## PILES ALL GONE

Without Slices or Cutting Itching, bleeding, protruding piles go quickly and don't come back, if you remove the cause. Bad blood circulation in the hemorrhoidal veins causes piles by making the affected parts weak, flabby, almost dead. Slices and cutting fail because only an internal medicine can actually correct these conditions. Dr. J. S. Leonard discovered a real internal Pile remedy. After prescribing it for 1,000 patients with success in 980 cases, he named it HEM-ROID. Red Cross Drug Store says one bottle of HEM-ROID Tablets must end your Pile misery or money back. —Adv.

## University Women Working For Peace

The American Association of University Women, of which there is an active branch in La Grande, is among the organizations of the United States actually taking steps to bring about disarmament and peace among the nations of the world, officers of the local branch have pointed out. The association recently circulated petitions in behalf of the national committee on the Cause and Cure of War, and some 21,000 signatures were secured and will be presented to the disarmament conference in Geneva on Feb. 2. Miss Mary Emma Wooley, president of Mt. Holyoke college in Connecticut, has been appointed as an American delegate to the conference. A mass meeting on disarmament called in Washington by the Women's International League for Peace and Freedom, on Jan. 10, paid special honor to Dr. Wooley, and at the end of the meeting she called upon the people of America who want the disarmament conference to succeed to exercise patience with the work of reducing armaments and to persevere in keeping their demands for reduction constantly before the government. Associations of University Women throughout the United States are attempting to keep the eyes of the government on their demands. Miss Helen Moor, local president, states.

# It's got to be good to be ADVERTISED

All the king's horses . . . and all the king's men can't make a success out of a bad product. No amount of advertising will create a market for it. The more it's advertised, the more its defects become known. But a good product well advertised grows as swiftly and naturally as a healthy plant. People try it and like it. They tell others. **They** like it. Soon that product is found everywhere . . . and its name, spread abroad by advertising, is on every tongue. When you see something widely and consistently advertised, you can be pretty sure it's well worth having. If it weren't . . . if it didn't represent an honest and worthy value . . . the maker couldn't afford to advertise it. Look over the advertisements in this paper. Some of these names you know. Others perhaps are newcomers, potential friends bringing some new comfort or convenience. But all are entitled to your trust . . . all are here because they have something real to contribute to your advantage . . . your service . . . your happiness.
