SMALL-POX

In 1929, the last year for which figures are available, there were 36,062 cases of small-pox in the United States (including only forty-four states and the District of Columbia).

This is the large tribute exacted by ignorance and indifference.

Small-pox is the one disease which we can with unfailing certainty prevent, and yet, in 1929, 36,062 individuals contracted the disease—132 of these died.

It is of interest to note that there were more cases of small-pox in 1929 than in 1928, and more in 1928 than in 1927.

There is a large mass indifference to small-pox in the United States. Many are lulled to a false sense of security by the relative rarity of small-pox.

It is rare, however, for a year to pass without some graphic and disastrous illustration of what can happen to a community which has neglected vaccination.

In 1925 there were outbreaks of small-pox in Washington, D. C., and Camden New Jersey, and among those stricken approximately one out of every three died.

In 1926 in California there were 2794 cases of small-pox, with 232 deaths.

L. Dublin, in his survey of small-pox in the United States and Canada for 1929, well summarized the condition by saying:

"The danger of a widespread outbreak of virulent small-pox is ever present, because the number of susceptible persons is large.

"Until this number is greatly reduced by general acceptance of vaccination there will be no real security against small-pox."

New York City's population increases at an estimated rate of 3577 persons a day.

Milk for Sale by Foot

A new process by which Danish dairy farmers are extracting the natural water from the milk leaves a pulpy substance which is then rolled into sheets like paper and dried. This concentrated milk is then sold by the pound and may also be marketed by the square foot or yard. When desirable to use it in liquefied form, it is dissolved in hot water.—Capper's Weekly.

Transferring Pictures

One method of softening the ink in a printed picture so that it can be transferred easily is to dissolve 1½ drams of yellow soap in a pint of hot water, adding 3½ fluid ounces of spirits of turpentine when cold. This solution is applied to the picture, which is then pressed over the blank paper or linen.

Chewing Gum by the Acre

It takes 35,000 acres just to provide the flavorings of part of the chewing gum and candy consumed in this country annually. The flavorings in question are the essential oils of peppermint and spearmint. In the case of the spearmint, all the product goes into the manufacture of gum, but peppermint also finds its way into candy and as a flavoring for toothpaste.—Washington Star.

Tree of Ages

One of the world's oldest trees has just been located at St. Vincent, one of the Cape Verde islands. It is estimated to be at least 5,000 years old, having sprouted about 3,000 years before the birth of Christ. The Portuguese colony at St. Vincent knows the ancient giant as "the dragon tree."

Earliest Police Force

The first organized police dated from Charles the Wise, who reigned in France from 1364 to 1380. He established a body of permanent officials to enforce the law.

Legal Size Fish Are Liberated In County Streams

By Mrs. L. Z. Terrall
(Observer Correspondent)

UNION, Ore. (Special) — Work of liberating legal size fish from the hatchery was completed last week with loads going out to Halfway, Five Points, Clear creek, Indian creek and the Grande Ronde. The distribution of smaller fish will be started soon.

Mr. and Mrs. R. H. Bonney returned Friday night from their outing in the lake country east of Cove. They report a very restful vacation in a marvelously scenic country. In the course of their many miles of horseback riding they visited nine lakes. On their return they found that the stork had left a 6½ pound granddaughter at the hatchery that morning. The happy parents, Mr. and Mrs. Frank Bonney, have named her Gloria Lee.

The members of the second year cooking class and the third year sewing class gave a tea party at the home of their leader, Mrs. John Green, Friday afternoon. They had arranged for a garden party with Mrs. Green's gorgeous beds of flowers as a background but the sudden shower drove them to cover. A lovely lunch was served on small tables in a tastily decorated room. For diversion the members gave a short musical program, closing with their club songs. During the afternoon they made plans for the club fair that is to be held jointly with the county grange at the experiment farm early in September. This annual fair attracts a large number of visitors and keen competition is shown for a share in the $100 cash prizes that are offered for exhibits. The girls are planning a demonstration of cake baking, sewing and serving dollar dinners.

Walter Cock and George Gignac drove up to the Jerry Thompson place Sunday to bring home Earl Cock, Victor Gamgle and their camping outfit after a week in the hills.

Sisters who attended were Mrs. Merton Davis, Mrs. Leonard Knight and Mrs. Jack Brown. The picnic given Thursday for the auxiliary was also attended by several members from union and a most enjoyable time was reported. W. Cadwell and was about 35 years of age. The family has visited in Union several times and he had taken treatment at Hot Lake on his last visit here two years ago. He was in poor health for several years.

Union Schools Will Be Opened On September 8

By W. V. Connor
(Observer Correspondent)

UNION, Ore. (Special)—Carpenters and painters are at work at both the high school and grade school building of school district No. 5 preparatory to the opening of the 1930-31 school term Sept. 8. At the high school the assembly room is being repainted and tinted and carpenters are laying some new floors and putting in new stairs at the South grade school.

T. T. Cock was in Portland on business the first part of the week.

Sunday, Aug. 17 was the last service of the conference year for the Rev. R. C. Lee of the local Methodist church. He will leave a few days before the annual conference begins as he is in charge of the statistical work and must be on the ground early. This is the fourth year for his work at Union and he goes to conference with an urgent request from the people here for his return for another year.

Mrs. Raymond Pitts and little daughter, Madeline, stopped off in Union Thursday on their way from Grants Pass to Baker where Mrs. Pitts is going to attend the American Legion convention. She is at present president of the Grants Pass ladies auxiliary and represented her organization at the Baker meeting. Little Miss Madeline visited here during the convention.

The usual rush is on at the Union flouring mill to handle the wheat crop which is reported as a good yield and of excellent quality.

Hall and Knight have their spur of the railroad built to the field opposite the Oregon Trail sawmill and are loading and shipping out carloads of logs from the Hall ranch up Catherine creek. The logs are being sent to the box factory at Milton-Freewater.

Word received from Santa Rosa, Cal., is that J. W. Patterson is slowly improving. He has been in a hospital for several weeks and has been seriously ill. The Patterson family moved from Union to the California city a few months ago.

Union American Legion and the ladies auxiliary attended the convention in Baker last week. A float representing the "stock show city" was built and took part in the parade during the meeting.
