

OVER THE VALLEY

Mabel E. Morton, Valley News Editor
Phones: Residence, Main 966; Office, Main 600

Valley People Wed—
Yesterday afternoon at the Lutheran church in La Grande two very widely known residents of the Grande Ronde valley were united in marriage. Miss Anna Brooks becoming the bride of Mike Royce, prominent farmer of the Summerville neighborhood. The single ring service was read by the Rev. Lief K. Aves, in the presence of the bride's father, S. L. Brooks and her sister and brother-in-law, Mr. and Mrs. Hugh Huron of Brooks Lane. Mr. and Mrs. Royce went immediately to their farm home where they will reside. Little need be said of either the bride or groom in the happy event of yesterday as both have been long time residents of the valley, have been prominent in rural activities and have many friends who will be interested to learn of their marriage. Mrs. Royce is one of the daughters of S. L. Brooks who is one of the prominent pioneers of this section.

To High School—
Miss Madeline Oliver of Dry Creek is planning to enter the La Grande high school, when it opens next week. Madeline will be a senior this year and has taken her first three years' work in the Imbler high school.

Returns from Trip—
Miss Minnie Holman, M. Michelson and daughters returned home the first of the week from their trip to Seattle where they had gone to get Miss Amelia Michelson a county teacher. Miss Michelson had spent the summer in summer school at the University of Washington, doing further work toward her master's degree.

Has Splendid Visit—
Mrs. Charles Gump of Fruitdale has returned from a week or ten days' visit in the other valley, and reports a most enjoyable vacation trip. She accompanied her brother who had been visiting here of the trip and together they visited the sister, Miss Jane Gartin, public health nurse of Lane county and president of the state association of registered nurses. Mrs. Gump and her sister were guests at a number of society affairs in Eugene and also in Portland.

From Halfway—
Mr. and Mrs. Alva Carter and family of Halfway drove into the valley Sunday and were guests at the home of her sister, Mrs. Dillard Choate, and her brother, Miles Woodell, of Summerville and with other relatives in this section.

Has Infection—
R. A. Masterton of Cove avenue, has been having a time with infection in his face, but it is very much better now.

Visits—
Donald Sutton, who has been working in Portland arrived in the valley recently and will make a stay, visiting with his family at the Hugh Huron home.

Family Reunion—
Members of the Gekeler connection are to have their family reunion Sunday, September 7, at River Park. A basket of refreshments will be served at noon. An invitation is extended to the members of the Young train who reside here to join this family in their annual reunion.

Improving—
Among the patients at Hot Lake sanatorium is Miss Amanda Zabel, English instructor at the Eastern Oregon Normal school. Miss Zabel underwent an operation last Friday morning and is making a very satisfactory recovery.

Beautiful Flowers—
Few people who live in La Grande or out of it are familiar with the lovely flowers which Mr. and Mrs. E. A. Bennett have in the yard in front of their beautiful home on Island avenue. They present a glorious sight as you drive past. What you should do is get out of the car and see the flowers close up. The asters, the zinnias with their strange and unusual colors, rare dahlias, roses, gladioli, golden glow—just masses of flowers of many varieties. Flowers are Mr. Bennett's hobby. He is a carpenter by trade and has just completed the new home for Mr. and Mrs. Zack Chandler in Fruitdale which we attempted to describe last week. "After a hard day's work," said Mr. Bennett, "I can come home, work in my flower garden and really rest." Quantities of water together with proper soil are responsible for the response Mr. Bennett has found this season from his flowers. He hauled at least 50 loads of sand and put on the garden last spring, he states.

At the Lake—
Mr. and Mrs. Milo Blokland and daughter, Betty Anne, of Island City, returned the first of the week from Wallowa Lake where they had had a few days vacation at the Garrett Blokland cabin on the Methodist Campground.

To Montana—
Mr. and Mrs. Tom Johnson of lower Cove and their daughter and son-in-law, Mr. and Mrs. Dolph Feibler, of Ladd Canyon, started last week in the wagon car for Townsend, Montana, where they are visiting at the home of their son and brother, who is manager of the J. C. Penney & Co. store there.

A Happy Youngster—
There's another tickled youngster now out in the Iowa district for Helen Jean Speckhart. She has a fine new bicycle and she and her cousin, Lillian Knautz are having grand and glorious times on the road between their homes. More than that, they have ventured farther out in the world and go to school each morning, with their books and lunches in the baskets in front. Lillian and Helen Jean make a great pair and they have long had the habit of doing things together and they do them well, too.

Giving Reception—
Members of the Cove Methodist church and congregation are giving a reception this evening at the church for their new minister, Rev. Calame and family.

To Enterprise—
Miss Beulah Smith of near Island City is starting tomorrow for Enterprise where she will take up her duties next week as English instructor in the high school. She will be accompanied to Enterprise by Mr. and Mrs. Lee Smith, Mrs. Milo Blokland and daughter, Betty Anne of

Island City and Mr. and Mrs. Jesse Griffin of Hoquiam, Washington, who will spend a day at the Wallowa county fair in progress this week.

School Suspended—
In another column on this page there is a volume written in a very few words—"Moss Chapel, Suspended." Moss Chapel school, north of Island City will be closed this year and the pupils will go to school elsewhere—where, not yet decided, perhaps to Island City, perhaps to La Grande. One of the few old brick schools in the county, Moss Chapel has a splendid history, but in keeping with the march of educational progress suspension is necessary. Moss Chapel has always been a good school, it is reported, but the attendance has been very small and the pupils have lacked some of the advantages to be found in schools with a larger enrollment.

Better—
Mrs. Leonard Towle of near Cove who was very ill last week is reported as being much improved at this time.

Visits—
Miss Dorothy Mills of Cove has had for her house guest the last few days, her college friend, Miss Clarice Conklin of Walla Walla.

For Kansas—
Mr. and Mrs. Henry Davis and Mr. and Mrs. Walter Davis are planning to leave tomorrow for their old home in Kansas, for a visit among relatives and old friends after an absence which has been described as "years and years."

Teaching—
After spending the summer at the home of her parents, Mr. and Mrs. C. P. Edvalson up the Catherine Creek road, Miss Stella Edvalson goes to another part of the county the last of the week to take up her second year's work as teacher of the 1st, 2nd and 3rd grades at the school on the border line between Union and Baker counties, and is one of the "joint" schools, that is, it is supported by both counties.

Assistant County Agent—
R. C. Kuehner, former club leader in Clackamas county, is leaving the central club staff at Corvallis to become county agent at Klamath Falls. Kuehner left Oregon City two years ago to become assistant state club leader, serving in that capacity while H. C. Seymour, state club leader, was on leave and then while L. J. Allen took a year off from his work at the college. With the return of these two officials Kuehner has been assigned to Klamath Falls—Corvallis Gazette-Times.

Alice Aid—
Mrs. Ray Fuller, Mrs. Ed Jaeger and Mrs. Wright are to entertain the members of the Alice Aid next Thursday at the home of Mrs. Fuller on the lower Cove market road. Among other features on the program, Ding Buell Lang of Foothill, China, is to be present and will speak briefly.

Guest—
Mr. and Mrs. Archer Antles of Cove had recently as their dinner guests, Rev. and Mrs. Trueblood of Roseburg, Oregon, and their daughter and family, whom they are visiting. Mr. and Mrs. Harlan Koger and family of lower Cove.

Returns—
Mrs. Lillian Weatherford and young son, Donald, who have been making a ten days visit at the home of her mother, Mrs. J. A. Holman near Island City expect to leave tomorrow for their home in Santa Rosa, California.

Coming from Cleveland—
Mrs. Helene Lincoln who lives on the Mill Creek canyon road above Cove is looking forward to the arrival of her sister and brother-in-law, Mr. and Mrs. M. Speth of Cleveland, Ohio, who are coming to this valley to make their home. They have purchased the place where Mr. and Mrs. Lincoln live now, while the latter family will move into the house which they are remodeling just across the road. Mr. and Mrs. Speth are driving out and expect to leave Cleveland about the 15th of this month.

Given Party—
Rev. and Mrs. N. E. Hershey and family who have recently moved into Island City from the Cove were given a reception Tuesday by the members of the aid society. The ladies went to the parsonage and carried with them packages, large and small and with varied contents, which they showered upon the newcomers. Light refreshments were served during the afternoon.

From the Picnic—
People coming more and more to appreciate the Eastern Oregon Experiment station and the hospitality cordially extended by Mr. and Mrs. Withycombe and their assistants. No one possessed it was very hot Wednesday, so cool was it under the rows of trees which are arranged just right for an event such as Wednesday's.

From the Picnic—
The first train in La Grande, How it pulled in on the Fourth of July and whistled for the first time while a typical "Fourth" orator was speaking at the celebration held up in old town and how the entire audience came post haste down

A SEASONABLE RECIPE

MIXED SALAD PICKLES
1 gallon cucumbers (may be ripe ones).
1 gallon red and green mangoes, mixed.
1 gallon apples (that do not cook up too easy).
1 gallon cabbage.
Salt brine.
1 gallon vinegar.
1 quart sugar.
Peel cucumbers, remove seeds and slice in chunks. Peel apples and slice or cut in chunks, also cut cabbage and mangoes, from which seeds are removed, into pieces. Place each in crock, cover with salt water brine (water with salt to float an egg). Soak over night. Drain next morning. Boil vinegar and sugar together. Add cucumbers, apples, etc., and cook until tender but not soft. Seal while hot in sterilized jars.

to see the iron horse. Those at the picnic Wednesday were reminded of that. The ice cream arrived during the afternoon program and when the word was circulated that the ice cream was there, there was a sudden and rapid exit of all the young Americans present, and dishes and spoons were hurriedly located.

Everyone agreed that the crowd was unwieldy Wednesday at the picnic. About the suggestions have been offered. One is to the effect that smaller groups, such as clubs, or granges, etc., eat together. Others have suggested serving tables, with women or girls responsible for the serving. Some plan should be devised to do away with the congestion and expedite the matter of serving.

Some time we want to get Mrs. Withycombe's or Miss Busick's recipe for coffee. At each picnic at the station they make the coffee, just gallons and gallons of it and it is invariably delicious, and the station cream finishes the job.

How interesting the exhibits were—the dainty articles the girls made, the tempting things they had baked or cooked, the garden displays of the Mills boys. Some club leaders worked faithfully and patiently during the months since spring.

In the story yesterday about the picnic we neglected to say that Mrs. W. J. Green of Union was the leader of the cooking clubs which put on the demonstrations so creditably. It is surely provoking to forget that Mrs. Frank McKenna made some crack remark, and it was neither about squirrels nor running off in the ditch. It would not be so bad, for we do not try to remember all of his remarks but we were to get a nice watermelon if we published it and now it is gone forever!

Seriously Frank did some good work with the Imbler Sheep club this year—winners, their record at the Eastern Oregon Livestock show when they exhibited 63 head of registered animals and their record on Wednesday when they made first place in the judging contest.

There was a something missing Wednesday at the picnic, now we know what it was. Mrs. Avery was unable to be present, because Harriett was ill. Mrs. Avery is a good executive and keeps things going around the dinner hour at the 4-H club picnics.

We missed Mrs. Edith Phyl's songs, too, this year. She always adds much to the programs. However she was represented by her daughter, Miss Margaret who furnished some of the accompaniments. If C. Seymour, state club leader was an enthusiastic visitor. Mr. Seymour comes often to the valley and has many warm friends in the part of Eastern Oregon. In conversation, Mr. Seymour was speaking of Miss Claribel Nye, state leader of home economics extension. Miss Nye came to Oregon last February and has never yet visited our part of the state. However she is billed to be in this valley the week of September 29 to discuss the matter of having home demonstration agent in Union county. Saying this may be telling tales out of school but there is much more to be said about Miss Nye and her work and the speaker, which will soon bring her to Union county.

Stock Shipments—
According to the Record-Chief, stock shipments last week from Enterprise alone were very heavy. Stock shipments were again in good volume Saturday, with sheep and lambs an increasing factor. From Enterprise the following were shipped:

Harold Edgman, 2 cars of cattle.
J. H. Tippet, 3 cars of cattle, one for Portland and 2 for Walla Walla.
George S. Craig, 1 car of cattle.
Chris Tippet, 1 car of horses for feed.
William Dobbin, 6 decks of lambs for the east.
Tom Boylan, 6 decks of lambs for the east.
Marketing association, 1 car of hogs and one car of cattle.
From Joseph the Mart Flat cattle were shipped out Saturday, consisting of 7 cars shipped by Earl Warnock, Elmer Warnock, Charles Crader and Jake Marks.

Health Talks
GUARD AGAINST DEAFNESS
Most deafness starts in childhood, and much deafness can be prevented. Every parent and every guardian of the young ought to know the common causes of deafness.

Neglected running ears, hardened ear-wax, enlarged and diseased tonsils and adenoids, and neglected colds may cause deafness.

Deafness may also result from such diseases as scarlet fever, measles, diphtheria, mumps, the grippe, syphilis and meningitis. A child subjected to any of these should have its ears examined both during and after the disease period.

All foreign substances should be kept out of the ears, particularly hair-pins, matches, buttons, oils, lotions, etc.

The older person whose hearing becomes impaired frequently perceives the advance of the impairment in the difficulty which he finds in "catching" what is said to him. Children, however, may be deafened without appreciating their disability.

Hence if a child manifests inattention, frequent mistakes in carrying out instructions, faulty articulation of speech, or weariness and exhaustion before the day is half over; if the child tends to avoid people, to seek isolation, suspicion ought to be aroused. The child's hearing should be tested.

A preliminary test of hearing may be made in the following manner: Stand the child about 20 feet from the examiner. Have him face away, and have him close one ear by covering it with the palm of the hand. Address the child in a whisper, and have him repeat what he hears.

At 20 feet distance a child with normal hearing will be able to hear and repeat what is whispered to him. If he is unable to hear, or his repetition is incorrect, approach the child closer, still whispering, and note the distance at which he hears correctly. Test both ears this manner.

Stand the child about 20 feet from the examiner. Have him face away, and have him close one ear by covering it with the palm of the hand. Address the child in a whisper, and have him repeat what he hears.

At 20 feet distance a child with normal hearing will be able to hear and repeat what is whispered to him. If he is unable to hear, or his repetition is incorrect, approach the child closer, still whispering, and note the distance at which he hears correctly. Test both ears this manner.
