana, Wyoming, Nevada, Utah, Colorado, Arizona, California, New Mexico and Oregon, but also from the territories of Alaska and Hawaii, from Mexico and probably from the South American countries.

The exhibit will be especially appropriate next year for the reason that 1931 will be the 70th anniversary of the Oregon state fair.

A building exclusively for the exhibit will be necessary. This will have to be 300 feet long. Since there are no suitable buildings now on the fair grounds it will be necessary to construct one at a cost of \$30,000 or \$75,000. It is planned to ask the legislature for an appropriation, though there is a chance, it is said, that the other states belonging to the association will contribute to this.

The exhibit is now in its second year. This year it will be shown at the California fair, as it was last year. It is said it will be increased in size during the coming year.

Confession Fails To Convince Police

TOLEDO, O., Aug. 16 (AP)—The "confession" of a man who surrendered himself at Stryker, near here, saying he was the slayer of Gerald E. (Jerry) Buckley, Detroit radio announcer, has collapsed under questioning of Detroit detectives.

Marshall Faber said the man gave his name as Edwin L. Miller, of Detroit. The marshal yesterday said he believed the confession authentic, adding he had not questioned the man very thoroughly.

MAKES RECORD

SALEM, Ore., Aug. 16 (AP)—Rev. L. D. Kelly, pastor of the Baptist church at Monmouth, won the world's record in national free style long bow contest at the national archery tournament in Chicago, August 12.

His record was 424, yards, 2 lbs. The record was 424, yards, 2 lbs. The record was 424, yards, 2 lbs.

Chemists Will Analyze Uses of Tiny Bacteria at Science Meet

CINCINNATI (AP)—The world's smallest workmen—molds, ferments, enzymes and bacteria—will hold first place in scientific papers of the American Chemical Society, meeting here beginning September 9.

Putting these little microscopic bits of life into controlled and profitable work for men is one of the new fields of science.

All they demand is food, satisfactory living quarters, certain moisture, temperature, acidity and protection from enemies.

Enthusiasts among chemists even forecast them as substitutes for gigantic masses of metal machinery.

A few molds are among man's oldest friends, beginning with the ferments that made wine and alcohol before writing was known. Only recently have chemists begun seriously to hunt for ferments to do all sorts of jobs.

The World War brought out several such as making butanol and acetone from corn, for use in airplane "dopes." Now this ferment-made butanol goes into many spray paints of automobiles.

Glutonic acid costing \$100 a pound two years ago now is made for 50 cents by a mold process discovered by Dr. H. T. Herick, molds expert of the color laboratory in the department of agriculture.

He plans a national symposium on ferments in industry for the Cincinnati meeting. Druggists now use glutonic acid as a calcium salt.

Molds make citric acid used both for soft drinks and medicines. They manufacture the acetic acid of vinegar that goes to make synthetic silks and the non-explosive kind of motion picture films.

Glutic acid which appears in most ink and many dyes is made from nut galls by the labors of a few billion molds.

KAMELA PERSONALS

By Mrs. C. E. Thornburg (Observer Correspondent)

KAMELA, Ore. (Special)—A severe electrical storm accompanied by a heavy rain on Friday afternoon brought relief to Kamela people after several days of exceptionally hot weather. In a short time enough rain fell to settle the dust and make trees and grass look refreshed and green again.

B. Davis, of La Grande, who has been working in Kamela, returned home on Friday.

Mr. and Mrs. W. Lane and daughter, Helen Mae, left on Wednesday for a few days camping trip.

Helen Carlson, of Yakima, Wash., who is visiting her father, Engineer J. Carlson here, spent Wednesday in La Grande visiting friends.

Many carloads of Indians have passed through Kamela this week, returning to their homes from the camp on Johnson creek where they hold their annual powwow. This year it was very noticeable how few Indians use horse-drawn vehicles in comparison with former years.

Mr. and Mrs. P. P. Brooks and grandson, Francis, drove to La Grande on business Wednesday.

A Kennison, of Meacham, government trapper for this district, was a

FAVORS FISH AS SUCCESSOR TO CLIFFORD

MARSHFIELD, Ore., Aug. 16 (AP)—The Coos County Game Protective association unanimously endorsed Arthur Fish, assistant state game warden, as successor to Harold Clifford, who deposed game warden. Fish has been connected with game work for the past ten years.

The group also recommended an earlier deer season for this section of the state. Bucks shed velvet earlier on the coast, it was explained, and horns are hardened by the time the seasons opens. The season in the past two years has been delayed until after Sept. 15 by dry weather.

PRISONERS RECAPTURED

ROSEBURG, Aug. 16 (AP)—James and Robert Conatser and Early Hanley who escaped from the county prison road crew Tuesday were recaptured near Wolf Creek yesterday by highway patrolmen.

High Powered Stations Mean Good Reception

By C. E. Butterfield (Associated Press Radio Editor)

The ultimate in high power broadcasting apparently is not yet at hand.

In this day of 50,000-watt stations, and there is a gradually increasing number of them each year, it seems not unwarranted to forecast such transmitters in a class about equivalent to the 5,000-watt broadcasters of today.

Although the radio commission has placed certain restrictions on the amount of power that can be used normally in the broadcast channels, changing conditions no doubt will bring about alterations in the future. For modern broadcast experimental purposes, 200,000 watts have been tried. WGY, Schenectady, N. Y., found that it reached exceptionally far during the early morning hours when the transmitter was given a week's tryout.

Now KDKA, Pittsburgh, has sought permission to use that power for regular experiments it is planning with its new station being erected near Pittsburgh.

To get back to 50,000 watts, the latest station to join this class is KMOX, St. Louis. Its new transmitter incorporates all of the advances made by science to get the waves on the air with the greatest push behind it.

The station, which started up back in 1925, became a partner on the air with WFFA, Dallas; WBAF, Ft. Worth, Tex.; WVIC, Hartford, WEA, New York; KDKA, Pittsburgh, and a number of others with a 50-kilowatt rating.

With the tendency evidenced for higher power the time may not be so far off in years when it will be possible to broadcast in this country and tune in a station anywhere, Europe not excepted, when reception is good.

Looking at the situation from the present standpoint, the most important benefit to result is the improved transmission area of the station involved. It means better reception under all conditions.

Topographical Map Being Made Of Bend Section

UNIVERSITY OF OREGON, EUGENE, Ore. (Special)—For the use of travelers and scientists alike, a topographical map of the north central portion of Coos county, the Bend, east to Condon, north to The Dalles and cutting the Cascade range in the middle on the west, has just been completed by Dr. Edwin T. Hodge, professor of economic geology in the University of Oregon. Answering a long-felt want to geologists to have a topographic base on which to plot the geology of this area, the map is the most complete of this kind to be made of any section in Oregon.

Not only scientists will be interested in the map, Dr. Hodge believes, as it will be of equal service to laymen, as it shows accurately every stream mountain and plain. A complete index, arranged to aid in quick location of places, accompanies the map. Anyone interested may obtain it through the geology department for a nominal charge.

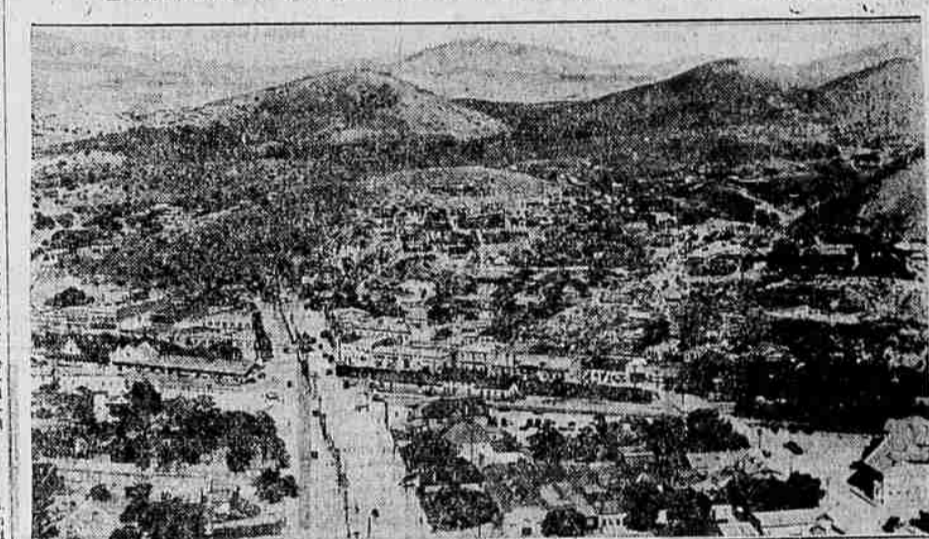

Working under Dr. Hodge during the summers of each year since 1926 were a number of geology students, to whom he has given a great deal of credit for the immense amount of field work which went into the making of the map. They included Ralph Tuck, Farrell T. Barnes, John Butler, Dan Wilkins, Clarence Dwyer, John Allen, Harold Fisk, Allan Griggs, Dale Leslie, Charles Marlatt, Robert Heitkemper, Thomas Thayer and Ed Thurston.

A geological map, for which this is the base, will be completed by Dr. Hodge this fall, when he will also publish the results of his survey on Eastern Oregon, a project which has taken the better part of five years. This study, it is believed, will have an important bearing on economic problems of Oregon, dealing as it does with economic problems of water-power, irrigation, deep well water supply and mineral possibilities.

BORSALINO Feather Weight HATS

Some member of the family is suffering from sunburn. There's nothing in the house that will give relief. Just bring out the bottle of Rexall Milk of Magnesia on which you depend for relief from indigestion and constipation. Apply it liberally to the sunburned skin. Relief will be almost instantaneous. Sold only at Rexall Stores.

BORDER TOWNS SWEEPED BY WALL OF WATER

More than a score of persons were reported missing after a torrent of water from a mountain cloudburst swept down into the border towns, Nogales, Ariz., and Nogales, Sonora. Above is a general view of the towns, showing the narrow valley into which the flood waters rushed.

FIREFIGHTERS BATTLE NEW ENGLAND BLAZE

Women came to the aid of weary firefighters with cold drinks as volunteers waged a battle against forest fires along a 35 mile front in Cape Cod district near Bourne, Mass.

REPUBLICANS RECEIVE HUSTON'S RESIGNATION

Members of the republican national committee met in Washington to receive the resignation of Claudius H. Huston as national chairman. This picture was taken before the meeting and shows Mr. Huston seated at the head of the table about which the committee is grouped.

- Pickles
- Chocolate Cookies
- Iced Tea
- Dinner
- Tomato Savory
- Buttered Breadcrumbs
- Butter
- Bread and Cheese Salad
- Cantaloupe
- Coffee

- Sardine Stuffed Eggs
- 12 hard cooked eggs
- 1/2 cup chopped sardines
- 4 tablespoons chopped sweet
- 1/4 cup finely chopped celery
- 4 tablespoons salad dressing
- 2 egg yolks
- Remove, mash egg yolks. Add rest of ingredients to yolks. Mix well. Stuff egg cases. Chill. Serve on a platter.
- Ham Relish Filling for 12 Sandwiches
- 2-3 cup chopped cooked ham
- 1/4 cup finely chopped pickled stuffed olives
- 3 tablespoons chopped green peppers
- 1-3 cup salad dressing
- Mix ingredients with fork. Spread on buttered white bread.
- Tomato Savory, Serving 6
- 4 slices bacon
- 2 cups canned corn (fresh can be used)
- 3 tablespoons chopped onions
- 4 tablespoons chopped green peppers

- 1 cup chopped cooked ham
- 2 cups tomatoes
- 1/2 teaspoon pepper
- 1/2 teaspoon salt
- Cut bacon in small pieces. Heat slowly and add corn, onions and green peppers. Cook slowly until well browned. Add rest of ingredients. Cook 6 minutes.
- Pear and Cheese Salad
- 6 fresh or canned pears
- 1/2 cup grated yellow cheese
- 1 cup diced grapefruit
- 1/4 cup thick French dressing
- Mix ingredients. Chill for 2 hours. Serve on lettuce.
