In a statement issued at national headquarters, the W. C. T. U. asserted the Raskob's "essential error" was in the belief that a resubmission plank would take prohibition out of politics. Health

DISEASE FIGHTING DISEASE One of the remarkable achievements of modern medicine is based on the treatment of one disease through the agency of another. Progressive paralysis, known too as dementia paralytica, and general paresis was one of the diseases which puzzled the medical profession for many years. The cause of this distressing and pitiful condition was demonstrated by the late Dr. Noguchi less than 20 years ago. He found the germ of syphilis in the brain tissue of those affected and proved what has been surmised before that progressive paralysis was due to the damage done to the brain by this disease. This established the cause but little furthered the treatment or cure of the disease. Ten years ago Osler's text book on medicine said of the disease that it rarely ends in recovery. "As a rule the progress is slowly downward and the case terminates in a few years, although it is occasionally prolonged 10 or 15 years," he said. Ten years ago Dr. Wagner-Jauregg of Vienna instituted a treatment for this condition which involved the giving of the disease malarial to the sufferer from progressive paralysis. As is well known, malaria causes high fever. And, as experience has shown, this high body temperature, and perhaps other and still unknown factors, effect a destruction within the

IDAHO'S LIBERAL DIVORCE STATUTE FAILS TO ATTRACT

COEUR D'ALENE, Idaho (AP)—This lake-locked city's dream of becoming the "divorce capital" of the northwest has faded. When the Idaho legislature passed the 90-day law nearly a year ago, business men started elaborate preparations to attract divorce seekers. Heavily timbered mountains for hiking, a crystal clear lake for boating and swimming, a variety of winter sports and climate in general were to be capitalized. But Nevada passed a "six-weeks law." Nearly a year after the Idaho law was passed, an observer and optimist of a year ago said, "We've had only one promising prospect. She was from New York, and we understood she came here for a divorce. Then one day her husband came, found their children in the park and drove away with them. The woman left next day."

APPENDICITIS RARE AMONG INSANE

SPRINGFIELD, Ill. (AP)—In Illinois there are few cases of appendicitis among the inmates of state hospitals for the mentally afflicted as compared with the same number of normal persons. Dr. S. W. McKelvey of the department of public welfare attributes this condition to regular meals and care of diet. The first step in organizing the United States navy was made in 1775.

SAYS FATHER NOT SO MUCH IN HOUSEHOLD

EVANSTON, Ill., Jan. 7 (AP)—After observing the operations of a Northwestern university clinic, designed to insure happier and more permanent marriages, Prof. Ernest R. Mowrer has come to the conclusion that father in the present day family is nothing more than a household football. And the old idea that children should be seen and not heard had passed into discard the professor said yesterday. "Father," he added, "is lucky nowadays. If the children look upon him as something other than a meddling outsider or an ally to be catered to when support is needed to overcome the wishes of the mother!" Prof. Mowrer, who is connected with the university's department of sociology, said he held to the belief that the American family has disintegrated faster in the last decade than at any other period in history.

EFFECTIVE CALL FOR HELP

Riot squads and detectives rushed to his residence after excited neighbors called headquarters and reported much shooting. Officers broke into the building. On a bed lay the aged negro, pistol in hand. He had fired six shots into the ceiling. "Gentlemen, I certainly thank you for coming," Lyle said. "I've got the misery in my stomach and I am powerful sick and I had to get somebody here somehow."
