Egg Prices On Monday Remain; Apples Moving

PORTLAND, Jan. 27 (AP)—Despite Monday's two cent decline in the wholesale egg market dealers characterized the market tone as easy at today's opening with demand from retailers fair. Receipts continued more than ample. Ruling quotations were unchanged.

Butter market ruled steady at unchanged quotations with continued inquiry for 89 to 91 score cubes. A minor portion of fresh receipts went to storage.

Local trading in the fresh fruit and vegetable markets was of normal volume at around steady prices. Government market news service reported:

Carrot movement of spring cauliflower will start from the Roseburg district in about ten days, under present mild weather conditions. Limited volume of cuttings is being obtained now. Quality promises to be excellent, with an anticipated movement of about 100 carloads.

Sales of Home Beauty apples show considerable increase in numbers in Yakima and Wenatchee districts, although at low prices. Portland's apple situation remains about unchanged, with cheap ungraded stock representing the majority of the movement. Considerable volume of wrapped and packed Spitzbergen apples is in storage here, and local distribution of this stock will prohibit sale of Washington Winesaps here, for several weeks yet.

California spinach has declined materially, due to increased local production.

Jolson's Brother Shuns Stage To Work at Counter

ATLANTA (AP)—George Jolson, Al's younger brother, has yielded to parental persuasion and is going into business.

George, who has a smile as broad as that of his famous brother, was found recently in a corner drug store in Atlanta mixing powders and pills and waiting on customers.

Harry Jolson, another brother, left home and broke into a theatrical career over parental objections. Al did likewise.

Although displaying some talent of his own, George had another purpose in mind when he left home.

"I came down here on a sort of pleasure trip," explained the young pharmacist. "You know how it is with a young fellow. He wants to get out and see something of the world."

"I studied pharmacy in college, and while down here I decided to take the Georgia pharmacy board's examination. I passed it, and I have had my job about a month. It was a pater's idea that I ought to go into business, and I guess he is right. Anyway, I like business."

George admits that he can "dance and sing a bit," and that some appearances in college shows brought him "attractive offers" to go on the stage.

"But Al and Harry are enough in one family," he says.

There are five brothers and three sisters in the Jolson family. The father, M. R. Jolson, of Washington, D. C., is a former rabbi and now a wealthy real estate owner. One brother, "Mike," has displayed talent as a radio singer.

Milk Bills To Be Introduced By Joe Dunne

SALEM, Jan. 27 (AP)—The drink question will come before the present Oregon legislature. It will pertain to milk, however, and not to alcoholic beverages.

The issue is coming up in a series of bills to be introduced by Senator Joe E. Dunne of Portland, providing for the grading of dairy products.

Most of the proposed regulations are not to be compulsory on producers and dealers, but will require that products must come up to the fixed grade specifications if they are represented to be of particular grades.

Senator Dunne has begun with an attack on the oleomargarine trade. His first gun was fired last week when he introduced a measure providing that colored oleomargarine can not be sold either as butter or as a butter substitute. His second was yesterday in a bill to prohibit the use of oleomargarine in state schools and institutions.

Relative to butter, Dunne plans to introduce a bill that would adopt for Oregon the federal butter grades. A cream bill will provide first and second grade and an ungraded classification of that commodity. A proposed milk bill will provide the usual A, B and C grades, its provisions not compulsory except upon persons professing to sell those grades. Under one of his bills confectioners selling malted milk would be required to show whether their product was made of ice cream or merely of frozen milk. He declares that in Portland there are only two places where malted milks, made of ice cream can be bought.

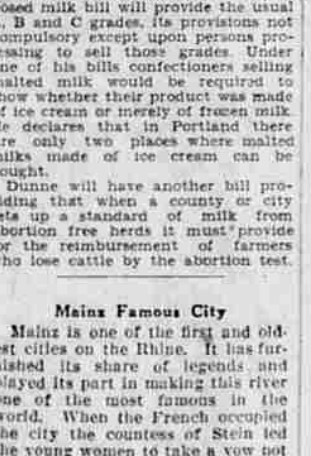

Dunne will have another bill providing that when a county or city sets up a standard of milk from abortion free brands it must provide for the reimbursement of farmers who lose cattle by the abortion test.

Main's Famous City

Main is one of the first and oldest cities in the Idaho. It has furnished its share of legends and played its part in making this river one of the most famous in the world. When the French occupied the city the countess of Stein led the young women to take a vow not to listen to a word of love from any man until the country was rid of the invaders. Fired by the courage of the countess, the young men succeeded in sweeping the enemy from their land.

"Isn't it an absolute fact," demands a cantankerous Cantuck of the Border Cities Star, "that a man who gives in, when he knows he is right, is weak?" "Not necessarily," dissented the editor; "perhaps he's married."

LIFE LIKELY ON VENUS AND MARS, BELIEF

CAMBRIDGE, Mass., Jan. 27 (AP)—Dr. Leon Campbell, instructor of astronomy at Harvard university, today supports the theory that the planets Mars and Venus have some forms of life.

With others at Harvard, Dr. Campbell is making a close study of an asteroid or planetary fragment and it was in this connection that he gave his opinion concerning habitation of other planets in the solar system.

"Our work," Dr. Campbell said, "proves that Mars is not a cold planet in the sense that it has not life. Atmosphere as determined on Mars are found to be livable. The temperature in the middle of the day is sixty degrees above zero Fahrenheit. It ranged downward 100 degrees. The same range exists on our planet, but the temperature does not drop 100 degrees in a single day here as it may on Mars."

"Yes," Dr. Campbell said, has about as good a chance of sustaining life as does Mars. I have seen markings there as well."

Eleven airplane landing fields and 14 shelter cabins were constructed in Alaska last year.
