

More Weakness Noted Today In Butter Market

PORTLAND, Dec. 30 (P) — There was further weakness in the butter market at Pacific coast points for the day with more or less shading of established prices continued. This applies not only to the local market but to the coast generally and there is also more or less easiness expressed in the entire American trade. Mild weather has had the effect of stimulating production in most centers and this has been aided considerably by extreme sluggishness of the milk demand. Much milk that formerly went into fresh consuming channels is being churned in practically all parts of the country.

Perhaps the chief weakness expressed in the price along the coast has been at San Francisco where a further late sharp decline has been forced in the price.

Butterfat values here continue depressed.

Weakness in the egg market is now practically general throughout the country. Lower prices here during the day were the result of depression and price shading elsewhere.

Higher prices are being named for live chickens. Heavy and medium weight hens are generally higher along the whole coast.

Advance in the poultry market is general. Sales of heavy hens are being made to killers at 18¢ to 19¢, medium 17¢ to 18¢ and lights 15¢ to 16¢. Ducks are scarce but there is plenty of geese in sight.

General advance in the price of country killed calves is showing here with sales 10¢ to 11¢ generally for tops. Hogs are more active. Lamb call is excellent; mostly at a dime a pound.

PORTLAND, Dec. 30 (P) — There were quite liberal offerings today on the east side farmers' wholesale market. Demand was much better indicating general buying for the New Year's trade.

Demand for root vegetables was keen with practically no change in the price list.

Cauliflower was firmer with some sales 85¢ to 90¢ for real is.

Cabbage was a trifle slow; mostly 60¢ to 65¢ crate.

Green onions found a good call at late prices.

Apples were in supply and sold slowly at recent values.

Potatoes were slow but steady as to price.

Celery demand was good but little real quality was available.
