I have fought a good fight, I have finished my course, I have kept the faith. Henceforth there is laid up for me a crown of righteousness. — 2 Timothy 4:7.

PRIMARY ELECTIONS

Last night was a sleepless night for many citizens — politicians, election boards, newspaper men, and persons interested in favorite candidates. Returns continued to flow into the office all during the night and on into the daylight hours this morning.

Today the public sits back and considers the results of the voting. The most important office on the ballot was, of course, the presidency of the United States.

So we must turn to state politics for any indication of the trend of the times. And the most significant phase of the state voting was the re-nomination of such a large proportion of the present office-holders.

This dominant tendency to retain the services of those already in office is really an encouraging sign. It proves that there is no danger of a revolution — absolutely none!

In many nations elections are causing revolutionary changes in governments and the men who guide their destinies. Untried experiments are holding sway in formerly conservative countries.

Some Japanese statesmen have attempted to point out that war with any first class power would be suicidal for Japan at the present time.

WOMAN FLIER LANDS TODAY IN IRELAND

trip across the Atlantic. In June, 1928, before her marriage to Mr. Putnam, she made the crossing, that time a passenger.

AN ADVENTUROUS LIFE NEW YORK, May 21 (AP)—Amelia Earhart, transatlantic flier, has crowded enough activity into her 34 years to make careers for several women, or men for that matter.

War nurse, commercial photographer, social worker, aviation company executive, magazine editor, teacher, member of numerous aviation committees, are all part of her experience, as well as her mastery of the art of flying.

and is an honorary major in the 381st aero squadron. Although she is best known as the first woman to fly across the Atlantic, a distinction she gained June 18, 1928, when she crossed from Prespey, N. F., to Burryport, Wales in the tri-motored monoplane "Friendship" with Wilmer Stultz, pilot, and Louis Gordon, mechanic, she also has made a transatlantic round trip in an autogyro.

She was born at Atchison, Kan., in 1898. Her father, Edwin E. Earhart, is an attorney in Los Angeles. She has one sister.

Joined Red Cross After graduating from Hyde Park high school in Chicago, she went to Ogontz school for girls in Philadelphia. Before finishing her course she left and joined the Canadian Red Cross in 1917 as a nurse's aid for war service.

After the war she entered Columbia university to take a pre-medical course and a year later went to California.

It was in California that she became interested in aviation as a recreation. She owned two planes and piloted 500 solo hours in her aerial pleasure jaunts about Los Angeles.

While in Los Angeles she studied commercial photography and in partnership with another girl ventured into business.

Returning east, she went to Boston, taught a university extension course at Lowell then went into social service work. It was from there she appeared on the aviation horizon as a transatlantic flier.

The sponsor of the flight of the "Friendship" was George Palmer Putnam, publisher. On Feb. 7, 1931 Putnam and Miss Earhart were married at the home of his mother at Noank, Conn.

Mrs. Putnam's activities in the interests of aviation include positions as vice president in charge of public relations for the New York, Philadelphia and Washington airway, assistant to the general traffic manager of the T. A. G.-Maddux air lines, aviation editor of the Cosmopolitan magazine and memberships on committees of the National Aeronautical association and the National Glider association and other aviation organizations.

HUSBAND HEARS NEWS NEW YORK, May 21 (AP)—George Palmer Putnam was informed by telephone from London today in a conversation with the London Daily Sketch that Amelia Earhart, his wife, had landed in Ireland. The Sketch told Putnam that its correspondent at Londonderry had interviewed Miss Earhart after she landed.

"Of course, I'm overjoyed," Putnam said, "but we who know her well were sure she'd do it."

"She has more calm courage than any person I ever knew. Please let me thank the Associated Press warmly for being the first to break the news to me."

Loan Exhorters The term "Four-Minute Speakers" was coined during the World war. They were men and women who gave their services to the government for the purpose of making speeches in behalf of the Liberty and Victory loans. They were so called because they addressed audiences assembled for other purposes, such as theatrical performances, and their time was limited to four minutes.

Childish Playthings A comprehensive survey leads to the conclusion that building blocks are the favorite toy for children up to the age of seven. Drawing and painting materials rank high. With little girls, dolls and house-keeping equipment are favorites. Sand and clay for modeling retain the interest of most children. Mechanical toys, on the other hand, are soon discarded. Adults usually enjoy the mechanical toys more than the children for whom they are purchased.

Concerning Life on Mars The late Professor Lowell was a proponent of the theory that Mars may be inhabited, but there are yet few astronomers who regard it as proved. Life as we know it on earth depends on a number of special conditions, among which are a favorable temperature and a supply of water and of oxygen. Oxygen and water appear to be very scarce on Mars and the temperature unsatisfactory.

Great Expansion The sudden expansive force exerted by water at the moment of freezing is sufficiently great to split iron water pipes, being probably not less than 20,000 pounds per square inch. There have been instances of its splitting cast tubular posts of iron bridges and of ordinary buildings.

Plumber Joke World-Wide The joke about the plumber going back for his tools is world-wide, according to a recent investigation in Europe. It persists in all European countries heard from, and has been traced to other lands. A correspondent in Palestine has just reported that native plumbers there follow the back-to-the-shop custom.

Bird-Banding Old The practice of bird banding goes back to 1708 at least. In the winter of that year some people who were hunting in Sussex county, England, killed a cormorant. Around its neck was a silver band on which were engraved the arms of the king of Denmark.

Most Famous Bible The Gutenberg Bible first appeared on August 15, 1456, a large folio of 1,282 pages printed in Latin. In double columns with spaces left in the text for hand-colored initials. Only 41 copies are known to exist. 11 of which are in the United States.

Church Pew Space The minimum spacing for church pews back to back is 30 inches—32 or even 33 inches to be preferred. A space of 18 inches in the length of the pew is considered a sitting. The actual seating capacity can be determined only by drawing the floor plan and then measuring the linear feet of the pews. For approximate values six or seven square feet may be allowed for each seat.

The Worker Intelligent labor is of the head as well as of the hand. It results in a maximum of effort at a minimum of supervision. It stamps the door as trustworthy. The man who can boss himself is much more valuable than the man who requires another to boss him.—Grit.

Near Thing Surgeons of White Plains, N. Y., sewed up a razor wound in a Negro's heart and gave him an even chance of surviving. This is believed to have been the closest shave on record.—Hamilton (Ontario) Spectator.

Ice at South Pole The thickness of ice near the South pole is estimated by Croil up on theoretical grounds to be from 12 to 14 miles, but off the coast of Victoria Land the ice will be only from 10 to 20 feet high.

Our Name Was Mud "Science tells us now that life began in a few puddles of hot water in a polar depression." We're beginning to see the light. Our first ancestor was a mud pie.—Toledo Blade.

Timing Speed of Birds Teals are extremely speedy birds. Their flight being recorded at about 70 miles an hour. Airplanes have been successfully used to record the flight of these birds, and also wild ducks and geese, by chasing them and watching the reading of the air-speed indicators.
