Billings for their alleged complicity in the preparedness parade bombing here in 1916 made a general denial Friday of charges in the report on the case, disclosed in the United States senate.

Fickert said every effort was made to find the perpetrators of the crime and that he and his staff and the police and newspapermen worked day and night for months.

The former prosecutor denied the case was turned over to a private detective.

Denial also was made that searches of homes were made illegally or without good reason or that the prisoners were held incommunicado. Fickert was emphatic in his denial that an effort was made to arouse public prejudice against Mooney and Billings.

"It was handled like any other case," Fickert asserted.

The meeting went on record as opposed to a 100-foot right of way except where absolutely necessary. The demand was made that the open ditches be tiled and it was said the highway engineers could put men to work within a week to prepare for a three or four lane highway.

They then agreed to name a subcommittee of seven to study legislative remedies of the problem.

What's New in the New Chevrolet Six

When you read what's new in the new Chevrolet Six, you, too, will agree it's the Great American Value for 1932: Syncro-Mesh and Free Wheeling combined for the first time in a low-priced car! Engine and chassis improvements that raise performance to new heights of power, speed and smoothness! The

finest Fisher bodies Chevrolet has ever introduced. And the same qualities of reliability and economy that have won the approval of millions of Chevrolet owners. All these you will find in the new Chevrolet Six at one of the lowest prices in the market! That's why the new Chevrolet Six is called the Great American Value for 1932.

Syncro-Mesh Transmission

This well-known feature of high-priced cars brings new handling ease and car control to the low-price field. Syncro-Mesh permits you to shift gears with marvelous quickness, quietness and ease. As a safety factor, it is especially valuable. For it enables you to shift rapidly from high back into second, any time you want to use the engine as a brake.

A Smoother, Improved Six-Cylinder Engine

New thrills await you in the Chevrolet Six—new power, pick-up, smoothness and speed. For Chevrolet's valve-in-head engine now has down-draft carburetion, a new cylinder head, new manifold, a counter-balanced crankshaft and rubber mounting, features that increase power 20 per cent to 60 horsepower.

Simplified Free Wheeling

Chevrolet Free Wheeling is a new and advanced type, extremely simple in construction. You may take advantage of its thrills by simply pressing a button on the dash. Until you pull the button out again, you are "in" Free Wheeling. You coast along on momentum, when your foot is off the accelerator. And you shift with magical ease.

65 to 70 Miles an Hour and Faster Acceleration

New features in Chevrolet's six-cylinder engine enable it to develop 65 to 70 miles an hour and give it a stop-watch acceleration from 0 to 35 miles in 6.7 seconds.

Distinctive New Front-End Appearance

A new chromium-plated radiator, built-in radiator grille, double tie-bar, trumpet-type horn, and bullet-type headlamps form a striking front-end ensemble.

Stabilized Front-End Mounting

A new method of mounting front fenders, lamps, double tie-bar and radiator to the frame—exclusive to Chevrolet—gives a fine feeling of steadiness on rough roads.

Smart New Fisher Bodies

The new Fisher bodies are the smartest ever to appear in the low-price field. Their famous wood-and-steel construction is even stronger and quieter. All occupants enjoy greater vision.

Down-Draft Carburetion

The down-draft carburetor is a big factor in Chevrolet's finer performance. An intake silencer and heat control device are combined with it for greater quietness and efficiency at all speeds.

Finger-Touch Front Seat

An interesting convenience in the Fisher Bodies is the new adjustable front seat. A touch on a lever enables you to move the seat to any position. This is exclusive to Chevrolet in its field.
