WEATHER
A winter of unusual mildness interspersed with periods of almost summer warmth in many parts of the United States has set many people asserting once more that the climate has changed.

ENCOURAGING
Invasion of the stock market by the bulls after a bear market of great intensity is of greater significance than appears on the surface. CHAPTER II
BILL AND MARJORIE
IF the coroner's suggestion that the image might have fallen of itself were correct, there would be no mystery, but Constable Roscoe, after a brief hesitation, reported that an examination of the broken legs of the statue had revealed no black edges indicating cracks. The jurors examined them, and the conclusion was unanimous that the image had been pushed over.

They, too, probably the president remembered that his military side was familiar with that section of the country. Colonel Hodges' home is near that part of the south. He was born and reared in the northern part of Louisiana, near the Arkansas line, and has known that area in the days when times were good as well as bad.

BROAD STATEMENTS
We do not inhumanly that some business are untruthful. We do not even attempt to account for it. But the fact remains that we see so many "Sales" and so many "Remarkable Values" that we are led to wonder. How much effect do such statements have on you as a buyer? Is anything "free" when you have to buy something else to get it? Do you believe that the "Biggest Sale in the History of the State" is really that?

ROSEBURG, Ore., (AP) - Even the best poultrymen are having hard sledding at the present record prices. But L. S. Compton, Drain farmer, is demonstrating that even now a well organized and operated poultry farm will return some margin for labor.

In Washington
By Herbert Finerman
WASHINGTON - It would seem that by this time President Hoover would have heard plenty about conditions in the drought-stricken areas of the country.
And yet he has sought further information by dispatching his personal military aide - Lt. Col. Campbell B. Hodges - by plane to the area with instructions to bring back to him a first-hand report on what he sees.
Just what the president hoped to learn through Colonel Hodges no one seemed to know.
Since the drought itself last summer, conditions in the stricken area have been detailed in every conceivable manner in Washington. The disturbance at England, Ark. has been the theme of countless speeches in both houses of congress. The

Has Army Viewpoint
It may be viewed that Mr. Hoover suddenly realized that within his own official family he had one who could furnish him information of the kind he particularly desired.
Colonel Hodges is a military man. He has spent his whole life in the army. He looks at things in a military way. He wears the distinguished service medal for his service as chief of staff of the 31st division during the World War.
The King of Spain conferred on him the Order of Military Merit as the result of his work as military attaché of the American embassy in Madrid for three years. He wears the Medal of Peace for his presence in Moscow during the revolution in 1923-25. He so impressed General MacArthur that he had him visit to this
