

U. S. And Chile Try For Peace In Chaco Area

SANTIAGO, Chile (AP) — Renewed joint efforts by the United States and Chile to bring about a more friendly spirit between Bolivia and Paraguay in the Gran Chaco boundary controversy, have clarified some of the contingent problems.

Most of Chile's negotiations have been through Miguel Cruchaga, ambassador in Washington, but Carlos Balmaceda, foreign minister, has just completed here a series of conferences with the Bolivian and Paraguayan envoys.

In them he emphasized that the two republics can count upon Chile's aid at any time in attempting to solve any problem and that general South American peace is the main-spring of this country's policy.

Praise For Americans
Official circles note with the word "exceptional" the assistance given by W. S. Culbertson, American ambassador here, and by Edward F. Peely, American minister at La Paz. Mr. Peely has for a long time handled the Bolivian end of neutral joint action.

This government's neutrality means that Chile will respect fully article 6 of the treaty of 1904 which gives Bolivia the right to transport what she desires, whether it be arms or what not, by way of the Arica-La Paz railroad.

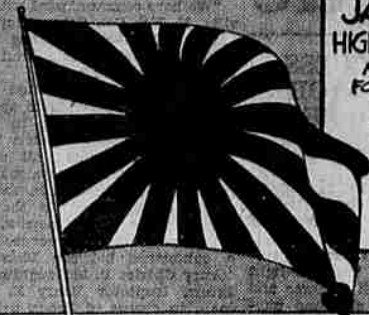

This provision has been for Bolivia a sort of "corridor to the sea," a right to transport into her territory whatever may be marked for Bolivia and discharged by a steamer at the Chilean customs house in Arica. This neutrality is upheld also by Tito V. Lisoni, chairman of the foreign affairs committee of the chamber of deputies.

Expect Bolivian Aid
In return for this re-affirmation of neutrality, which was given Bolivia recently through diplomatic channels, according to reliable information, Chile believes Bolivia will give the fullest co-operation and that this will lead to more effective joint effort in the task of trying to straighten out the old Chaco puzzle.

Paraguay, which always has had a close relationship with Chile, many Chileans having settled there, will continue to receive this government's friendly aid in all her international problems where Chile may have an interest.

California's tallest redwood tree measures 304 feet.

THIS CURIOUS WORLD

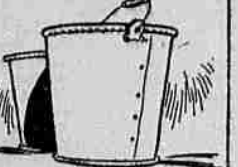

JAPANESE HIGH SCHOOL GIRLS MADE A FLAG FOR A JAPANESE REGIMENT, AT SHANNAI, AND DIED IT RED WITH BLOOD FROM THEIR OWN FINGERS.

— ZUNGO OBSERVER —

..LADDIE BOY..

THE SMITHSONIAN STATUE OF PRESIDENT HARDING'S DOG, WAS CAST IN BRONZE, MADE FROM 19,314 PENNIES, NEWSBOYS IN EVERY SECTION OF THE UNITED STATES CONTRIBUTED TO THE FUND.

A FEW BUCKETS OF WATER TIED UP THE HARBOR OF NEW YORK CITY FOR 48 HOURS. ... 1928 ... THE WATER WAS DISTRIBUTED OVER THE HARBOR AS FOG.

© 1932 BY NEA SERVICE, INC.

A CUBIC MILE of fog may contain scarcely a gallon of water. The small particles making up a fog are so minute that it takes some 25,000, placed end to end, to make an inch. In May, 1928, dozens of ships were held up for two days in the harbor of New York City, and there was one collision after another. "Silence Zones" sometimes occur in a fog and add to the dangers of navigation. Within these "fog" zones a foghorn may not be heard only a short distance away, but will be plainly audible at much greater distance. Patches of uneven temperature and humidity are believed to cause this condition.

Health

IMMUNE SERUM IN POLIO
From various sources there have appeared contradictory reports on the effectiveness of immune serum, that is serum taken from those who have had infantile paralysis, in the treatment of the disease.

This has led some to conclude that the treatment failed. Such a judgment, according to those best informed on the subject, is premature and not warranted by the facts.

Experimentally it has been shown beyond all doubt that immune serum can fix, that is, render incapable of causing disease, the virus of polio. The experimental treatment of the disease however is one thing, and its practical treatment in the human quite another.

The scientist working with monkeys knows when the animals were infected and also that the symptoms he witnessed are caused by the polio virus.

The physician called in to treat a child must first determine at the cost of a good deal of effort the nature of the ailment, and if he decides that it is a case of polio, he is seldom in position to know how long ago the child was exposed.

It appears, however, that time is the very essence of the treatment of poliomyelitis with immune serum. When the virus has made its way into the nervous system and has invaded the nerve cells, it is too late for serum.

This is not peculiar to polio. We witness the same thing in the use of anti-diphtheria immune serum. To be effective the serum must be used early in the disease before the toxins have affixed themselves to the tissues of the body.

In diphtheria, however, there is a larger safety margin of time which is lacking in polio.

The present recommendations are to inject into the body larger doses of serum in the very earliest stages of the suspected case and simultaneously or subsequently to inject serum into the spinal canal.

SHERLOCK BEGINS TO STARE WHEN PLACED ON SECOND

SAN FRANCISCO (AP) — Having found what appears his proper position, baseball men on the Pacific Coast believe Vince Sherlock, sparkling second baseman of the San Francisco Mission club, is headed for the major leagues.

Sherlock's big trouble the past two years seemed to be in finding his most suitable place. Manager Joe Devine of the Missions apparently discovered his rightful spot at the keyhole sack and he is being groomed for faster company.

Vince had trials with the Phillies and Augusta in 1930 and with Chattanooga last season before gaining a steady job with Tucson of the Arizona-Texas league, where he batted .310 and played infield and outfield positions.

He is a brother of Jack Sherlock, first-baseman of the Hollywood Stars.

"ILLINOIS FIELD" PASSES

URBANA, Ill. (AP) — Historic "Illinois field," scene of hundreds of varsity athletic events of the University of Illinois, will soon become a mere recreation field, as new bleachers and stands are being constructed on a new field nearer the football stadium.

CIRCUS TICKETS

Given to Boys and Girls

URANGI DISTRICT in FRENCH EQUATORIAL AFRICA, where the TRIBE OF MONSTER-MOUTHED SAVAGES Was Discovered.

NOTE:—A new subscriber is one to whom the Observer has not been furnished for 30 days past. A change of name at the same address is not a new subscription. A renewal is not a new subscription.

IT'S EASY GET BUSY

Let's Thaw Out FROZEN DOLLARS!

"Credit is the blood stream of our economic life. Restriction or destruction of credit cripples the revival of industry, commerce and employment."
—President Hoover

THE President estimates that hoarded money—money withdrawn from circulation—amounts to \$1,500,000,000. A patriotic appeal is being made to all citizens to restore this money to circulation.

But hoarded cash is only a drop in the bucket compared to the billions of dollars tied up in hoarded credit—in unpaid bills! Millions of people in this country who can afford to pay—and don't—are working untold hardships on their retail stores, their physicians, their dentists, by withholding payment of their bills long after they are due—

Working hardships on everybody, even themselves, because credit works in circles, through the retailer, the wholesaler, the manufacturer, back to the worker and the consumer.

Let's thaw out those frozen dollars! Idle dollars won't put idle hands to work!

If all of us would pay up our unpaid bills now, it would put billions of dollars back into circulation, would stimulate business, would put millions back to work, would hasten the return of prosperity.

Pay your bills now—as a patriotic duty—as a just obligation to your creditors . . . your country . . . yourself!
