IMPROVED METHOD OF ROASTING COFFEE IMPRESSES CRITICS

Controlled Roasting Creates Definitely Superior Flavor in Hills Bros. Coffee

Critical people, who search for a perfect coffee, usually come to their journey's end when they taste Hills Bros. Coffee! It has a flavor no other coffee has—a flavor none can equal! This is because of Controlled Roasting—Hills Bros.' patented process. It keeps Hills Bros. Coffee free from the unsatisfactory flavor-impurities so often secured by ordinary, bulk methods.

As the accuracy of the hour-glass depends upon an even, continuous flow... a little at a time... so the matchless, unvarying flavor of Hills Bros. Coffee is produced by this patented process that roasts evenly, continuously... a little at a time.

Here's what happens: every berry is roasted to the right degree. None is underdone, none is overdone. As a result, Hills Bros. Coffee has the perfect flavor that never varies! Drink Hills Bros. today. You'll delight in its savory flavor. And that flavor is always the same—it never varies!

TROOPS PARADE AS PARIS CELEBRATES ARMISTICE
