Wheat Markets Are Weakened by Heavy Shipments

WASHINGTON, Mar. 23.—Wheat markets weakened during the week ending March 21, and domestic future prices for new crop deliveries declined to new low levels for the current season, influenced principally by heavy southern hemisphere and Russian shipments and generally favorable prospects for the new 1931 crop in the northern hemisphere, according to the grain market review of the U. S. bureau of agricultural economics.

Corn and other feed grains held about steady, with moderate offerings meeting a fair demand at the principal markets. Rye remained featureless and practically unchanged. Flax was steady, although a somewhat easier tone developed toward the close of the week, as a result of some slackening in demand for oil.

Favorable Growth.

Winter wheat continued to make favorable growth in the central and southwestern sections and the crop is four to six inches tall in Kansas and Oklahoma. Beneficial rains and snow were received in spring wheat areas, both in the United States and Canada and spring plowing and soil preparation is far advanced over the average of other years. Sub-soil moisture is lacking however, and timely spring and summer rains will be needed for satisfactory growth. Weather conditions in Europe continue generally favorable and field work and spring sowing have made good progress. Winter seedings are generally in good condition, although slight frost damage has occurred in Germany and some injury from floods is reported in France. Winter grains are in good condition in the Lower Danubian countries and crop prospects in Italy and Spain are excellent. Recent abundant rains have improved the out-

Wheat Markets Are Weakened by Heavy Shipments

look in North Africa. Harvesting in India progressed rapidly under favorable weather conditions and recent trade advices indicate an outturn above earlier expectations.

Press Offerings.

Exporting countries continue to press offerings on world markets and Australian shipments during the past two weeks exceeded those of any other exporting country. Shipments from that country during the past week totaled 5,356,000 bushels of which about half was reported destined to the United Kingdom, Europe and on orders and the remainder destined for the Orient. Purchases of 15 cargoes of Australian wheat by the Orient during the week probably constitute a record for this trade and indicate the sharp competition which American offerings will meet in that area. These Australian sales were reported to be at prices equivalent to about 43c at Puget Sound markets in the American Northwest. Argentine shipments were also of good volume, totaling 3,363,000 bushels, while Russian shipments amounted to over 2,500,000 bushels. Large quantities of wheat and flour were shipped from North America, principally of Canadian wheat. World shipments totaled 18,800,000 bushels and stocks on ocean passage, including wheat and flour afloat to the United Kingdom and continent and "on orders," but excluding Australian shipments to the Orient, were increased to a little over 56,000,000 bushels, which is materially above a year ago, but lower than for other years since 1926. The world visible at the first of March reached a new high record, according to trade figures, and totaled approximately 630,000,000 bushels, which compares with 602,000,000 bushels at the first of February, and 551,000,000 bushels March 1 last year.

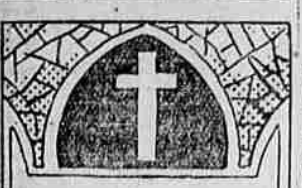

European import inquiry continues only moderately active, with buyers generally meeting only current needs. Stocks of native wheat in Europe however, are low and marketings are of only moderate volume. German offerings increased under the stimulation of rumors of a probable reduction in tariff duties. At the close of the week native wheat at Hamburg was quoted at 1.93 1/2; French wheat at Paris at 1.18 1/2; Italian wheat at Milan at 1.14 1/2; and Danish wheat at Copenhagen at 77.

Coast Markets Dull.

Pacific coast markets were dull, reflecting the lack of export outlet and a slow domestic demand. Prices held about unchanged. Marketings decreased sharply at Portland and Seattle, but storage space at terminals was being rapidly filled. Domestic flour mills were in good condition, and wheat and export mills were absorbing moderate quantities for grinding into export flour, small sales of which had been made to the Orient. Native wheat put on the market in excellent condition for spring sowing and improved the winter wheat crop, which is now in fine condition. At the close of the market March 20, No. 1 hard white Big Bend bluestem was quoted at Portland at 60c and at Seattle at 60c per bushel. No. 1 soft and western white at both markets at 67 1/2c, and hard winter, northern spring and western red at 65 1/2c sacked. No. 1 Manitoba northern was quoted at Vancouver at 61c. No. 2 at 55c and No. 3 at 49 1/2c per bushel. Vancouver shipments since August have totaled 50,000,000 bushels, of which 35,000,000 bushels have gone to Europe and the balance principally to the Orient.

Backache Bother You? It May Warn of Disordered Kidneys.

If miserable with backache, bladder irritations and getting up at night, don't take chances! Help your kidneys at the first sign of disorder. Use Doan's Pills. Successful for more than 50 years. Endorsed by hundreds of thousands of grateful users. Get Doan's today. Sold by dealers everywhere.

Lessening Sadness

Is the first duty of the Funeral Director. Our excellent system of arranging the details for each and every funeral entrusted to our care leaves with those upon whom we wait a feeling of confidence and satisfaction that the last offices were performed with such perfect harmony as to greatly lessen the sadness connected with such an event.
