Be not deceived; God is not mocked; for whatsoever a man soweth that shall he also reap. — Galatians 6: 7.

A FOOLHARDY PROJECT

A certain group of apparently misguided persons in Western Oregon are now soliciting signatures for an initiative measure designed to consolidate the University with Oregon State college at Corvallis, to turn the normal schools at La Grande and Ashland into junior colleges, and to establish a new normal school in the present University plant.

If enough signatures are secured to place the measure on the ballot in the November election, the voters will most certainly turn it down. But it would look better for the intelligence of Oregon citizens if the sponsors of the bill were unable to obtain the number of signatures necessary to place it on the ballot at all.

The measure is claimed to be the means of saving many dollars of the taxpayers' money; but a careful examination fails to reveal any grounds for such claims. On the contrary, it would involve the discarding of hundreds of thousands of dollars worth of property now serving the state, and the spending of thousands of dollars more in building new facilities on the Corvallis campus.

The sponsors of the initiative measure sought the favor of Southern Oregon and Eastern Oregon by suggesting that the Ashland and La Grande normal schools be turned into junior colleges. The suggestion appears all right on the surface, but the fact is that taking away the normal training facilities would reduce the enrollment of these schools to the point where they would have to be closed entirely.

The campus at Corvallis, for six years past, has been inadequate for its enrollment of approximately three thousand students. Dr. Kerr has continually pointed out the necessity of constructing new buildings there. What would Corvallis do with six thousand students if it cannot properly care for three thousand?

Establishing a normal school on the Eugene campus would not begin to make use of the existing facilities there. The attendance would be little more than 1500 instead of the present 3000, and more than a million dollars worth of fraternity property would be made useless. This would reduce the assessed valuation of Eugene property thirty to fifty per cent, and result in the bankruptcy of that community, and great loss to all who have invested money there, including banks and building and loan associations throughout the state.

ADVERTISING AND SUCCESS

Proof that it pays to advertise even in times of economic distress is found in a 17-year record of 120 corporations compiled by the Advertising Federation of America.

The survey contrasts the business losses of 60 corporations which failed to maintain their advertising programs with the business gains of 60 which increased their advertising budgets as business conditions tightened. The result is a glowing testimonial to advertising.

Seventeen years ago many of the persistent advertisers were small concerns struggling for existence. Today all 60 rank high among the business houses of the country. They have multiplied their aggregate net assets four times in that period. Their profits last year were three times what they were in 1915, a comparatively good business year.

All the credit for the successes does not go to advertising nor were the failures due entirely to a lack of it, but in these records of 120 business enterprises is an unmistakable lesson. An adequate and intelligent advertising program is not the sole essential of business success but it is indispensable.

Other Papers Say: THE STORY OF NAZAMA Through a study of carbonized logs found near Crater lake...

Dr. Libbey, through his study of the geology of the park and its surroundings, hopes to determine whether the ancient mountain came to its destruction by explosion or collapse as a result of the fury of its eruptions, a series of seismic disturbances which probably lasted for centuries.

Glaciation evidently ceased when the ancient mountain collapsed, or was blown into dust and rocks by an explosion which must have sent earthquakes rumbling around the earth. However, volcanic activity did not end at that time. In comparatively recent years a miniature volcano, Wizard Island, made its appearance within the caldera.

One of the major insurance companies has issued a pamphlet listing the increase in the cost of automobile insurance, stressing the fact that it is the motor vehicle owners, not the insurance companies, that actually control insurance costs.

When the platform-makers speak of the "dry" they do not always differentiate between two classes of drys. One class is made up of the politicians—the officeholders and would-be officeholders—who have stood by the cause of prohibition. Quite another class is composed of the leaders of such prohibition organizations as the Anti-Saloon League.

In Washington

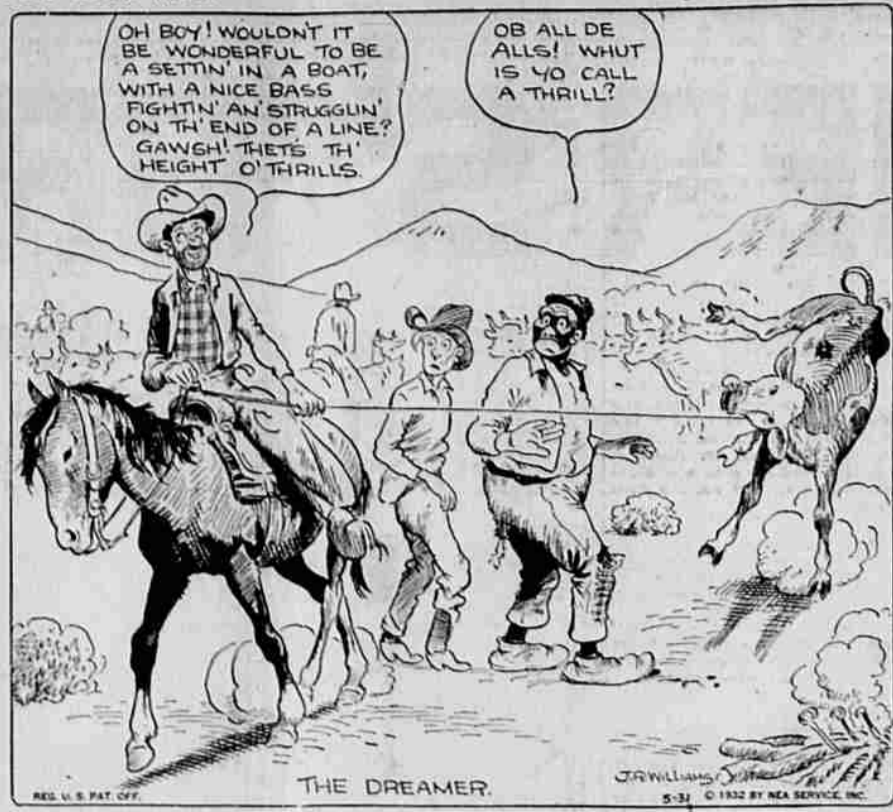

WASHINGTON—There have been five fatalities in the crash of a Curtiss biplane in the Pacific Northwest, according to a dispatch which has reached a distant destination in its career.

So much has happened on this particular day of the week to the "Sun" that it has come to be regarded as his lucky day. On Friday, January 4, 1883, he was born in the Choctaw nation of Indian territory.

There's another Friday looming in Harry's life that might conceivably be the most important by far than any of those at least periodically. It is Friday, June 17, 1883.

At last, Dr. S. Libbey, head of the Geology department of the University of Oregon, has published a study of ancient Mount Mazama, a towering volcano which once dominated the Oregon range.

OUT OUR WAY

THE DREAMER

sometimes happen at political conventions. The best laid plans often go awry. Secretary Hurley is among that group of young and wealthy republicans now holding public office who are known to have political ambitions that shoot very high.

There is no absolute assurance that even if Curtis should not be renominated, Hurley would be the favored one. His clashes with senate committees, gossip has it, did not entirely please some of the higher-ups in the party. However, his availability has yet to be discovered.

PROHI PLANK IS PROBLEM FACED BY REPUBLICANS

When the platform-makers speak of the "dry" they do not always differentiate between two classes of drys. One class is made up of the politicians—the officeholders and would-be officeholders—who have stood by the cause of prohibition. Quite another class is composed of the leaders of such prohibition organizations as the Anti-Saloon League.

It might not be so difficult to draft a referendum plank which would be "acceptable" to the mass of dry politicians. Many of them have been shifting around on the issue as a result of what they see or think they see in the election returns.
