### CHICAGO LIVESTOCK

CHICAGO, Aug. 30 (AP) — (U. S. D. A.)—Cattle 800, compared a week ago strictly grain fed steers and yearlings 20% 70c higher. Weighty offerings up most; lower grades after losing early advance closed 25c or more lower. Weighty steers and yearlings reached \$12.45; supply long fed heavies and light fed yearlings scarce; vealers and heavy calves \$1.50-\$2.00 lower respectively; about 2,000 western grassers here this week.

Sheep 1,000, today's market nominal; compared week ago fat lambs \$1.00-\$1.50 lower, better grades off most; sheep and feeding lambs about 25c lower; trade declined continuously throughout week until extreme close. Range lambs opened largely at \$10 and \$10.10 for killers; best late \$8.75-\$9.00, closing bulk native lambs \$8.50-\$9.00, few \$9.25; week top \$10.35; bucks \$7.50-\$8.00, throwouts \$8.00-\$9.50; fat ewes \$3.00-\$4.00, range feeding lambs \$7.00-\$7.75, best early in week \$8.00.

Hogs 5,500, uneven; top \$11.25, compared week ago butchers mostly steady, packing sows and pigs 15¢-25¢ lower, good and choice 140-160 lbs. \$10.15-\$11.10; light weights 160-200 lbs. \$10.75-\$11.25, medium weights 200-250 lbs. \$10.75-\$11.25, heavy weights 250-350 lbs. \$10.00-\$11.00.

## ANTICIPATE ROAD FUNDS FROM U. S.

Secretary Hyde Authorizes Apportionment of Funds for Next Year.

WASHINGTON, Aug. 30—Secretary of Agriculture Hyde has authorized the apportionment of the federal funds for highway improvement in the fiscal year ending June 30, 1932. This will make it possible for the states to anticipate the federal funds which will be paid them next July and will enable them to expand and advance their highway programs at once and so provide emergency employment for a considerable number of men who might otherwise be destitute as the result of crop failures.

Congress has apportioned \$125,000,000 for the fiscal year which will begin July 1, 1931. After deduction of the 2 1/2 per cent allowed for administrative expense, Secretary Hyde was able to allot \$121,875,000 to the several states and to Hawaii. Because drought conditions are confined to only part of the states, and a balance of previous allotments remains unobligated to the credit of several of the states, the secretary will use his discretion as to the approval of projects and will expedite the approval of projects complying with the following conditions:

1. That the state has obligated and has the federal aid funds previously allotted.
  2. That state funds required for each project in an amount sufficient to meet the federal aid funds on the legally established basis. This would not exclude the voluntary contribution of additional county or local funds but would require the state itself to provide a minimum amount equal to the federal pro rata required, basically fifty per cent federal funds.
  3. That the state highway department submit with each project statement a reasonable showing that the project if completed would assist in providing employment in the drought areas or would directly contribute to the relief of unemployment in a substantial way. The authority for exercise of administrative discretion in the approval of projects is found in various sections of the federal highway legislation.
- Although the emergency road work is expected to be done in only those states that are suffering from unemployment and from the drought, the apportionment for all the states had been made and is as follows:

## Improving Road From Corvallis To Newport, Ore

SALEM, Ore. (AP)—By the beginning of the active beach resort season of 1931 a total of \$236,825 will have been expended in the improvement of the Corvallis-Newport highway, according to a statement from the state highway department. The contracts have all been let and the last of the work now scheduled is to be completed by June 30, 1931.

S. H. Newell & company, who were awarded a contract last April 30 for the grading and widening of the unit between Pioneer mountain and Eddyville, distance of 10.1 miles, has the job about 60 per cent complete and it will be finished about October 31. The highway grade is being widened to 26 feet. The contract price for this work was \$46,270.

On this same unit a contract has been let to C. L. Camp for surfacing the 10.1 miles stretch with crushed rock macadam, the contract price being \$138,000. The contractor will begin crushing the rock about September 1 and it is estimated that the contract will be completed June 30, next year in good time for the summer season rush to the coast resorts.

Between the junction of the Alsea highway and the Corvallis-Newport highway, the latter is being given a new bituminous macadam wearing surface between the junction and Corvallis, distance of 5.3 miles. This includes the main street of Philomath. The contract for this piece of work was let April 30 to F. J. Kerfoot, whose bid was \$38,555. It will be finished by September 15. This contract is part of a group of contracts that include oiling jobs in Linn, Marion, Lane and Benton counties.

## OREGON SHOWS A DECREASE IN WRECK DEATHS

Oregon showed a decrease in the number of motor vehicle fatalities in 1929 according to the Oregon State Motor association which quotes statistics of the National Conference on Street and Highway Safety. The report of the committee on traffic accident statistics for the national conference shows ten states and the District of Columbia with a decrease in motor vehicle fatalities in 1929 over such fatalities in 1928. These states with the number of fatalities and the percentage of decrease under 1928 are shown below, arranged according to the percentage of decrease in fatalities:

State	Fatalities 1928	Decrease under '28
Delaware	61	17.6
South Dakota	100	17.3
Montana	125	12.0
Rhode Island	128	11.7
Oregon	247	11.2
Dist. of Col.	112	6.7
Louisiana	315	5.7
North Carolina	614	4.0
Vermont	65	3.0
North Dakota	100	2.9
Illinois	2017	2.5

## 24 States Ask For Certificate Of Ownership

Possession may be nine points of the law but in the case of an automobile, 24 states insist that a certificate of title is necessary to prove ownership.

The following 24 states have adopted certificate of title acts:

State	Year Enacted
Arizona	1925
California	1923
Colorado	1925
Delaware	1929
Florida	1923
Idaho	1927
Indiana	1921
Maryland	1920
Michigan	1926
Mississippi	1921
Missouri	1926
Montana	1929
Nevada	1929
New Mexico	1923
North Carolina	1927
North Dakota	1927
Oklahoma	1925
Oregon	1925
Pennsylvania	1923
South Dakota	1925
Texas	1926
Utah	1925
Virginia	1925
West Virginia	1925
Wisconsin	1926

The states of Iowa, Georgia and Minnesota have statutes requiring the surrender of the registration certificate to state officials on the sale of a used automobile, while the states of New Jersey, Ohio, Wyoming, New York, Texas and Kentucky have statutes requiring that a bill of sale be furnished the motor vehicle department on the transfer of ownership of motor vehicles.

## 65 Cars Added For Every Mile Of New Highway

There were an average of 65 motor vehicles added to the registration list in 1929 for every mile of highway improved, according to the Oregon State Motor association.

The association bases its statement on increased registrations of 2,108,319 last year, while 32,522 miles of highway were improved during the year.

On the basis of figures reported by state highway officials to the bureau of public roads, the mileage improved in 1929 represents an increase of 8,270 miles over 1928, and includes 7,451 miles of graded and drained earth roads, and 25,071 miles of new surfacing.

Of the 25,071 miles of new surfacing, 14,014 miles were laid on unsurfaced earth roads, 4,337 miles on a lower type of surfacing, and 6,720 miles on the same type of surfacing. The types and mileages of new surfacing are as follows: Sand-clay and topsoil, 2,399 miles; gravel, 12,183 miles; waterbound macadam, 1,642 miles; bituminous macadam, 1,200 miles; sheet asphalt, 116 miles; bituminous concrete, 400 miles; Portland cement concrete, 6,991 miles; and brick and block pavements, 100 miles.

The motor association reports that a total of 314,136 miles of highways were in the state systems at the end of 1929.

This total includes 208,324 miles of graded highways, 28,553 miles of graded and drained roads, and 77,259 miles of unimproved and partly graded highways.

## 30 FOUNTAINS ON STATE HIGHWAY

Oregon Leads the Nation in This Accommodation For Travelers.

SALEM, Ore. (AP)—While the maintenance division of the state highway department takes a lot of pride in its upkeep of the state highways in Oregon, it takes no less pride in a system of drinking fountains erected at roadides in various parts of the state, particularly on the long stretches where habitation is scant.

Oregon is credited with leading all other states in this accommodation for travelers.

The fountains are all of artistic design and add to rather than detract from roadside appearances. All of the cut stone work has been done by Italian workmen who are said to be skilled in this class of work.

**30 Drinking Fountains**

In all there are about 30 fountains. One is located at Viento park on the Columbia river highway near Hood River. Two are located on the Wallowa lake highway and one at Rattlesnake springs on the Old Oregon Trail between Durkee and Huntington. There is another between Fossil and John Day on the John Day highway. One is located at the bottom of Green Springs mountain and another at the top of the mountain, at a point known as Tub springs on the Green Springs highway in Klamath and Jackson counties.

Several fountains bubble on the long Dalles-California highway and there are two on the Mount Hood loop. One of the most unique is at Brushers creek on the Roosevelt highway in Curry county. This is constructed out of the living rock and has the appearance of a natural fountain. Others are located where they will best serve the morning public.

The fountains cost from \$200 to \$300 each.

## CAUTION CUTS ACCIDENT TOLL

Motorists are becoming educated to the dangers of grade crossings and are approaching them more cautiously than in other years, according to a report reaching the Oregon State Motor association. There were fewer accidents at grade crossings the first four months of 1930 than in any corresponding period since 1925, and fewer persons were killed.

## ARTERIAL STOP WISE PRACTICE

One of the best places to make an "arterial stop" is in the driveway, according to a suggestion from the Oregon State Motor association.

A complete stop before passing a driveway or "blind" walkway of the home will protect the motorists wife and children, it is pointed out.

## ROAD HOGS CAUSE WRECK

NEW YORK (AP)—Road hogs are responsible for one-third of automobile accidents. An analysis of 100,000 cases by the New York Automobile club reveals 34,000 resulted from the invasion by one driver of a lane belonging to another.

lowest rate in many years, and companies with 6 per cent in August 1929. Despite a fairly easy condition in the money market, the review said that there was an increased demand for funds from two sources—demand for currency and gold for export.

## Sugar Price Up Ten Cents; Eggs, Butter Steady

PORTLAND, Ore., Aug. 30 (AP)—A 10c advance of the price of sugar by refiners has affected the Portland wholesale price upward 10c also. Prices today were somewhat mixed. Some dealers quoted cane sugar at \$4.70 per cwt., effective today and in some cases not till Tuesday. At least one dealer was asking \$4.90. Beet sugar was given a like rise to sell at 10c less than cane sugar.

Portland wholesale butter market prices here held unchanged and receipts were more liberal. Receivers were reported inclined to hold back on fresh supplies in anticipation of higher prices in prospect with outside markets already higher.

Egg quotations were steady with Friday's with receipts and demand normal. Some storage withdrawals were made.

Review of outstanding conditions in the wholesale fruit and vegetable trade by the U. S. D. A. Market News Service follows:

Trading in all lines of fruits and vegetables was quiet today, due to retailers' investments to be caught with over-supplies on the Labor day holiday.

## WALL STREET ON HOLIDAY THIS WEEKEND

NEW YORK, Aug. 30 (AP)—Except for the banks which were doing business as usual, Wall street was a deserted place today. Security and commodity exchanges were closed, and the thousands associated with the work of the financial district were
